Historical Geography
Geography

- Deals with the earth we live on, and how people live on it
The world is complex

- Geography is about how you handle that complexity
- Geography handles complexity by focusing on the spatial
  - Investigate political power by looking at what it does to a place
- Geography tends to be interested in patterns and processes in space
Historical Geography

• Takes a serious interest in change over time
• Adds ‘time’ to Geography’s interest in space
• Geography’s patterns and processes unfold over time
• The most complex and ambitious field of geography
Historical Geography

- Is interested in the places and landscape of the past
- But the past is also part of the present, and the future
