Course Director: Diane Lawless
Office: BSB 277
Office hours: Tuesday 1:30-2:30 by appt.
e-mail: dlawless@yorku.ca
Phone: 736-5125
Secretary: Agnes Levstik, Rm. 281 BSB ext. 55125

Prerequisites: PSYC 2130 3 (Personality) and PSYCH 3140 3 (Abnormal)

Course Objectives:

This course focuses on the theoretical and clinical application of psychotherapies oriented toward behavioural change. It is designed to cover traditional models of behaviour change, as well as more recent developments. It has both a theoretical and practical, hands-on component.

Initially we will cover the development of behavioural and cognitive-behavioural therapies from a historical and conceptual perspective. This is followed by examining a specific behavioural intervention that addresses children’s behavioural problems by working with the parent and child at the same time.

Case Study:

- List of three possible change behaviours: Nov. 28
- Baseline collection: Jan. 9 - 23
- Treatment proposals: Jan 23
- Treatment: Jan. 23 – Feb. 6
- Post treatment: Feb. 6 – 20
- Presentation of Findings: Feb. 27 – March 26
- Final Paper: April 2 20%

Class participation: 12%

Last date to drop full year courses without receiving a grade: February 10, 2012

**TEXTS:**

Additional handouts provided in class

**ADDITIONAL READINGS:** (on reserve at Scott Library)

BF 637 B4 M37 2007 (2 hours)

**Term Test #1 (14%) and Term Test #2 (18%)**

The first term test (October 10) will include lecture material, Chapters 1-6 in the Spiegler and Guevremont text. The second test (Dec. 5) will include lecture material, Chapters 7-14 in the Spiegler and Guevremont text plus Chapter 6 of Patterson & Watkins.

**Term Test #3 (19%)** (Feb. 13) will include the topics covered in the Hembree-Kigin & McNeil text.

*Please note*: not all material from the readings will be covered in class. Moreover, some material presented in class will not be covered by the readings. Knowledge of both will be required for every test. Tests will consist of multiple choice, short answer and essay questions.
**Film review (3%)**

A part of each class will be devoted to a film review. Each student will sign up to be a discussant. Film discussants will need to preview the film. All films are available in the York library. Because viewing time in class is limited to 20 minutes, you will need to select the portions of the film you believe would be most useful for the class to see. After the class views the selected portions, you will provide your reactions to the film as a means of stimulating class discussion. This is not meant to be a formal presentation. **Please note:** the library takes reserved films off of the shelf 1 week prior to the viewing date. This means students will need to review their films on an earlier date.

**Theoretical Paper: Due Jan. 30, 2012**

Topics for the term paper should cover either, a) the application of behavioural or cognitive-behavioural interventions to a specific behaviour, or b) a specific issue relevant to the discussion of behavioural or cognitive-behavioural therapies. Examples of possible paper topics will be presented in class; however the choice of topic is up to you. **Please note:** you need to clear the topic with me prior to writing the paper. The paper should be approximately 6-8 pages in length (double-spaced), with approximately 250 words per page.

The objective of this paper is to help you decipher or recognize the theoretical foundations of your chosen intervention. Thus, the paper should not only include a description and elaboration of a specific type of intervention or issue, it should also encompass a discussion of the theory that underlies your chosen intervention. In other words, how does the treatment exemplify (or fail to exemplify) the assumptions, principles, concepts or constructs of behaviour therapy. Do not rely solely textbooks as resource material. You should also make use of literature published in journals or edited texts. Papers should follow American Psychological Association (APA) format. Grammar and spelling will count.

**A NOTE ON PAPERS AND EVALUATION:**

Papers that are late will be deducted 20% per day. Exceptions are made for illness, family death or exceptional circumstances. However, a medical note or official documentation will be required in these cases. The University has subscribed to the Turnitin service which helps professors identify internet plagiarism and helps students maintain academic integrity. The work submitted by students in this course will be submitted to Turnitin. Students who do not want their work submitted to this plagiarism detection service must, by the end of the second class, consult with the instructor to make alternate arrangements.

