A health educator sees space and movement.

A health researcher sees a struggle against conformity.

A health student sees an allergic reaction.
KEEPING MORE PEOPLE HEALTHIER, LONGER . .
Imagine a future in which almost everyone is healthy.

Preventable diseases have been eradicated.

Others are diagnosed early, when treatment is most effective.

People know what do to stay well – and they do it. As a result, healthcare resources aren't overloaded, so everyone who needs it is sure of getting the best care in the world.

Want to contribute to this future? The possibility begins when you enroll at York University’s Faculty of Health.
Message from the Dean

York University’s Faculty of Health invites you to share our innovative vision. York is redefining and advancing health from a wider perspective. We believe, for example, that shifting the emphasis towards disease prevention rather than primarily on disease treatment will ensure that more people stay healthier, longer – and we have a sustainable healthcare system for everyone.

Faculty of Health graduates are already helping to lead that change in today’s ever-evolving health sector. Their time at York has taken them in exciting career directions, with the opportunity to make a difference in the lives of others. This can be your future, too.

Our multidisciplinary, experiential approach to learning cuts across traditional boundaries and goes beyond the classroom. At York, you will learn from and work with world-renowned educators who are policy makers and researchers on the leading edge.

On behalf of all my colleagues and as founding Dean of the Faculty of Health, I am honoured to welcome you to an academic environment that embodies innovation, excellence and compassion in health promotion, health care and human science.

Let the great learning adventure begin!

Regards
Harvey Skinner PhD, CPsych, FCAHS
Dean, Faculty of Health

We aim to redefine and advance approaches for keeping more people healthier, longer.

Faculty of Health
Why Choose York’s Faculty of Health?

At York, you will not only delve into specific health, health care and human science disciplines - you will gain insights into health from all perspectives: from the laboratory to the bedside; from individuals to whole populations; from the molecular to the global.

More interdisciplinary.
York’s interdisciplinary approach gives you a holistic view of health issues, grounded in our four pillars: Health Policy & Management; Kinesiology & Health Science; Nursing; and Psychology. No other university offers the same strengths in equal breadth and depth. We allow you to examine and understand health issues by combining these with insights from other fields including basic sciences, management, law, information technology, political science, sociology and history.

More experiential.
At the Faculty of Health, your learning experience is not confined to the classroom. You will examine real life issues in health, and in health care, in real world environments. And you will apply your knowledge in a range of settings, from laboratories to sports fields, clinics and community settings. At York, you’re always more than a number. We have the resources of Canada’s largest psychology department, for instance, as well as the largest Kinesiology school, yet we treat each student as an individual, with supportive educators and dedicated advising staff to successfully guide you through the program.

More advanced.
Research by York professors is redefining health and health care. We are shaping health policy by monitoring the human rights of people with disabilities around the world. We are gaining insights into how diabetes can be helped by physical activity. Our nursing faculty, grounded in a patient-centered approach, is exploring new ways to improve quality of care and patient safety. And our clinical psychology researchers are pioneering ways to help troubled children connect with their emotions. These are but a few examples of our in-depth research.

More career choices.
Having a York degree from the Faculty of Health allows you to step into a wide variety of career options. By joining our Faculty, you are in an exciting field at a challenging time. Our graduates find themselves in demand due to: an aging, growing and diverse population, pressing needs in the health workforce, public health threats, rapidly emerging new technologies, restructured health systems, challenging physical and social environments, and global influences.

More student involvement.
In addition to our many student clubs and organizations, the Faculty of Health has a group that unifies these under the Faculty of Health Student Caucus. Members work very closely with other students and the Faculty of Health staff to obtain guidance and take advantage of all the university’s amazing opportunities and offerings.

Come and help keep more people healthier, longer. Join us and be part of this vibrant community.
Nurturing Tomorrows’ Leaders

Ever wonder how doctors, hospitals and emergency departments communicate with each other to coordinate your health care? How long should a person wait in the emergency department? What role does privatization play in health care? Study at the School of Health Policy & Management and discover the big picture behind how and why our health care system must continually renew itself, and why we need leaders with the vision and innovative edge the Bachelor of Health Studies offers.

