

Educational Consultant

An education consultant makes a meaningful difference in how education is delivered and received. Being a guiding force in improving opportunities and classrooms, education consultants find themselves shaping the academic lives of students across the country.

Educational consultant: An education consultant is often someone with teaching or administrative experience now serving as an advisor in all things education. Their focus is in training and advising members of the educational community on new technologies, classroom policies, student achievement, and much more.

Typical duties include:

- Advising teachers, professors, school administrators, and school boards on any new educational strategies.
- Providing insight to various school officials on ways to improve existing educational techniques or school policies.
- Checking on the student teams with their process.

Qualifications:

- A graduate degree and/ or higher degree
- Educational research
- Interpersonal communication
- Curriculum development
- Strategic planning
- Collaboration skills

Salary: The Bureau of Labor Statistics states the median salary for an education consultant is \$64,450. The lowest 10% percent earn less than \$36,360 and the highest 10% percent earn more than \$102,200.

The Bureau of Labor and Statistics also states a variation in salary scale based on the institution of employment:

- Government: \$76,970
- Schools: local, state, and private: \$69,900
- Postsecondary schools: \$58,420
- Educational support and private organizations: \$62,530.

Projected Job Growth: Bolstered by a forecasted increase in total students, the job outlook for educational consultants is positive for years to come. Employment for individuals who coordinate student instruction is expected to rise 6% from 2019 to 2029, a growth rate higher than the average across all occupations.

Workplace of Educational Consultant:

- Primary schools
- High schools
- Colleges or universities

Advantages and disadvantages

Pros:

- Always learning new ideas and educational practices
- Opportunities for rapid advancement
- Build a powerful network
- Flexibility and control
- Specialist or expert status.

Cons:

- Job security — as one project ends, there may not be an immediate job available.
- Long hours
- Self-reliance for career advancement

Continuing education: Professional development is an imperative for standing out and doing the job well. Many programs and opportunities are available online and through most professional associations.

- Independent Educational Consultants Association
