NOTES:

Data is for immigrants who are 15 years or older who landed between 2003 and 2006 and live in the Toronto CMA. Data for 2006 only includes immigrants who landed in Canada prior to Census Day, May 16, 2006.

Note from the codebook: Highest education is a derived variable obtained from the educational qualifications questions, which asked for all certificates, diplomas and degrees to be reported. There is an implied hierarchy in this variable (high school graduation, registered apprenticeship and trades, college, university) which is loosely tied to the 'in-class' duration of the various types of education. However, at the detailed level a registered apprenticeship graduate may not have completed a high school certificate or diploma, nor does an individual with a master's degree necessarily have a certificate or diploma above the bachelor's degree level. Therefore, although the sequence is more or less hierarchical, it is a general rather than an absolute gradient measure of academic achievement.
