SPECIAL FEATURES
The successful completion of FA/FILM 4130 is a pre-requisite for FA/FILM 4135 3.0

TOPICS AND CONCEPTS
1. FA/FILM 4135 3.0 W is a production course to further explore the art and craft of picture editing. Through fieldtrips to post production facilities and visits with established picture editors around Toronto, presenting their own current editing work in class and closely examining the editing choices of others, the students will further their knowledge to editing as a commercial art form.

   Whether the medium is drama, documentary, or any hybrid alive in the film and television world today, editing explores several goals: to tell a good story; to explore or establish a character; to make an argument; to instruct/provoke or illustrate ideas or to provide the viewer with meaningful emotional experiences. It also abides by rules and restrictions of the market place. Unlike the relatively sheltered university environment, the film and television industry does not operate in an (near-) economic vacuum.

   By comparing their own creative solutions of student projects with the day-to-day process in the post production of the film and television industry, the students will experience how the reality of working in the 500 channel universe have an impact on the art of editing. The course is designed for students who are serious about pursuing a career in film & television.

LIST OF LEARNING OUTCOMES AND EXAMPLES OF
1. Each student enrolled in the course should serve as sole editor of at least one project underway in the project workshop courses. The student presents at least two edits (rough and fine cut) during the semester. Presenting the edit at Finish Line will not be a substitute! If the project gets delayed by other means, please note that it is the student’s responsibility to make other arrangements to fulfill the class requirement with the course director.
