Instructor and T.A. Information
Instructor: Ji Yeh Choi, PhD
Office: BSB 331
Office Hours: by appointment
Email: jychoi@yorku.ca Be sure to include PSYC2021 in the subject line

Please note that it may take the instructor and TAs up to 3 business days to respond to your emails. If you send us an email over the weekend please do not expect a response until the normal work week (Monday – Friday) unless otherwise stated by a member of the teaching team or it is an urgent matter.

Course Prerequisite(s): Course prerequisites or co-requisite are strictly enforced
- HH/PSYC 1010 6.00 (Introduction to Psychology)

Course Credit Exclusions
Please refer to York Courses Website for a listing of any course credit exclusions.

Course website: eClass

Course Description
Statistics are central to research in many fields of social sciences, including psychology. This course will introduce the basic concepts of statistical methods for the analysis of data obtained from experimental designs and other research studies. The course is hands-on, methodologically oriented. The course does not emphasize mathematics; they will be some calculations involved, but these require nothing more than elementary algebra. Instead, the focus will be on gaining a greater understanding of the statistical methods used by researchers in the social sciences, in addition to the appropriate use and interpretation of statistical results.

Calculator: You may need a calculator for in-class exercise activities and assignments.

Program Learning Outcomes
Upon completion of this course, students should be able to:
2. Interpret and report the results of descriptive statistics and inferential statistics.
3. Distinguish between the role of descriptive statistics and inferential statistics.
4. Interpret and report the results of inferential statistics for univariate linear models.
5. Recognize the limits of inferential statistics.
Topics Covered

- Introduction to Statistics and Data Analysis
- Descriptive Statistics: Measures of Central Tendency and Variability
- Graphical Representation of Data
- Probability and Probability Distributions
- z-Scores/Normal Distribution
- Sampling and Sampling Distribution
- Confidence Intervals
- Power
- Effect Size
- Hypothesis Testing: Concepts and procedures
- Correlation
- One-Sample and Two-Sample t-tests

Specific Learning Objectives

1. Introduce fundamental concepts of descriptive and inferential statistics
2. Identify different scales of measurement
3. Demonstrate the ability to summarize, organize, and present the essential features of data numerically and graphically
4. Identify the differences between descriptive and inferential statistics (e.g., summarize sample data vs. use sample data to make inferences about the population)
5. Demonstrate the ability to generate statistical hypothesis (i.e., null and alternative) that are applicable to various research situations
6. Identify the various research designs that address different types of questions and hypothesis.
7. Articulate strength and limitations of various research designs.
8. Demonstrate the ability to perform the correct statistical analysis procedures, either by hand (for basic statistics) or using a computer software program.
9. Draw conclusions and write up the results in APA style based on the analysis.

Recommended Text

There are no textbooks required for the course. Nonetheless, the listed book above will be useful to facilitate an understanding of many topics/problems discussed in the class.

Description of Assignments

**Individual Assignments:** There will be two individual assignments (Nov 18 and Jan 27) each of which worth 10%. They will consist mainly of short problems. **Assignments must be done independently.** Students are required to submit all assignments at the beginning of each class on assignment due date. No electronic submission of assignments will be permitted. Incomplete and late submissions will be penalized, and submissions more than one day late will not be accepted.

**Tests/Final exam:** There will be three in-class tests and a final exam. As the nature of statistics is cumulative, the tests/exam will be as well. However, there will be a focus on the most recently learned materials. They will cover the materials from lectures, readings, and assignments. There will be some calculations required, so you will be permitted to use a calculator (Note that electronic devices other than a simple calculator will not be an acceptable replacement). The format of the tests will be a mix of multiple-choice and short-answer questions. For short-answer questions, all work must be shown for evaluation.

**Tests:** For the dates, please refer to the course schedule below.

**Final Exam:** The time and location will be announced in due course.

**Grading as per Senate Policy**

The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests* will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 89, B+ = 75 to 79, etc.)

For a full description of York grading system see the York University Undergraduate Calendar - Grading Scheme for 2023-24

**Missed Tests/Midterm Exams/Late Assignment:**

For any missed tests, midterm exam or late assignments, students MUST complete the following online form which will be received and reviewed in the Psychology undergraduate office.