The School is the only one of its kind — and it is changing the way that health is addressed. We bring the real world into the classroom through a curriculum that combines insights from management, political science, sociology, medicine, law, ethics and information technology. While you can choose to major in one of three disciplines — Health Management, Health Policy or Health Informatics — you will benefit from an integrated exploration of all three.

or visit: www.yorku.ca/SHPM

BACHELOR OF HEALTH STUDIES (BHS)

BHS
(90 credit degree program)
Credits include general education, electives and core BHS courses: The 90 credit BHS exposes students to the range of options in health administration by introducing them to the areas of Health Policy, Health Management and Health Informatics.

The program offers students the ability to develop an area of concentration in one area in Health Studies — health management, policy, or informatics — by taking successively higher level courses that build progressively in one of these areas. Students are also able to change their degree to the BHS Honours or Specialized Honours if they meet the Honours Progression guidelines.

BHS Honours
(120 credit degree program)
In addition to the Specialized BHS Honours with Majors in Health Management, Health Informatics and Health Policy, the School offers a 120 credit BHS Honours degree. The BHS Honours degree covers the breadth of areas in management, policy and informatics in a health care system organization while offering students the flexibility of obtaining a double major Honours Degree, or a Minor in other York programs. The SHPM’s applied emphasis on health administration and health care-related issues makes this a unique offering.

Other programs:
Minors in Health Management, Health Informatics, or Health Policy

HEALTH MANAGEMENT

BHS Specialized Honours
(120 credit degree program)
With a core public administration curriculum and state-of-the-art health management courses, this program prepares you to participate in complex, multidisciplinary health care enterprises. We address the health system from an organizational perspective through courses that cover health management, leadership and decision making, measuring health system performance, health finance, and integrated health systems.

Careers:
• Health Systems Planner
• Administrator in a community health or health care organization
• Quality Performance Specialist
• Research Coordinator

HEALTH INFORMATICS

BHS Specialized Honours
(120 credit degree program)
This is one of health care’s “new frontiers.” Health informatics applies information technology to support decisions concerning the management and delivery of health care. Students acquire skills in system design, system integration, electronic patient records, data quality analysis and tele-health: the integration of computer, phone, internet and information technologies for patient counseling, treatment, education and research. A Certificate in Health Informatics is also available.

Careers:
• Health Information Specialist
• Systems Designer
• Systems Integration Specialist

In today’s complex health care environment, demand is soaring for innovative and effective leaders, highly-skilled policy makers, managers and information specialists.
BHS Specialized Honours (120 credit degree program)
York’s interdisciplinary approach provides students with the broad-based perspectives they need to understand the politics of the health system. You will learn how health policies are developed and implemented by examining current issues through the lens of political science, law, economics, sociology and ethics. At York, you will also gain an understanding of health care decision-making, including how political factors must align for innovative reform. The goal is to develop policies that are not merely reactive but are instead proactive and sustainable in a variety of settings – public, private for profit and private not-for-profit. Graduates are able to effectively contribute to policy research, development and implementation at all levels of the health system.

Careers:
• Health Systems Planner
• Health Policy Analyst
• Research Co-coordinator
• Health Care Advocate
• Community Health Worker

CERTIFICATE
Health Informatics
This cross-disciplinary certificate provides you with specific knowledge and insight into the growing field of health informatics. You will learn about the use of information management as it relates to electronic health records, medication management and other elements in the health care sector, as well as how to develop and manage information systems. Through seminars, laboratory simulations and self-directed research, you will broaden your knowledge in this expanding area of health care. This 30-credit certificate may be pursued independently (if you already possess a community college diploma or university undergraduate degree) or concurrently with any York health-related Bachelor program.

