

**Faculty of Health
Department of Psychology
PSYC 2021 3.0 C: STATISTICAL METHODS I
Online via Zoom
2021 Fall**

The course will be delivered online via Zoom. All lecture will be synchronized lectures, which will be held on Mondays between 8:30am-11:30am. The lectures will be recorded so you can view them at a later time.

Instructor and T.A. Information

Instructor	Cathy (Xijuan) Zhang
Email	xijuan@yorku.ca
Office Hour	Thursday at 3pm-4:30pm

TA	Tenzin Chosang
Email	tencho@my.yorku.ca
Office Hour	Monday at 5pm-6pm

Course Prerequisite(s): Course prerequisites are strictly enforced

- HH/PSYC 1010 6.00 (Introduction to Psychology), with a minimum grade of C when used as a prerequisite.

Course Credit Exclusions

Please refer to [York Courses Website](#) for a listing of any course credit exclusions.

Course website: [eClass](#)

All course materials will be available on the course eClass site.

Course Description

This course is usually the first course in statistics that most psychology (and other) majors take in university. This class will introduce you to the basic principles underlying statistical analyses in psychology and other social sciences areas. It will also prepare you for future statistics classes which will focus on more advanced techniques. More specifically, this course will introduce you to the type of variables utilized in psychology, two-variable correlation, and comparing two independent or paired-sample means. Null hypothesis significance testing will be introduced, however the focus will be on understanding relationships among variables. Data analysis using statistical software will be carried out with the open-source software R (www.r-project.org).

Program Learning Outcomes

Upon completion of this course, students should be able to:

1. Compute descriptive statistics and inferential statistics.
2. Interpret and report the results of descriptive statistics and inferential statistics.
3. Distinguish between the role of descriptive statistics and inferential statistics.
4. Run simple analyses using the computer programming language R.

Topics Covered

- Defining Key Statistical Terms
- Frequency Distributions
- Central Tendency
- Variability
- z-scores/Normal Distribution
- Probability
- Sampling Distribution
- Confidence Intervals
- Power
- Effect Size
- Hypothesis Testing
- Pearson's Correlation
- Chi-square: Goodness of Fit
- Chi-square: Test of Independence
- One-sample *t*-test
- Introduce independent and dependent designs

**Effect size is included as part of all inferential statistics covered in this course.*

Course Notes and Textbooks

Required lecture notes will be posted on [eClass](#)

Required textbook: Navarro (2018): Learning statistics with R: A tutorial for psychology students and other beginners.

- It is an open source textbook that can be downloaded using the link <https://open.umn.edu/opentextbooks/textbooks/559>

Required youtube videos are at the end of the syllabus.

Recommended youtube videos will also be posted on [eClass](#)

Additional Recommended textbook: Illowsky & Daen (2013): Introductory Statistics.

- Also an open source textbook that can be downloaded using the link <https://openstax.org/details/books/introductory-statistics?Book%20details>

Course Requirements and Assessment:

Final grades will be comprised of marks earned on:

1) Exams (Midterm: 20%; Final Exam: 40%)

Midterm (October 18, 2021):

Final Exam (TBA): All course materials will be covered with more emphasis on the second half of the course.

2) Assignments (4 x 10%)

There will be four assignments for the course that will require you to analyze data (including using R) and short answer questions. You will be given the assignments one week before they are due.

Assignment Due Dates:

Assignment #1: October 8, 2021

Assignment #2: November 5, 2021

Assignment #3: November 19, 2021

Assignment #4: December 3, 2021

You will be deducted 10% (of the 15% allotted to each assignment; i.e., 1.5% of your final grade) for each day (not including weekends) that your assignment is late.

3) Bonus (2%)

You can earn up to 2% bonus if you write the assignments using LaTeX on Overleaf.

- 0.5% for each assignment
- Tutorial website: [https://www.overleaf.com/learn/latex/Learn LaTeX in 30 minutes](https://www.overleaf.com/learn/latex/Learn_LaTeX_in_30_minutes)

Class Format and Attendance Policy

Zoom lecture attendance will not be required but I highly encourage you to come to our synchronized live Zoom lectures. During the lectures, I will give students time to ask questions so if you come to the lectures, you will have more chance to ask questions.

