CALL FOR MEGACONFERENCE VII PRESENTATIONS!

You are invited to submit a proposed presentation for Megaconference 7, to be held on Dec 1, from 8am to 11pm EST (GMT-7). You can get an idea of the type of presentation and length desired by looking at last year's program, at http://www.megaconference.org. Presentations which demonstrate new or novel applications of videoconferencing technology, increase world understanding, and are interactive are preferred.

Musical presentations are also invited. The deadline for proposals is October 1, but please send your proposal to me as soon as possible. A paragraph describing it is sufficient.

The Megaconference is the world's largest video conference (360 locations around the world last year) and everyone in the world with H.323 or compatible equipment is invited to participate.

The Megaconference is sponsored by the Internet2 Commons, and supported by many organizations and manufacturers and vendors. There is no cost for participation.