Jenna Evans
2008 BHS (Health Management) Summa cum Laude Graduate. Graduate student, PhD in Health Services Research at the University of Toronto

“Before becoming a student of health management, I was studying biology and later business administration. It was not until I joined the school of Health Policy & Management that I felt I had found my calling. This program allowed me to combine my love of health with the intrigue of business and the mystery of research. I feel that I now have a diverse skill set that will allow me to pursue a career that truly builds on my areas of interest. What I love most about the program is the passion espoused by the professors. It is infectious: Every class was brought to life and the material made relevant to a career in health care. I feel that I am walking away not only with a degree, but also with a handful of role models and mentors.”

Reshma Prashad
Current fourth year student, BHS Honours, Health Policy & Management

“I believe the School of Health Policy & Management has provided me with a solid foundation for a career in Health care and graduate school. During my time here at York, I have grown academically because of the guidance and mentoring I have received from the professors. I’ve had the opportunity to gain valuable experience though co-op, mentoring and research opportunities. By completing my degree at York, I am confident that I can make significant contributes to healthcare industry and redefine the possible.”

Azalyn Manzano
Current fourth year student, BHS Honours, Health Policy & Management

“I’ve always been one of the curious sort who like to ask ‘why are things the way they are?’... the sort that wants to change the world. I was pleasantly surprised to find this School as a place where I can do the former freely, and learn to do the latter excellently. As one of the smallest departments in the faculty, there is a homey feel to the place – the professors and staff are ready to help you pursue your interests and answer thoughtful inquiries, not to mention being immensely capable and renowned in their own particular fields. The School’s paradigm on health encompasses every dimension of life – one of the things that delighted me was that there were always new avenues and ways of thinking to be explored everywhere. From the intensive curriculum to the brand-new internship program helps to prepare you to make an impact on society, and quite possibly, the world.”

York’s School of Health Policy & Management links theory and practice by providing students with opportunities to interact with guest speakers that have real world experience.
Kinesiology & Health Science

Education in Motion
Kinesiology & Health Science is the study of human movement and the relationship between physical activity and health. The program addresses the continuum of human movement from the cellular level to the whole body in the physiological, psychological and socio-cultural domains.

York's Kinesiology & Health Science program has a vision to be Canada's leading academic centre for knowledge creation, integration and dissemination about physical activity and its importance for human health, health science and society.

By offering both Bachelor of Arts and Bachelor of Science options, our degrees are tailored to your academic and career interests. Our program is offered through lectures, tutorials, experiential laboratories and physical activity/practicum courses, and provides the opportunity to learn and develop skills in a wide variety of settings.

For program information, Call: 416 736 5807 or visit www.yorku.ca/kinesiology

Bachelor of Arts in Kinesiology & Health Science (BA)

Bachelor of Science in Kinesiology & Health Science (BSc)

In both degree options, the Kinesiology & Health Science program includes required core courses in Socio-cultural Perspectives in Kinesiology, Fitness Assessment and Training, Research and Data Analysis, Anatomy, Biomechanical Analysis of Human Movement, Skilled Performance and Motor Learning, Physiology and Nutrition.

The BA program exposes students to a range of humanities and social science studies including anthropology, political science, sociology and philosophy, while the BSc option allows students to explore the physical sciences, including chemistry, physics, biology, and earth and atmospheric science.

As your studies proceed, you may choose elective courses from many Kinesiology & Health Science sub-fields such as physiology, anatomy, health, neural science, sport administration, health psychology, athletic therapy, epidemiology, health promotion, and socio-cultural perspectives.

Careers:
• Health and rehabilitation
• Fitness, recreation, or sports industries
• In research
• Teacher

Agatha Stypka
2006 BA Honours (Major and Minor), Kinesiology & Health Science and Health Studies Graduate

“York University is unique, vibrant and innovative. The intellectual, cultural and social life at York offers students opportunities to make valuable connections with peers, professors and York alumni. During my time at York I have been a member of student clubs and have had experience working on campus. By getting involved I gained valuable leadership and life skills while building a network of friends.”

Anna Nguyen
Current fourth year student, BA Honours, Kinesiology & Health Science

“York has an outstanding Kinesiology program with dedicated instructors who enable their students to hone their knowledge and skills and triumph in today's demanding work force. It is exciting to be part of an ever changing field of study which features diverse and dynamic subject matter and which prepares its graduates to be active and affirmative members of our global society.”

