

**Faculty of Health
Department of Psychology
PSYC 2022A: STATISTICAL METHODS I
In-Person Lecture on Wednesdays 2:30pm-5:20pm
2022 Fall Term
Location: Stedman Lecture Hall D**

Instructor and T.A. Information

Instructor	Cathy (Xijuan) Zhang
Email	xijuan@yorku.ca
Online Office Hour	Monday 4pm-5pm
In-Person Office Hour	Wednesday 5:30pm-6:30pm Behavioral Science Building Room 367

TA	Naomi Martinez Gutierrez
Email	naoming@yorku.ca
Office Hour	By appointments

Course Prerequisite(s): Course prerequisites are strictly enforced

- HH/PSYC 1010 6.00 (Introduction to Psychology), with a minimum grade of C when used as a prerequisite.

Course Credit Exclusions

Please refer to [York Courses Website](#) for a listing of any course credit exclusions.

Course website: [eClass](#)

All course materials will be available on the course eClass site.

Course Description

This course is usually the first course in statistics that most psychology (and other) majors take in university. This class will introduce you to the basic principles underlying statistical analyses in psychology and other social sciences areas. It will also prepare you for future statistics classes which will focus on more advanced techniques. More specifically, this course will introduce you to the type of variables utilized in psychology, two-variable correlation, and comparing two independent or paired-sample means. Null hypothesis significance testing will be introduced, however the focus will be on understanding relationships among variables. Data analysis using statistical software will be carried out with the open-source software R (www.r-project.org).

Program Learning Outcomes

Upon completion of this course, students should be able to:

1. Compute descriptive statistics and inferential statistics.

2. Interpret and report the results of descriptive statistics and inferential statistics.
3. Distinguish between the role of descriptive statistics and inferential statistics.
4. Run simple analyses using the computer programming language *R*.

Topics Covered

- Defining Key Statistical Terms
- Frequency Distributions
- Central Tendency
- Variability
- z-scores/Normal Distribution
- Probability
- Sampling Distribution
- Confidence Intervals
- Power
- Effect Size
- Hypothesis Testing
- Pearson's Correlation
- Chi-square: Goodness of Fit
- Chi-square: Test of Independence
- One-sample *t*-test
- Introduce independent and dependent designs

**Effect size is included as part of all inferential statistics covered in this course.*

Course Notes and Textbooks

Required lecture notes will be posted on [eClass](#).

Required textbook: Navarro (2018): Learning statistics with R: A tutorial for psychology students and other beginners.

- It is an open source textbook that can be downloaded using the link <https://open.umn.edu/opentextbooks/textbooks/559>

Required youtube videos are at the end of the syllabus.

Recommended youtube videos will also be posted on [eClass](#).

Additional Recommended textbook: Illowsky & Daen (2013): Introductory Statistics.

- Also an open source textbook that can be downloaded using the link <https://openstax.org/details/books/introductory-statistics?Book%20details>

Course Requirements and Assessment:

Final grades will be comprised of marks earned on:

- 1) Exams (Midterm: 20%; Final Exam: 30%)
Midterm (Oct 25): All materials up to Oct 25th.

Final Exam (TBA): All course materials will be covered with more emphasis on the second half of the course.

2) Assignments (4 x 10%)

There will be four assignments for the course that will require you to analyze data (including using R) and short answer questions. You will be given the assignments at least one week before they are due.

Assignment Due Dates:

Assignment #1: Oct 2, 2022

Assignment #2: Oct 16, 2022

Assignment #3: Nov 20, 2022

Assignment #4: Dec 4, 2022

You will be deducted 10% (of the 15% allotted to each assignment; i.e., 1.5% of your final grade) for each day (not including weekends) that your assignment is late.

3) In-class participation (10%)

During lectures, I will have iclickers questions. The iclicker questions will be marked based on participation (50%) and correctness (50%). Each student can get 3 weeks of absence without any penalty; that is, if you are sick and can attend the lecture for one week, you can use one of the three weeks and won't lose any marks for the iclicker questions.

3) Bonus (2%)

You can earn up to 2% bonus if you write the assignments using LaTeX on Overleaf.

- 0.5% for each assignment
- Tutorial website: https://www.overleaf.com/learn/latex/Learn_LaTeX_in_30_minutes

Grading as per Senate Policy

The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests* will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 89, B+ = 75 to 79, etc.)

For a full description of York grading system see the York University Undergraduate Calendar - [Grading Scheme for 2020-21](#)

Missed Tests/Midterm Exams/Late Assignment

If you cannot handin the assignment on time, please let me know as soon as possible. I can give a three-day extension without penalty. After the three-day extension, you will lose 10% of the assignment grade for each late day until the release of the answer. Once the answer key is released, you will not be able to submit the assignment for grades.

If you miss the midterm, then the final exam will count 60% of your grade.

Add/Drop Deadlines

For a list of all important dates please refer to: <https://registrar.yorku.ca/enrol/dates/fw21>

Last date to add a course without permission of instructor	Sept 20
Last date to add a course with permission of instructor	Oct 4
Last date to drop course without receiving a grade	Nov 11
Course Withdrawal Period (withdraw from course and receive a “W” on transcript – see Add and Drop Deadline Information below)	Nov 12 – Dec 7

Add and Drop Deadline Information

There are deadlines for adding and dropping courses, both academic and financial. Since, for the most part, the dates are **different**, be sure to read the information carefully so that you understand the differences between the sessional dates below and the [Refund Tables](#).