**HH PSYC: Missed Tests/Exams Form.** Failure to complete the form within 48 hours of the original deadline will result in a grade of zero for the missed tests, midterm exam or late assignments.
In addition, to the online form, students documented reason for a missed tests, midterm exam or late assignments such as illness, compassionate grounds, etc., MUST submit official documentation (e.g. Attending Physician Statement).

Upon completion of the online form and after receipt of your supporting documentation you will have two options:

(1) **one opportunity** to write a make-up test (this will be scheduled at a day and time to be announced by the instructor and may take a different form from the original test)**

**OR**

(2) opt to have the weight of the missed test added to your cumulative final exam

**Note: Option 2 will take immediate effect provided the appropriate notification and documentation were received.

Missed Final Exam: If you miss your final exam please also complete the online form **within 48 hours of the missed exam** and provide formal documentation (i.e., Attending Physician Statement and Final Exam Deferred Standing Agreement Form) **within 7 days of the missed final exam**.

Add/Drop Deadlines

For a list of all important dates please refer to: [Fall/Winter 2023-24 - Important Dates](#)

<table>
<thead>
<tr>

<table>
<thead>
<tr>
<th>Course Withdrawal Period (withdraw from a course and receive a grade of “W” on transcript – see note below)</th>
<th>FALL (F)</th>
<th>YEAR (Y)</th>
<th>WINTER (W)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Nov. 9 - Dec. 5</td>
<td>Feb. 9 - Apr. 8</td>
<td>March 12 - Apr. 8</td>
</tr>
</tbody>
</table>

*Note: You may withdraw from a course using the registration and enrolment system after the drop deadline until the last day of class for the term associated with the course. When you withdraw from a course, the course remains on your transcript without a grade and is notated as “W”. The withdrawal will not affect your grade point average or count towards the credits required for your degree.

Information on Plagiarism Detection

Turnitin will be used to detect any evidence of plagiarism.

Electronic Device Policy

In class, students can use an electronic device (e.g., tablets, laptops) for course-related purposes.

Electronic mobile devices of any kind are not allowed during a test or examination. Students are required to turn off and secure any electronic mobile device in their bag which is to be
placed under the chair while a test/exam is in progress. Any student observed with an electronic device during a test/exam may be reported to the Undergraduate Office for a potential breach of Academic Honesty.

**Attendance Policy**

Students are expected to attend all classes as weekly class activities builds on the previous week’s material.

**Academic Integrity for Students**

York University takes academic integrity very seriously; please familiarize yourself with Information about the Senate Policy on Academic Honesty.

It is recommended that you review Academic Integrity information SPARK Academic Integrity modules. These modules explain principles of academic honesty.

**Test Banks**

The offering for sale of, buying of, and attempting to sell or buy test banks (banks of test questions and/or answers), or any course specific test questions/answers is not permitted in the Faculty of Health. Any student found to be doing this may be considered to have breached the Senate Policy on Academic Honesty. In particular, buying and attempting to sell banks of test questions and/or answers may be considered as “Cheating in an attempt to gain an improper advantage in an academic evaluation” (article 2.1.1 from the Senate Policy) and/or “encouraging, enabling or causing others” (article 2.1.10 from the Senate Policy) to cheat.

**Electronic Devices During a Test/Examination**

Electronic mobile devices of any kind are not allowed during a test or examination. Students are required to turn off and secure any electronic mobile device in their bag which is to be placed under the chair while a test/exam is in progress. Any student observed with an electronic device during a test/exam may be reported to the Undergraduate Office for a potential breach of Academic Honesty.

**Academic Accommodation for Students with Disabilities**

While all individuals are expected to satisfy the requirements of their program of study and to aspire to do so at a level of excellence, the university recognizes that persons with disabilities may require reasonable accommodation to enable them to do so. The York University Accessibility Hub is your online stop for accessibility on campus. The Accessibility Hub provides tools, assistance and resources. Policy Statement.

**Policy:** York University shall make reasonable and appropriate accommodations and adaptations in order to promote the ability of students with disabilities to fulfill the academic requirements of their programs.

The nature and extent of accommodations shall be consistent with and supportive of the integrity of the curriculum and of the academic standards of programs or courses. Provided that students have given sufficient notice about their accommodation needs, instructors shall take reasonable steps to accommodate these needs in a manner consistent with the guidelines established hereunder.
For Further Information please refer to: York university academic accommodation for students with disabilities policy.