Boris Li
Current third year student, BSc Honours, Kinesiology & Health Science

“York's interdisciplinary approach equips with opportunities to succeed in a variety of career paths and more importantly creates active citizens who possess the knowledge and skills to adapt our ever-changing society. The instructors are dedicated in providing their students with the right tools to achieve success and genuinely care about their student’s academic well-being.”

York offers three highly-rated optional Certificate Programs to supplement your degree studies:

• Fitness Assessment & Exercise Counselling
• Athletic Therapy
• Sport Administration

Please contact department regarding admission to this program.
Fostering Caring Relationships

As conventional definitions of health care are challenged by new visions of the role of health care in a total health system, the need for leadership and innovation in nursing and health care has never been greater.

York’s School of Nursing applies a unique teaching approach that focuses on cultivating human relationships. We believe that every patient has a personal story. That’s why our patient-centered learning approach respects patients’ values and choices about health and quality of life. At York, teachers and students are partners in a dynamic, collaborative process of discovery. Through dialogue, modeling, practice, reflective thinking and an experiential group process, we create a diverse community of learners that encourages each student to find his or her own voice. We encourage you to question conventional assumptions and practices as you gain the insights and skills that will prepare you to contribute to the future development of Canada’s health care system.

Careers:
- Nurse in hospitals, community health and other organizations
- Public health promotion leader
- Nursing practice leader
- Health care manager or educator

For program information,
Call: 416 736 5271,
e-mail nursing@yorku.ca,
or visit www.yorku.ca/NURS

Collaborative Bachelor of Science in Nursing (BScN)

York’s Collaborative BScN degree program is designed for students who have no previous nursing experience. Students progress through an integrated four-year curriculum: the first two years are at one of our College partner sites (at Seneca College or at Georgian College), and the third and fourth years are at York. This learning approach helps you gain extensive theoretical/practicum experience in addition to acquiring skills in critical thinking and research. Similarly, the combination of in-class discussions, laboratory and classroom simulations, and clinical placement is designed to help you develop a high degree of theoretical, practical and philosophical knowledge around human science and caring. Graduates receive a Bachelor of Science in Nursing (BScN) degree and qualify to write the Canadian Registered Nurses Exam. Graduates from our program have proven very successful in the RN exams with higher than average pass rates.

2nd Entry Bachelor of Science in Nursing (BScN)

The 2nd Entry BScN degree is available for students who have completed a university degree (in any discipline), or have 60 credits (10 full course equivalents in another field of study) or who have already completed a university degree. The program reflects the growing demand for nursing programs that build on prior university learning and has a curriculum based on the core theme of Health & Healing and Development of Self, as well as a human science approach to teaching, learning and caring for clients and families. The concentrated (and continuous) six semester program option runs through the fall, winter and summer, enabling students to complete their BScN in two calendar years. Graduates receive a Bachelor of Science in Nursing (BScN) degree and qualify to write the Canadian Registered Nurses Exam.

Bachelor of Science in Nursing (BScN) for Internationally Educated Nurses

York helps nurses educated outside Canada to re-enter the nursing profession sooner and with greater confidence. York’s program allows students to build on the strengths they already have so they can more quickly obtain the Canadian credentials they need for employment in Ontario, Canada. We provide a program specifically designed to enhance the practice of internationally educated nurses to practice safely and competently within the Canadian context. In addition, the program provides professional mentoring opportunities which include support, clinical guidance, and the exploration of career choices. Graduates receive a Bachelor of Science in Nursing (BScN) degree in 20 months and qualify to write the Canadian Registered Nurses Exam. Applicants must be residents of Ontario (landed immigrant, Canadian citizen or protected person).

Christopher Genge
Current fourth year student, BScN Honours, Nursing

“York University and Georgian College are helping me to strike a good balance as a nurse by making it possible for me to attain the hands-on nursing clinical knowledge necessary in today’s healthcare environment while at the same time instilling a passion for ethical, client-centered care. I am grateful to the faculty of York and Georgian to have given me the keys to open the door to this new and exciting career.”