**Cheating/Plagiarism.** The University does not look favourably on cheating of any kind and the penalties for doing so are very harsh. Become familiar with the rules and regulations regarding cheating/plagiarism. Information on plagiarism,
cheating and other forms of academic dishonesty is provided in the Department of Psychology Supplemental Calendar and the York University Academic Integrity web site. (http://www.yorku.ca/academicintegrity/students/index.htm)

Information on Student Conduct Standards, Religious Observance Accommodation and Accommodations for Students with Disabilities is available on the Senate Committee on Curriculum & Academic Standards webpage – (http://www.yorku.ca/secretariat/senate_cte_main_pages/ccas.htm)

Case Study: (N of 1 project)

Psychology involves the study of human behaviour. For this requirement, you will study OBSERVABLE behaviour…..your own! It is your opportunity to apply some of the principles of behaviour modification in a practical manner. You will design and apply a treatment plan for yourself, mapping consistencies and changes in some aspect of your own observable behaviour using an ABA programme. Steps for this process are outlined below.
1. Start by briefly outlining the principles of an ABA (before and after) study.
2. List some sources of dissatisfaction or desired changed
3. List three behaviours (and the situations in which they typically occur) that you would like to increase or decrease (present in class November 28, 2011)
4. From the three behaviours listed in 3 above, select one. In your selection, keep in mind that it must be a behaviour that can be measured objectively or empirically (i.e., it can be counted, weighed, measured, etc. and it can be detected by another observer observing you). Thus, “asking questions in class”, or “losing 5 pounds” could be objectively “measured” by you, or by an external observer. However, “improving your mood” or “feeling less cranky” is difficult for even you to measure objectively, let alone for an external observer to do so. This doesn’t mean that “changes in mood” are not important psychological phenomenon. It’s just that for this assignment we want to work with behaviours that are more easily measured. Case study progress will be discussed each week in class, so pick a behaviour you are comfortable discussing in class
5. Starting during the week of January 9, collect baseline or base rate data of your selected behaviour for 2 full weeks to determine your pre-treatment level. Incorporate principles of behavioural assessment in your baseline recording. Note: how will you record and protect your data? Some students have recorded data that was undecipherable and one even lost her baseline data.
6. Discuss principles of learning or behaviour change that can guide you in your attempts to modify you own behaviour (e.g., reinforcement, controlling antecedents, modeling, shaping etc.). These principles arise from psychological theory and research. You need to go to the literature to be able to describe them adequately.
7. Because of individual differences, some principles of learning apply more readily to one person than another, so in considering these principles look for those that are most likely to work with the particular individual that is you.
8. Relying on your baseline and assessment procedures, decide on a “treatment” or behaviour change procedure based on some combination of the learning principles discussed in 6 and 7 above. (Class presentation of treatment proposals Jan. 23, 2012)

9. Beginning in the week of Jan. 23, put the behaviour change plan into operation and continue collecting and recording data for two weeks.

10. Stop the treatment after two weeks, and continue to collect and record “post-treatment” data for additional two weeks (Feb. 6 – 20)

11. Analyze and present your results. In presenting any data, at least two characteristics should be portrayed: a) Central tendencies or condensations: and b) Variability. Graphic data, tables and verbal descriptions are acceptable means of data presentation.

12. Discussion of results and suggestions for future treatment. Class presentations of case study findings will be scheduled from Feb. 27 to March 26, 2012.

