GENERAL DESCRIPTION:

This course is designed to provide a social issues perspective on Social Psychology, consistent with the widespread applied emphasis in the field. The traditional topics of attitudes, conformity, social judgement, interpersonal attraction, aggression, helping, and groups will be covered. In addition, however, these topics will be applied to various contemporary issues such as rape and pornography, loneliness, the control and prevention of violence, and marriage and divorce.

Program Learning Outcomes

Upon completion of this course, students should be able to:

1. Demonstrate broad knowledge of social determinants of behaviour.
2. Describe and evaluate current theory and research in social psychology.
3. Understand and interpret principles of social psychology in everyday life.
4. Define causes of social behaviour from different perspectives.

LECTURE SCHEDULE AND TOPICS TO BE COVERED:

Preamble. In general, I will not be simply repeating the textbook material in lectures. Rather, I will be elaborating, presenting new material, and applying the topics listed below to various real-world social problems. As well, a series of in-class demonstrations and experiences has been planned for this

Faculty of Health, Department of Psychology, York University
course, in order to help you “experience” Social Psychology in action.

Grading. The course grade will be calculated as follows. 40% will be based upon Test #1, 30% will be based upon Test #2, and 30% will be based upon Test #3. For each test, you will only be responsible for the material covered since the last test, i.e., the tests are NOT cumulative. The format will be announced soon. (Don’t worry, the first test is not until February 9.) The final grade in the course will be determined according to the regulations governing examinations and academic standards – see the York University Undergraduate Calendar for further details

Missed tests

There have been increasing problems with missed tests in the past (particularly with respect to the misuse of the right to write makeup tests), so please read this section carefully. Normally, a student who misses a test or assignment will be scored 0 unless the student was medically unable to write the test.

Important New Information Regarding Missed Tests

For any missed tests or late assignments, students MUST complete the following online form, which will be received and reviewed in the Psychology undergraduate office. [HH PSYC: Missed Tests/Exams Form](#). Failure to complete the form within 48 hours of the original deadline will result in a grade of zero for the test/assignment.
