APPENDIX II

MAINTENANCE OF EQUIPMENT USED FOR

INDOOR AIR QUALITY TESTING
MAINTENANCE OF EQUIPMENT USED
FOR
INDOOR AIR QUALITY TESTING EQUIPMENT

1. **Maintenance and Repair**

   Equipment is to be calibrated in accordance with a regular calibration schedule developed by the user (i.e. OHS and CSBO). This ensures that equipment used is in proper working condition and that test results are accurate.

2. **Equipment Inventory**

   A list of current equipment will be kept by the respective purchaser. The list will be available on request.

3. **Replacement and Addition**

   All damaged equipment will be replaced. Where possible, old equipment will be replaced with more advanced equipment. The inventory list will be updated as necessary.
