

Job Title: Manager, Health Informatics - Community & Primary Care

Competition Number: 58751

Location: Fraser Health

imagine
THE POSSIBILITIES!

Utilize your expert project planning and leadership skills to support the development, implementation and uptake of the use of the electronic health record in Fraser Health.

- Work with Fraser Health Leadership, Core Services and Clinical Support Services to lead the development of the electronic health record and the implementation and development of information systems to improve work processes and client, patient and resident outcomes.
- As a key member of the Health Information Systems & Services leadership team, be part of the coordinated efforts to move forward the health information management vision for Fraser Health and work collaboratively with other team members in promoting new technologies and best practice for service delivery.

Fraser Health has selected In4Tek's PARIS as its community information system. This position is key in the management of the Fraser Health In4Tek PARIS planning, implementation, administration and ongoing support for FH's Community Services program areas.

Be part of a dedicated, dynamic team of professionals in a role where you can really make a difference!

You bring a Bachelor's Degree in Health Information Management or a related field and seven years' management experience in a medium to large sized organization working with computerized health information systems.

This position is based at our Central City offices in Surrey, B.C.

Imagine the possibilities... then live them!

Closing Date: Open Until Filled

Status: Regular Full-time

FTE: 1.0

Hours of Work: 080 - 1600

Program/Service: Health Information Services