Grading as per Senate Policy

The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests* will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 89, B+ = 75 to 79, etc.)

For a full description of York grading system see the York University Undergraduate Calendar - [Grading Scheme for 2021-22](#)

Missed Tests/Midterm Exams/Late Assignment

If you cannot handin the assignment on time, please let me know as soon as possible. I can give a three-day extension without penalty. After the three-day extension, you will lose 10% of the assignment grade for each late day until the release of the answer. Once the answer key is released, you will not be able to submit the assignment for grades.

If you miss the midterm, then the final exam will count 60% of your grade.

Add/Drop Deadlines

For a list of all important dates please refer to: <https://registrar.yorku.ca/enrol/dates/fw21>

Last date to add a course without permission of instructor	Sept. 21
Last date to add a course with permission of instructor	Oct. 5
Last date to drop course without receiving a grade	Nov. 12

Course Withdrawal Period (withdraw from course and receive a “W” on transcript – see Add and Drop Deadline Information below)	Nov.13-Dec.7
---	--------------

Add and Drop Deadline Information

There are deadlines for adding and dropping courses, both academic and financial. Since, for the most part, the dates are **different**, be sure to read the information carefully so that you understand the differences between the sessional dates below and the [Refund Tables](#).

You are strongly advised to pay close attention to the "Last date to enrol without permission of course instructor" deadlines. These deadlines represent the last date students have unrestricted access to the registration and enrolment system.

After that date, you must contact the professor/department offering the course to arrange permission.

You can drop courses using the registration and enrolment system up until the last date to drop a course without receiving a grade (drop deadline).

You may [withdraw from a course](#) using the registration and enrolment system after the drop deadline until the last day of class for the term associated with the course. When you withdraw from a course, the course remains on your transcript without a grade and is notated as 'W'. The withdrawal will not affect your grade point average or count towards the credits required for your degree.

Electronic Device Policy

This course will be delivered in an online format and therefore electronic devices (e.g., tablets, laptops) are permitted during class time for course-related purposes. It is expected that you would complete tests/exams in a manner that does not require consulting an unauthorised source during an examination unless the tests/exams are open-book.

Academic Integrity for Students

York University takes academic integrity very seriously; please familiarize yourself with [Information about the Senate Policy on Academic Honesty](#).

It is recommended that you review Academic Integrity by completing the [Academic Integrity Tutorial](#) and [Academic Honesty Quiz](#)

Test Banks

The offering for sale of, buying of, and attempting to sell or buy test banks (banks of test questions and/or answers), or any course specific test questions/answers is not permitted in the Faculty of Health. Any student found to be doing this may be considered to have breached the Senate Policy on Academic Honesty. In particular, buying and attempting to sell banks of test questions and/or answers may be considered as “Cheating in an attempt to gain an improper advantage in an academic evaluation” (article 2.1.1 from the Senate Policy) and/or “encouraging, enabling or causing others” (article 2.1.10 from the Senate Policy) to cheat.

Academic Accommodation for Students with Disabilities

While all individuals are expected to satisfy the requirements of their program of study and to aspire to do so at a level of excellence, the university recognizes that persons with disabilities may require reasonable accommodation to enable them to do so. The university encourages students with disabilities to register with Student Accessibility Services (SAS) to discuss their accommodation needs as early as possible in the term to establish the recommended academic accommodations that will be communicated to Course Directors as necessary. Please let me know as early as possible in the term if you anticipate requiring academic accommodation so that we can discuss how to consider your accommodation needs within the context of this course. <https://accessibility.students.yorku.ca/>

Excerpt from Senate Policy on Academic Accommodation for Students with Disabilities

1. Pursuant to its commitment to sustaining an inclusive, equitable community in which all members are treated with respect and dignity, and consistent with applicable accessibility legislation, York University shall make reasonable and appropriate accommodations in order to promote the ability of students with disabilities to fulfill the academic requirements of their programs. This policy aims to eliminate systemic barriers to participation in academic activities by students with disabilities.

All students are expected to satisfy the essential learning outcomes of courses. Accommodations shall be consistent with, support and preserve the academic integrity of the curriculum and the academic standards of courses and programs. For further information please refer to: [York University Academic Accommodation for Students with Disabilities Policy](#).
