

# CIKM 2010

## 19<sup>th</sup> ACM INTERNATIONAL CONFERENCE ON INFORMATION AND KNOWLEDGE MANAGEMENT

### HIGHLIGHTS

CIKM 2010 will take place in Toronto, Canada's largest city. The city of Toronto is easily accessible from all the major international cities in the world and Toronto Pearson International Airport has non-stop or the same plane service to 42 United States cities and 56 other international cities such as Rome, Paris, Frankfurt, London, Beijing, Tokyo and Warsaw.

Since 1992, the ACM Conference on Information & Knowledge Management (CIKM) has successfully brought together leading researchers and developers from the database, information retrieval, and knowledge management communities. The purpose of the conference is to identify challenging problems facing the development of future knowledge and information systems, and to shape future research direction through the publication of high quality, applied and theoretical research findings. In CIKM 2010, we will continue the tradition of promoting collaboration among multiple areas. We encourage submissions of high quality papers on all topics in the general areas of databases, information retrieval, and knowledge management. Papers that bridge across these areas are of special interest and will be considered for a "Best Interdisciplinary Paper" award.

The ACM Conference on Information and Knowledge Management (CIKM) provides a leading international forum for presentation and discussion of research on information and knowledge management, as well as recent advances on data and knowledge bases. CIKM also has a strong tradition of workshops devoted to emerging areas of database management, IR, and related fields such as Web Information and Knowledge Management. Workshops vary from year to year.