Stacy Lew
2007 BScN, 2nd Degree Entry Graduate

“The 2nd Degree Entry nursing program at York University has provided me the opportunity to embark on a new and exciting path in life. The faculty’s dedication to the success of each student has given me the confidence I need to start a rewarding and challenging career in nursing with endless opportunities for professional and personal growth. York has truly put a face on what it means to be a nurse.”

Peter J. Hsu
2007 BScN, Honours, 2nd Degree Entry Graduate

“Without nurse-patient connection, our profession becomes meaningless. York University has given me the fundamental tools to initiate effective communication that is required to facilitate the person’s healing process. I am proud and grateful to have been trained by professors at the School of Nursing who truly demonstrate professionalism and passion for nursing. Their dedication in helping students succeed exemplifies the meaning of this honourable profession.”
Psychology

Real World Thinking
York's Department of Psychology offers the largest selection of courses available at any Canadian university, providing students with more choice. You will study with internationally-recognized researchers, teachers and clinical practitioners while you explore concepts such as motivation, emotion, learning, perception and actions from cognitive, social and biological perspectives.

You will begin with a survey of various areas of inquiry and the applications of psychological knowledge with a curriculum that focuses on the importance of psychology in a real world context including education, organizations and counseling.

You have the option of working toward either a Bachelor of Arts (BA) or Bachelor of Science (BSc) degree, and may choose to focus on specific areas of interest (such as neuroscience, social or clinical psychology) or follow a more generalized program that covers a variety of aspects of the discipline. The BA program exposes you to a full range of psychological concepts and applications, while the BSc option adds a focus on the physical sciences (chemistry, physics and biology) to a full range of discipline-specific courses.

Careers:
An undergraduate degree in psychology provides you with an understanding of how and why people think, feel, act and react – highly useful skills for careers in everything from health, business, management, education, sales and marketing, research. Some of the places previous students have gone on to work are the following:

• Government
• Community health centres
• Public health
• Education
• Health program development
• Insurance industry
• Academic, medical, industrial, science, pharmaceutical and research institutions
• Clinics and hospitals
• Human resources management
• Researcher or practitioner in a psychology-related field

For program information,
Call: 416 736 5115 for General Enquiries – Day Program
Call: 416 736 5202 for General Enquiries – Summer and Evening Programs – Undergraduate
e-mail: psychair@yorku.ca, or visit www.yorku.ca/psych

Psychology BA
(90 credits)
Psychology Honours BA
(120 credits)
The BA option introduces you to a variety of psychological concepts and methods on topics that include behaviour, learning, perception, motivation, cognition, personality, abnormal psychology, child development and social psychology. Through the broad-based curriculum, you will develop an understanding of a full range of subjects and specialized areas within psychology. This combination provide students a solid foundation in the social and applied aspects of behaviour and is ideal for people seeking a variety of careers in different fields such as health or business or who plan to continue their post graduate education in psychology, social work, and education.

Other programs:
Honours Double Major BA
Honours Double Major Interdisciplinary BA
Honours Major/Minor BA
Specialized Honours BA

Psychology BSc
(90 credits)
Psychology Honours BSc
(120 credits)
The BSc option builds on courses in the pure and applied sciences, as well as discipline specific classes, to provide you with a broad understanding of the physical aspects of psychology. In addition to courses in personality, learning, abnormal psychology and specific research methods, you will also study biological sciences (cell and molecular biology, genetics, ecology and evolution), chemistry (structure and chemical dynamics), and either physics or physical science. This combination provide students a solid foundation in the physical aspects of behaviour and cognition and is ideal for people seeking a variety of science-related careers or who plan to continue their post graduate education in psychology, neuroscience, or medicine.

Other programs:
Honours Double Major BSc
Honours Double Major Interdisciplinary BSc
Honours Major/Minor BSc
Specialized Honours BSc

All Honours students do an independent research project. Our specialized Honours program (both BA and BSc) guarantees one-on-one thesis supervision and prepares students for graduate school.

