Service to the Scientific Community, Policy, and Practice

12/2023–ongoing	Member of the Ontario Caregiver Coalition (OCC), serving on the Research and Advocacy Committee. In that function I helped the OCC develop a caregiver survey, which was administered via my SimpleSurvey account in Summer 2024. The OCC received 621 responses. I performed statistical analyses of the data, informing the development

and publication of 4 policy briefs (a 5th one is currently in preparation, details in the Reports & Policy Briefs section). I also provided scientific input on the policy brief contents and led the policy brief on caregiver respite support needs. I am also representing the OCC on an advisory committee of persons with lived experience that advises a research project on care poverty, led by Chrstine Kelly, University of Manitoba. In total, the work for the OCC involves 4-6 hours of meeting time per month and about 1-2 hours of work per week.

06/2023–ongoing Invited expert member of the Alberta Continuing Care Quality of Life (QoL) Taskforce. Alberta has dedicated a budget of $1 billion to transforming its continuing care sector. As part of this initiative, Alberta Health Services and the Alberta Government Continuing Care Branch have created this task force that from 06/2023 to 05/2026 will implement and evaluate routine measurement of QoL in facility-based continuing care homes in Alberta, as well as several strategies to improve resident QoL. I was invited as an expert member of this task force, asked to be a member on several work groups (QoL framework workgroup, evidence-based practices to improve QoL work group, QoL toolkit workgroup), chair the measurement work group, and lead an umbrella review on effective strategies to improve LTC resident QoL. The activities include 1-3 weekly meetings (between 1-2 hours, each), exploration of research evidence to inform taskforce activities and decisions, development of tools and implementation strategies, baseline measurement of QoL, implementation of change, follow up measurement of QoL, implementation of routine QoL measurement, etc.

08/2021–ongoing Invited expert member of the Alberta Continuing Care Quality Committee (CCQC). The CCQC is led by Alberta Health Services and includes members of Alberta Health Services, the Alberta Government Continuing Care Branch, and the Alberta Health Quality Council whose portfolios include quality improvement in continuing care. The committee meets once every two months to discuss quality issues and solutions in Alberta's continuing care system. I was invited to present on my QoL research to this group on several occasions (e.g., on Apr 5, 2021, Nov 28, 2022, Jun 1, 2023).

Knowledge Translation & Advocacy Activities

03/2026–04/2026 Assisted the Ontario Caregiver Coalition with a submission to the Ontario Human Rights Commission to inform their update of a policy against discrimination based on family status. I drafted the sections on discrimination of caregivers in the post-secondary education system and inequities experienced by Indigenous caregivers.

03/2026 Meeting with key adult day program decisionmakers with the Government of British Columbia (Therese Harper, Alix Adams, Johanna Drake) to share key insights on my adult day program research with them, Mar 27, 2026.

03/2026 Invited meeting with regional adult day program decision makers of all five health regions in British Columbia to share key insights on my adult day program research with them, Mar 18, 2026.

03/2026 Conversation with Sahana Kumana, a grade 8 student, to give her advise on a project on activities that help older adults maintain good brain health, Mar 18, 2026.

I referred her to the Therapeutic Recreation Ontario, whose Executive Director Lisa Gordon reached out to me to thank me for the referral. She noted that introducing students to their field at an early stage helps strengthen awareness of their profession and supports their ongoing efforts to advance patient-centred care. She invited me as a speaker to one of their future conferences to share my experience collaborating with recreational therapists and the critical role recreational therapists play in the context of care for older adults and respite care for their caregivers.

05/2018–09/2019	Participation in learning congresses for front-line nursing home care teams within the Safer Care for Older Persons (in residential) Environments (SCOPE) trial. SCOPE is a randomized controlled trial which examines the effect of a quality improvement intervention which empowers care aides to take the lead on improvement strategies within their nursing home. SCOPE also aims to improve quality of work life for staff, demonstrated by measures of work engagement, staff empowerment and job satisfaction. In the learning congresses, care teams are supported in identifying, measuring and improving quality of care on their units. My role was to observe and facilitate care team round-table discussions and exercises.

01/2018	Presentation to Carmen Grabusic, Director, Program Policy and Quality Improvement, Continuing Care Branch, Alberta Health, and her team on results of a publication on physical and mental health of care aides in Western Canadian nursing homes
01/2018	Webinar-based Delphi panels with Citizen Advisory Board members (people with dementia living in the community, nursing home residents, family/friend caregivers, volunteers, care aides) of the Translating Research in Elder Care (TREC) and the Seniors

– Adding Life To Years (SALTY) programs. We conducted these panels to prioritize end of life outcomes for our further research. Specifically, we asked participants to select from a list of burdensome end of life symptoms and from a second list of potentially inappropriate care practices at the end of life these outcomes that they would be most interested in getting regular feedback on. I led the preparation of these panels, recruited participants and facilitated the panels.