13. Hand in a 10-page (maximum) double-spaced paper describing your study. The paper should include a description of baseline data collection and assessment, treatment package, results, and a discussion including suggestions for future treatment. You can use an empirical article format, but write in the first person. Otherwise rely on APA style guidelines. (Due April 2, 2012)

LECTURE SCHEDULE

FALL

Sept. 12  Course Overview
Intro and Antecedents of Contemporary Behaviour Therapy
Readings: Spiegler & Guevremont, Chapters 1 & 2
Video 5144: B.F. Skinner and behavior change

19  The Behavioural Model
Readings: Spiegler & Guevremont: Chapter 3

The Process of Behaviour Therapy
Readings: Spiegler & Guevremont: Chapter 4
Video 7485: Smoking cessation

26  Behavioural Assessment:
Readings: Spiegler & Guevremont: Chapter 5
Video 3548: Cognitive behavior therapy
Application Exercise #1
Oct. 3  Acceleration Behavior Therapy  
Readings: Spiegler & Guevremont: Chapter 6  
Video 7483: Fight or Flight: overcoming panic and agoraphobia  
Application Exercise #2

Oct. 10 Test #1

17    co-curricular week

24  Deceleration Behaviour Therapy  
Readings: Spiegler & Guevremont: Chapter 7  
DVD 12339: Harry, behavioral treatment of self-abuse  
Application Exercise #3

31  Combining Reinforcement & Punishment  
Reading: Spiegler & Guevremont: Chapter 8  
Video 7499: Cognitive-behavioral couples therapy  
Application Exercise #4

Nov. 7  Brief/Graduated Exposure Therapy:  
Systematic Desensitization and in Vivo Exposure  
Readings: Spiegler & Guevremont: Chapter 9  
Patterson & Watkins (1996) Chapter 6  
Video 8995: One-session treatment of a patient with specific phobias  
Application Exercise #5  
Prolonged/Intense Exposure Therapy  
Readings: Spiegler & Guevremont: Chapter 10

14  Modeling Therapy  
Readings: Spiegler & Guevremont: Chapter 11  
Video 7483: Weight loss and control  
Case Study: Covert Sensitization for paraphilia  
Application Exercise #6

21  Cognitive-Behavioural Therapy: Cognitive Restructuring  
Readings: Spiegler & Guevremont: Chapter 12  
Application Exercise #7

Cognitive -Behavioural Therapy: Coping Skills  
Readings: Spiegler & Guevremont: Chapter 13  
Video 4888: Practical psychotherapy with adolescents
28  Third Generation Behavior Therapies
Chapter 14
DVD 9142: Getting through a crisis without making it worse
Part 1: Distracting and Self-soothing
**N of 1 project:** Due: list of three possible behaviours to change
Application Exercise #8

Dec. 5  Test #2

**WINTER TERM**

Jan. 9  Developmental considerations in child behaviour problems
Reading: Hembree-Kigin & McNeil, Chapters 1 & 2
Video 8758: Activity scheduling
**N of 1 project:** Begin collecting two weeks of baseline data

16  Behavioural Play Therapy: Teaching behavioural play skills
Reading: Hembree-Kigin & McNeil, Chapters 3 & 4
Case Study: Assessment: Collecting two weeks of Baseline Data
Film 5409: Behavioral treatment of autistic children (Lovaas)
Application Exercise #9

23  Teaching Discipline Skills to Parents
Reading: Hembree-Kigin & McNeil, Chapter 5
**N of 1 project:** Class Presentations of Treatment Proposals,
Initiate Two-Week Treatment Phase

30  **Theoretical Paper due** (hard copy in class, e-copy to turnitin.com)
Teaching Discipline Strategies to Parents
Reading: Hembree-Kigin & McNeil, Chapters 6
Video 7493: Treating Adolescents with ADHD
Application Exercise #10

Feb. 6  Progressing through the Discipline Program
Reading: Hembree-Kigin & McNeil, Chapters 7
Video 7354: Pain management
**N of 1 project:** Initiate Two Week Post-treatment Phase

Termination in behaviour therapy and PCIT
Reading: Hembree-Kigin & McNeil, Chapter 8
DVD 8363: Short circuiting stress
13  Test #3: Hembree-Kigin & McNeil

20  reading week

27  Class Presentations: Case study findings

Mar. 5  Class Presentations: Case study findings
12  Class Presentations: Case study findings
19  Class Presentations: Case study findings
26  Class Presentations: Case study findings

April 2  **Case Study Paper due** (hard copy in class, e-copy to turnitin.com)

Feb. 10: last date to drop class without receiving a grade
