developer

About it

- Part of a team of central support for teaching and learning across the university
- Run professional development workshops for ta's and teachers and faculty members
- Scholarly approach to teaching and learning
- Does research to support senior administration

Training advisor

- Gps(advisor for officers in the army)
- Training advisor for force generation
- Improve student success by way of supporting faculty
- Help faculty to be better
- Supports faculty instructors at the collegiate or university level, to teach effectively as possible.
- Guidance, goals, and provide resolutional outcomes

Good Part

- Enjoys day to day aspect of his work
- Each day is different
- Multiple projects or meetings so nothing is the same as the previous day
- Love that his job changes every three years, because the military is always moving around
- Meets new people constantly
- Always different tasks to accomplish
- The mission of the role
- Love teaching and learning
- Help students be successful
- Best feeling when helping people
- Providing positive impact on people
- Work with different departments

Challenge

- Managing expectations of where the lines should be drawn in terms of who is doing which aspect of the workload

Tough to settle down

- **Constantly having to learn a new job**

- **From faculty**

- **Argue with the fact that you know**

- **Resistance to the need or value education brings,**

- **Working with people who are not as receptive**

- **Learning to outgrow current barriers between clients and coworkers**

Experience*

- No one straight path to the career
- * Be a TA to become a junior educational developer
- Original job was to support the TA's
- Ended up being an educational developer during*the pandemic
- Tried to get into law school, worked in korea with the US army base
- Went to recruiting office and started working for the military in 2012
- Teaching and learning for the most part
- Initially became a TA for her Chemistry class
- Professor in Chemistry field and gained PhD
- Western support services, one day realized the other side of education and explored the work of support workers onto becoming an Education Developer

Advice

- Get involved with the community
- Attend regional conferences
- Join community of practices and different groups to network
- **Maintain an open mind (take chances, make mistakes and get messy)**
- **It's never too late to try something new**
- **Life is constantly changing and don't be afraid of change**
- **Follow your heart**
- **Experience are important**
- **No formal certification**
- **Get your foot in the door somewhere for experience such as apprenticeships**
- **Council of Educational developers in Ontario are knowledgeable**
- **START Networking**