11/2017 Participation in a workshop to engage with and get feedback from decision makers on preliminary findings and future directions of the SALTY (Seniors – Adding Life to Years) project.

08/2017 Webinar-based Delphi panels with 10 palliative care and long term care experts from five health regions in Alberta, British Columbia and Manitoba. We conducted these panels to prioritize end of life outcomes for our further research. Specifically, we asked participants to select from a list of burdensome end of life symptoms and from a second list of potentially inappropriate care practices at the end of life these outcomes that they would be most interested in getting regular feedback on. I led the preparation of these panels, recruited participants and facilitated the panels.

06/2016–04/2017 Participation in intervention workshops within the Improving Nursing Home Care Through Feedback On PerfoRMance Data (INFORM) trial. In INFORM, front-line managerial teams receive feedback of research data in order to make improvements on their care units. Specifically, managerial teams are supported in improving the involvement of care aides in formal care interactions on their care units. The work shops include presentations on the feedback reports the managers receive, interactive peer-to-peer discussions in which teams identify performance gaps, barriers/facilitators for change, set SMART performance and learning goals, define improvement strategies and measures to evaluate success. My role was to give introduction presentations, facilitate round-table discussions, and support care teams in creating their action plans.

07/2015–ongoing Active involvement in dissemination activities (feedback of research results to research participants) within the Translating Research in Elder Care (TREC) program of research

TREC collects comprehensive data from nursing home residents, care staff, care units and facilities. Systematically feeding back research results to study participants, to improve care, is integral to TREC. In TREC's phase 2 (2014–2017) we substantially advanced our feedback approach. I led this initiative during my postdoctoral training. This involved (1) identifying best practices for feedback delivery, (2) assessing target persons' (policy makers, nursing home managers and direct care staff) preferences for feedback content and delivery methods, (3) generating mock feedback reports and presentations, (4) tailoring final feedback reports for each health region and care facility, (5) organizing and participating in regional summits to discuss feedback reports, (6) organizing presentations at each of 91 facilities participating in TREC, and (7) surveying summit and presentation participants' satisfaction.

The biggest impact of this KT initiative is our subsequent CIHR-funded pragmatic, cluster randomized trial – Improving Nursing Home Care Through Feedback On PerfoRMance Data (INFORM). In INFORM, we are evaluating impact and cost of different, theory-based feedback strategies on care unit performance (context, care practices and resident outcomes). I am the first author of the INFORM trial protocol.

07/2015 Presentation of the Trajectories systems project to members of the Long Term Care Collaborative Working Group Alberta. The Trajectories project assesses trajectories of burdensome symptoms (e.g., pain, depressive symptoms) and potentially inappropriate care practices (hospital transitions, physical restraint use) at the end of life in nursing home residents.

04/2015 Expert panel involving provincial and health region level palliative care and long term care experts and decision makers. In this panel we discussed results of our project on burdensome symptoms (e.g., pain, depressive symptoms) and potentially inappropriate care practices (hospital transitions, physical restraint use) at the end of life in nursing home residents. I led the preparation and conduct of this meeting. The meeting was very well received and led to a scale-up of our end of life work. We are now part of a CIHR funded pan-Canadian team grant on quality of care at the end of life for nursing home residents, involving researchers as well as knowledge users.

11/2014 and 07/2015	Participation in the meeting with the Translating Research in Elder Care (TREC) International Scientific Advisory Committee (ISAC) The role of the TREC ISAC is to review TREC's scientific activities, give feedback on the scientific rigor of these activities and give advice for TREC's future strategic directions. My role was to assist with planning this meeting, preparing and giving parts of the presentation, and being actively involved in the discussions.

05/2014–ongoing	Active participation in the Translating Research in Elder Care (TREC) Annual General Meetings (AGM) TREC includes over 30 researchers from multiple disciplines (such as nursing, medicine, public health, epidemiology, organizational sciences, psychology, etc.). The scientific team spans 14 universities (9 Canadian, 3 US, 2 Swedish). Furthermore, the TREC team includes multiple trainees of all levels; health policy makers from Alberta, British Columbia, Manitoba, Nova Scotia, New Brunswick, Prince Edward Island, and Saskatchewan; nursing home managers and care staff; and persons living with dementia and their family/friend caregivers. The TREC AGM brings together all these stakeholders (often 100+ participants) to give updates in TREC activities and actively involve each of the stakeholder groups in strategic discussions, generation of new research ideas, interpretation of study results, etc. My role in these meetings has been to actively help developing the agendas, prepare and give presentations on TREC projects, facilitate breake out sessions and round table discussions, and actively advance the TREC networks in formal and informal interactions with meeting participants.
05/2014–ongoing	Active participation in the Translating Research in Elder Care (TREC) Investigator Meetings TREC holds between one and three Investigator Meetings per year. My role in these meetings has been to actively help developing the agendas, prepare and give presentations on TREC projects, facilitate breake out sessions and round table discussions, and actively advance the TREC networks in formal and informal interactions with meeting participants.
