Course Objectives:

This course will examine various topics related to community psychology, including theories and research, prevention and early intervention, community mental health, the community practitioner as social change agent, and applications of community psychology to various settings and situations. In general, community psychology is concerned with the application of psychological principles to understand and address social issues that affect communities (e.g., schools, neighbourhoods, the workplace, the larger society), such as child abuse, homelessness, school violence, racism, crime, mental illness, and substance abuse. An aim of community psychology is to draw upon the resources of communities to develop solutions to resolve or prevent problems.

Community psychology is also concerned with the interrelationship between

individuals and the communities in which they are imbedded (e.g., “community as context”) and the role of community development to enrich and strengthen communities to promote the optimal growth and development of its members and their health and well-being and mental health. In these regards, community psychology shares some concepts with clinical and counseling psychology, particularly the humanistic traditions, however, utilizing and applying resources both at the community-level and the individual-level.

Learning Objectives: The objective of the course is to increase students’ knowledge of the principles, practices, and research of community psychology. More specifically, this includes developing students’ ability to:

- critically analyze the major historical influences and contemporary approaches to community psychology
- understand the main conceptual issues related to the provision and evaluation of services from a community-based perspective
- understand the major research findings and concepts in community psychology and think critically about the various approaches to community psychology research
- consider the practical and policy implications of the work generated by community psychologists
- use the vocabulary and concepts of the field of community psychology

Class format: Course material will be presented by lecture, film and when possible, guest speakers.

MOODLE: You are responsible for checking moodle.yorku.ca frequently for assignment guidelines, notes, and other key class updates and information.