CERTIFICATE

York/Seneca Rehabilitation Services
The Rehabilitation Services program, the only one of its kind, is offered jointly by York University and Seneca College. Graduates receive a BA or BSc degree (Bachelor or Honours degree) from York and a joint York/Seneca Certificate in Rehabilitation Services from Seneca College. The program is designed to provide students with an integrated education, enabling them to become practitioners in the field of rehabilitation. Graduates may be employed by rehabilitation facilities in life skill or recreation capacities as work supervisors and evaluators, job placement specialists, intake interviewers, vocational counselors, case managers and co-ordinators.

Ferrah Raza
Current Fourth year student, BA (Double Major) Honours, Psychology and Law and Society
“...I feel confident and secure about my future.”

Bryan Choi
Current Fourth year student, BSc Honours, Psychology
“Not knowing where I was going to end up in life, I feel fortunate to have found my calling in York University’s Psychology program. The professors have been inspirational advocates of the discipline and approachable individuals whenever I needed help. No doubt, I also appreciate the variety of psychology courses, apparently the most diverse offered by any Canadian University. I feel confident and secure about my future.”

“The Psychology program at York University has provided me with the knowledge, confidence and social and networking skills I need to pursue postgraduate studies. I have grown and learned a great deal both academically and personally. The program offers a large array of information and resources that helped me better understand where I see myself in the future.”
After graduation...what's next?
Career options for Faculty of Health graduates

An undergraduate degree from York’s Faculty of Health is just the beginning...

...to a great career in government, not-for-profits, business or your own business. Your studies at York will provide you with a host of skills – communication, research, analysis, problem-solving and time management – essential for success in today’s knowledge economy. Check out our career pages at www.yorku.ca/health/careers to read about the many interesting and varied jobs our graduates have undertaken. Or pick up our So, what’s next? careers booklets at our recruiting events. And once you are a student here, plan to spend some time at York’s Career Centre – a free service to help you with career development and job search support to build success on your own term. Details at www.yorku.ca/careers

...to a life long profession. With further professional training or upon completion of a professional association examination, our programs are an excellent base for becoming a Clinical Psychologist, Applied Social Psychologist, Counsellor, Physiotherapist, Registered Nurse, Kinesiologist, Medical Doctor, Chiropractor, Dentist, Occupational Therapist, Pharmacologist or other health profession.

...to further study at the graduate level at York. Most researchers and academics continue to study at graduate school. See a list of our graduate programs on the back cover of this brochure or at www.yorku.ca/grads

How can I gain work experience while at the Faculty of Health?
Learning in the Faculty of Health isn’t just about what you do in the classroom. You can obtain real world experience through:

...Placements and practica. Within the School of Kinesiology & Health Science, placement experiences are available within the varsity sport program, intramurals, and the Goreham Shore Sport Injury Clinic. Nursing students undertake a practicum and are placed in one of our many partner sites, which range from health clinics to world class hospitals. Psychology students may take part in the joint York/Seneca College Rehabilitation program, which includes work experience. Qualified Health Policy & Management students may work in the health field as part of their degree program, with selection based on coursework and experience.

...Paid job opportunities on campus. Eligible students interested in research careers can apply to work at York’s Research@York (RAY) program and be paid to participate in research projects with faculty members while receiving compensation at a competitive rate. Learn more at www.yorku.ca/osfs/employ/ray. Also, York’s Work/Study Program provides on-campus part-time job opportunities for eligible full-time students in a variety of jobs (see page 10).

...Volunteer job opportunities on campus. All Faculty of Health students may volunteer to be Peer Health Educators, who provide programs on campus that focus on health topics relevant to their peers. Visit www.yorku.ca/healthed for more information. Plus check out the Get Involved! at www.yorku.ca/getinvolved
What scholarships are available?

Your good grades get rewarded at York. The university has an extensive scholarship and financial aid program to recognize and assist students throughout their studies. In addition to university-wide scholarships, the Faculty of Health has scholarships reserved for entering students.

