ARVO 97 Debriefing

The following abstracts were picked: 2246, 4343, 4340, 3069, 4253, 3275. Josee Rivest adds: 2918 "Orientation constancy in the visual cortex of the awake monkey". Some "hot topics" that we identified were "the role of attention in vision" and, rather surprising in the general context of ARVO, possibly building up to a bigger event at Neurosciences, "the control of smooth pursuit".
