**Workshopping AI: Who's at the Table?**

Political Science PhD Candidate Elia Rasky has critically examined a series of Canadian government sponsored workshops on Artificial Intelligence and Society. In 2017, the Canadian federal government launched the “Pan-Canadian Strategy on Artificial Intelligence,” an ambitious plan to make Canada “a global leader in AI.” As part of this plan, the government sought to stimulate discussion about the ethical and societal implications of AI. Hosted by the Canadian Institute for Advanced Research (CIFAR), these workshops brought together academics, engineers, and policymakers to discuss the impact of AI on healthcare, education, the modern workplace, Indigenous communities, and other areas. In his peer-reviewed article, Rasky argues the workshops are elite-dominated spaces that systematically exclude laypeople and average consumers of technology.
