

November 2012

QUESTION: What is the demographic, residential, economic, educational and occupation profile of Filipino youth in Canada?

What is the Demographic Structure and Citizenship Status of Canada's Filipino Community?

Table 1: Filipino (visible minority) by Citizenship Status and Age Group, Canada, 2006

| | Non-permanent residents (e.g. foreign workers, students, refugees) | Non- permanent residents % | Non- immigrants (i.e. Canadian- born) | Non- Immigrants % | Immigrants | Immigrants % | Total |
|----------------|---|-------------------------------------|--|-------------------------|------------|-----------------|--------|
| < 15 years | 505 | 3.1 | 67685 | 64.3 | 21590 | 7.5 | 89780 |
| 15 to 24 years | 1195 | 7.4 | 21060 | 20.0 | 31630 | 10.9 | 53885 |
| 25 to 34 years | 7400 | 45.9 | 13970 | 13.3 | 41960 | 14.5 | 63330 |
| 35 to 44 years | 4900 | 30.4 | 1540 | 1.5 | 71455 | 24.7 | 77895 |
| 45 to 54 years | 1655 | 10.3 | 325 | 0.3 | 60505 | 20.9 | 62490 |
| 55 to 64 years | 260 | 1.6 | 215 | 0.2 | 36725 | 12.7 | 37200 |
| 65 to 74 years | 85 | 0.5 | 235 | 0.2 | 16365 | 5.7 | 16680 |
| 75 years + | 120 | 0.7 | 185 | 0.2 | 9130 | 3.2 | 9435 |
| Total | 16125 | 100.0 | 105210 | 100.0 | 289365 | 100.0 | 410700 |

Table 1 shows that by 2006 the total Filipino population in Canada numbered 410,700. Of these, 289,365 were immigrants, and another 105,210 were born in Canada. A further 16,125 were neither non-permanent residents, meaning that they were in Canada on visas – for example as temporary foreign workers (including live-in caregivers) and foreign students. Among the Canadian-born Filipinos, 64.3 per cent (67,685) were under 15 years old, and 97.6 percent (102,715) were under the age of 35.

Where does the Filipino Second Generation Live?

Table 2: Top 20 Places of Residence (Census Metropolitan Areas) for Filipinos (Visible Minority) aged 15 years and over, in Canada, 2006, ranked according to size of the second generation population.

| CMA (City Region) | 1st generation | 2nd generation | 3rd + generation | Total |
|--------------------------|----------------|----------------|------------------|--------|
| Toronto | 122,520 | 12,735 | 365 | 135630 |
| Vancouver | 55,380 | 6,255 | 200 | 61840 |
| Winnipeg | 22,380 | 5,830 | 100 | 28310 |
| Montréal | 16,825 | 1,995 | 100 | 18925 |
| Calgary | 17,745 | 1,920 | 90 | 19760 |
| Edmonton | 13,265 | 1,760 | 95 | 15120 |
| Ottawa - Gatineau | 4,950 | 665 | 30 | 5650 |
| Hamilton | 3,240 | 520 | 55 | 3820 |
| Windsor | 2,085 | 445 | 10 | 2540 |
| Victoria | 1,765 | 335 | 15 | 2115 |
| Saskatoon | 1,200 | 290 | 20 | 1515 |
| Oshawa | 1,270 | 275 | 0 | 1545 |
| London | 1,250 | 195 | 35 | 1475 |
| St. Catharines - Niagara | 1,405 | 190 | 10 | 1595 |
| Guelph | 1,225 | 175 | 25 | 1425 |
| Kitchener | 1,315 | 145 | 0 | 1460 |
| Regina | 825 | 130 | 15 | 970 |
| Halifax | 310 | 105 | 15 | 430 |
| Red Deer | 865 | 80 | 10 | 945 |
| Kamloops | 385 | 75 | 0 | 460 |
| OTHER | 13,355 | 1,640 | 405 | 15,385 |
| Canada | 283,560 | 35,760 | 1,595 | 320915 |

Table 2 shows the major city-regions (known as Census Metropolitan Areas) where Filipinos were living in 2006, ranked according to the size of the second generation (i.e. those born in Canada). Note that Toronto, Vancouver and Winnipeg together accounted for nearly 70 percent of all second generation Filipino-Canadians in 2006.

How well educated is the Filipino second generation?