**Entrance scholarships**
York awards an unlimited number of scholarships to students based on their admission average.

**Kinesiology & Health Science Entrance Awards**
Canadian high school students entering the Kinesiology & Health Science Program may apply for:

**Bobby Orr Entrance Scholarship**
(one granted annually)
- Value: $2,100 plus a York University Entrance Scholarship, if eligible.
- Eligibility: Minimum average of 85%, Record of extracurricular involvement.

**Kinesiology & Health Science Entrance Award**
(one granted annually)
- $2,100 plus a York University Entrance Scholarship, if eligible

**The Lillian Wright Maternal-Child Health Undergraduate Scholarship**
(Four granted annually)
- $2,500 value
- awarded to undergraduate students in the Faculty of Health
- minimum cumulative grade point average of 7.5
- demonstrate an interest in the area of maternal-child health.

**Work/Study Program for Full-Time York Students**
The Work/Study Program provides on-campus part-time job opportunities for eligible full-time York University students. Various administrative and Faculty departments participate in this program providing a broad range of jobs from which to choose. To see if you are eligible, please go to www.yorku.ca/osfs.
What are the required first year courses?

Once you have been accepted into the University and our Faculty, students are required to take certain courses, as outlined below. Each incoming student has a mandatory appointment with an academic adviser to discuss selection. Course descriptions are available at: www.yorku.ca/health/current_students/

What are the admission requirements?

To be admitted to York University you must meet the University’s general requirements which are: Ontario Secondary School Diploma OSSD and six 4U or 4M courses, including ENG4U, all Faculty or program-specific prerequisites. Francophone applicants may present FRA4U, FEF4U or FIF4U.

We accept a combination of U and M courses. We may offer you early conditional admission if you have strong Grade 11 finals and/or interim Grade 12 results.

Note: To take MCV4U, you must take MHF4U either before or while taking MCV4U.

To gain admittance to the Faculty of Health, you may need to meet further requirements depending on the program to which you applied.

Academic Advising

The Faculty of Health Office of Student and Academic Services (OSAS) provides academic advising to all new and continuing students. For students that are newly admitted, the Faculty of Health’s academic advisors are there to assist you in:

- Gaining an understanding of your major program and degree requirements
- Reviewing the University Policy on Academic Integrity and take the University Academic Integrity Quiz
- Signing up for your Passport York account
- Activating your York e-mail account
- Getting help selecting your courses and planning your academic schedule
- Learning how to enrol in courses; select and enrol in your first course(s)
- Reviewing available University services, programs and resources (and learn where to go to learn more)
- Exploring the Current Students Web site
- Finding out if you are eligible for transfer credit (if you are expecting to receive transfer credit, your assessment will be completed after you have booked your appointment).

Faculty of Health OSAS Phone: 416 736 299

Advising Office Location:
Room 019
Health, Nursing and Environmental Studies Bldg. (HNES)
Keele Campus

Other steps to help you into first year:

RedZone
York’s RedZone is open every year in May and a great place to visit either before or after your enrolment/advising appointment to get information on services and programs that will help you get prepared for first year.
www.yorku.ca/web/futurestudents/firstyear/redzone/

Orientation Week
A great way to get to know the York University campus and many of your classmates is by participating in orientation week. Check www.yorku.ca/scld/orientation to learn about specific activities, both academic and social.

Additional Student Services
At York, we’ll work with you to help you reach your full academic potential. Before you begin your studies, you will meet with an academic adviser to choose the courses you’ll need to succeed.

Once you’re studying at York, we have services to help you realize your academic and career goals. Remember that your college of affiliation offers writing support. Learn more at www.yorku.ca/web/futurestudents/services/

Also, don’t forget to meet your new classmates on Facebook. Go to www.yorku.ca/welcome and link through to Facebook.
Interested in coming to our events? guest lectures? open house and receptions?

Want to be part of an experiment or a research study (and earn community service hours?)

Contact us at www.yorku.ca/welcome to find more information specific to incoming students. Or fill out the Reply Back Card.
