

# WHAT IS AN Educational Developer?

With this narrative graphic, you will be able to gain an insight into what an educational developer entails through the various important aspects within the field.

## Let's start at the beginning

An educational developer is an individual who works within an academic institution to provide and implement enhancements in curriculum development and course delivery.

## How can I become an educational developer?

There must be a deep understanding of critical pedagogy. Once this understanding is developed, you can then apply this knowledge in the development of education and new strategies.

## Beneficial Skills

- Open-minded
- Effective listening
- Communication
- Supportive
- Collaborative skills
- Leadership/ Team Development

## Required Education

- A Masters Degree (Preferably in education)
- An Undergraduate degree
- Any related job experience to educational/educational development

## You can be a mentor!

You can support teachers in their practices and work together to improve aspects of education. You can serve as an external voice in teaching that can provide meaningful support.