Table 3: Highest Certificate, diploma or degree for Second Generation (born in Canada) Visible Minorities, Age 25-44, Canada 2006

| Highest certificate, diploma or degree achieved | Filipino | Chinese | South Asian | Latin American | Black | All Visible Minorities | Not a visible minority | Total Population |
|---|----------|---------|----------------|-------------------|-------|---------------------------|------------------------|---------------------|
| A certificate or diploma below bachelor's level | 65.0 | 40.8 | 48.8 | 78.4 | 70.7 | 55.4 | 70.3 | 68.0 |
| University certificate or degree at bachelor's level or above | 35.0 | 59.2 | 51.2 | 21.7 | 29.3 | 44.6 | 29.7 | 32.0 |

Among second generation (i.e. the children of immigrants), there is a wide variation in the average level of educational attainment. Table 3 focuses solely on the 25-44 year old cohort in the second generation. The Filipino second generation fares better in terms of degree graduation than those racialized as 'Latin American' or 'Black', but significantly worse than Chinese or South Asian second generations. The relative low level of degree graduation in the *non-visible minority* second generation is a reminder that second generation youth may be disadvantaged even if they are *not* part of a racialized minority.

Are Filipinos in the Second Generation finding well-paid work?

Table 4: Labour Market Outcomes of Filipinos and Other Visible Minorities who are "Non-Immigrants", Canada, 2006

| Labour Market Indicators | Filipino Visible Minority | All Visible Minorities | Not a visible minority | Total Population |
|--|---------------------------------|------------------------------|------------------------------|---------------------|
| Participation rate (per cent who are employed or looking for work) | 72.4 | 67.9 | 68.3 | 68.3 |
| Unemployment rate (per cent of those participating who are looking for work) | 7.5 | 9.8 | 6.3 | 6.4 |
| Median Income \$ (2005) | 15,755 | 15,889 | 29,457 | 27,847 |
| Average income \$ (2005) | 22,469 | 25,896 | 40,826 | 38,994 |

Table 4 shows a variety of labour market indicators for all non-immigrants. It is important to note when comparing columns that although most Filipino non-immigrants are *second* generation (i.e. the children of immigrants), other columns may include many who are 3rd-plus generation.

The table indicates a very high level of participation in the labour force and an unemployment rate that is lower than the visible minority group as a whole, but higher than non-racialized groups, and higher than the non-immigrant population as a whole. While indicators of labour market participation are positive for Filipino non-immigrants, the income figures show that they actually fare poorly in terms of earnings. Both median and average (mean) incomes are below those of the comparison groups.

What kind of jobs are Filipino youth doing?

Table 5: Occupational Patterns among Filipino (by ethnic origin) Youth, Aged 15-24, Canada, 2006

| Occupational Group | Filipino Ethnic Origin, Age 15-24 (%) | Total Population, Age 15-24 (%) |
|--|--|------------------------------------|
| A. Management occupations | 1.9 | 2.2 |
| B. Business, finance and administrative occupations | 16.6 | 12.5 |
| C. Natural and applied sciences and related occupations | 3.4 | 3.5 |
| D. Health occupations | 3.7 | 2.6 |
| E. Occupations in social science, education, government service and religion | 2.3 | 3.9 |
| F. Occupations in art, culture, recreation and sport | 2.4 | 3.6 |
| G. Sales and service occupations | 52.2 | 46.0 |
| H. Trades, transport and equipment operators and related occupations | 6.4 | 12.5 |
| I. Occupations unique to primary industry | 0.8 | 4.9 |
| J. Occupations unique to processing, manufacturing and utilities | 6.7 | 4.8 |
| Other | 3.5 | 3.5 |
| Total | 100.0 | 100.0 |

Table 5 indicates the broad occupational groups where those Filipino youth (aged 15-24) with jobs can be found working. This is compared with the occupational distribution of the population as a whole. In this case, 'Filipino' is taken to be those who responded in that way to the 'ethnic origin' question in the census.

The table tells us where Filipino youth are under- or over-concentrated in the labour market. We see, for example, that they are over represented in healthcare occupations (3.7 per cent, compared with only 2.6 per cent of the population as a whole). We also see Filipinos over-represented in sales and service occupations, business/finance/administrative jobs, and in manufacturing. On the other hand, Filipino youth are under-represented in management, science/education/government, trade/transport, and primary industry (i.e. agriculture, mining etc.).