You are strongly advised to pay close attention to the "Last date to enrol without permission of course instructor" deadlines. These deadlines represent the last date students have unrestricted access to the registration and enrolment system.

After that date, you must contact the professor/department offering the course to arrange permission.

You can drop courses using the registration and enrolment system up until the last date to drop a course without receiving a grade (drop deadline).

You may [withdraw from a course](#) using the registration and enrolment system after the drop deadline until the last day of class for the term associated with the course. When you withdraw from a course, the course remains on your transcript without a grade and is notated as 'W'. The withdrawal will not affect your grade point average or count towards the credits required for your degree.

Electronic Device Policy

This course will be delivered in an online format and therefore electronic devices (e.g., tablets, laptops) are permitted during class time for course-related purposes. It is expected that you would complete tests/exams in a manner that does not require consulting an unauthorised source during an examination unless the tests/exams are open-book.

Academic Integrity for Students

York University takes academic integrity very seriously; please familiarize yourself with [Information about the Senate Policy on Academic Honesty](#).

It is recommended that you review Academic Integrity by completing the [Academic Integrity Tutorial](#) and [Academic Honesty Quiz](#)

Test Banks

The offering for sale of, buying of, and attempting to sell or buy test banks (banks of test questions and/or answers), or any course specific test questions/answers is not permitted in the Faculty of Health. Any student found to be doing this may be considered to have breached the Senate Policy on Academic Honesty. In particular, buying and attempting to sell banks of test

questions and/or answers may be considered as “Cheating in an attempt to gain an improper advantage in an academic evaluation” (article 2.1.1 from the Senate Policy) and/or “encouraging, enabling or causing others” (article 2.1.10 from the Senate Policy) to cheat.

Academic Accommodation for Students with Disabilities

While all individuals are expected to satisfy the requirements of their program of study and to aspire to do so at a level of excellence, the university recognizes that persons with disabilities may require reasonable accommodation to enable them to do so. The university encourages students with disabilities to register with Student Accessibility Services (SAS) to discuss their accommodation needs as early as possible in the term to establish the recommended academic accommodations that will be communicated to Course Directors as necessary. Please let me know as early as possible in the term if you anticipate requiring academic accommodation so that we can discuss how to consider your accommodation needs within the context of this course. <https://accessibility.students.yorku.ca/>

Excerpt from Senate Policy on Academic Accommodation for Students with Disabilities

1. Pursuant to its commitment to sustaining an inclusive, equitable community in which all members are treated with respect and dignity, and consistent with applicable accessibility legislation, York University shall make reasonable and appropriate accommodations in order to promote the ability of students with disabilities to fulfill the academic requirements of their programs. This policy aims to eliminate systemic barriers to participation in academic activities by students with disabilities.

All students are expected to satisfy the essential learning outcomes of courses. Accommodations shall be consistent with, support and preserve the academic integrity of the curriculum and the academic standards of courses and programs. For further information please refer to: [York University Academic Accommodation for Students with Disabilities Policy](#).

Course Materials Copyright Information

These course materials are designed for use as part of the PSYC 2021C course at York University and are the property of the instructor unless otherwise stated. Third party copyrighted materials (such as book chapters, journal articles, music, videos, etc.) have either been licensed for use in this course or fall under an exception or limitation in Canadian Copyright law. Copying this material for distribution (e.g. uploading material to a commercial third-party website) may lead to a violation of Copyright law. [Intellectual Property Rights Statement](#).

Calumet and Stong Colleges’ Student Success Programming:

[Calumet](#) and [Stong](#) Colleges aim to support the success of Faculty of Health students through a variety of **free programs** throughout their university career:

- [Orientation](#) helps new students transition into university, discover campus resources, and establish social and academic networks.
- [Peer Mentoring](#) connects well-trained upper-year students with first year and transfer students to help them transition into university.

- [Course Representative Program](#) supports the academic success and resourcefulness of students in core program courses through in-class announcements.
- [Peer-Assisted Study Sessions \(PASS\)](#) involve upper-level academically successful and well-trained students who facilitate study sessions in courses that are historically challenging.
- [Peer Tutoring](#) offers one-on-one academic support by well-trained Peer Tutors.
- Please connect with your Course Director about any specific academic resources for this class.
- Calumet and Stong Colleges also support students' [Health & Wellness](#), [leadership and professional skills development](#), [student/community engagement and wellbeing](#), [Career Exploration](#), [Indigenous Circle](#), [awards and recognition](#), and [provide opportunities to students to work or volunteer](#).
- For additional resources/information about Calumet and Stong Colleges' Student Success Programs, please consult our websites ([Calumet College](#); [Stong College](#)), email scchelp@yorku.ca, and/or follow us on Instagram ([Calumet College](#); [Stong College](#)), Facebook ([Calumet College](#); [Stong College](#)) and [LinkedIn](#).
- Are you receiving our weekly email (Subject: "Calumet and Stong Colleges - Upcoming events")? If not, please check your Inbox and Junk folders, and if it's not there then please contact ccscadmn@yorku.ca, and request to be added to the listserv. Also, make sure to add your 'preferred email' to your [Passport York personal profile](#) to make sure you receive important news and information.

Course Schedule

The schedule is subject to change depending on the pace of the lectures.
