When emailing the teaching team, please include PSYC2140 in the subject line and your full name in the email. Emails will typically be responded to within 2 business days and within standard work hours.

Course Prerequisite(s): HH/PSYC 1010 6.00

Course Credit Exclusions
Please refer to York Courses Website for a listing of any course credit exclusions.

Course website: eClass

All course materials will be available through eClass. This includes important details about the course format and schedule, quizzes, question/discussion boards, required readings, and assignment instructions and their evaluation criteria and submission links. Important communications from instructor to students will be sent through eClass’s Course Announcements. It is essential that you check eClass regularly in order to be successful in this course.

Course Description
Clinical Psychology for the 21st Century introduces students to the theories and practices of clinical psychology from evidence-based, critical, developmental contextual and social determinants of health perspectives. Students will learn about:
1) different types and modalities of applied psychology practice;
2) individual, group and population-based interventions with adults, couples, children, adolescents and the elderly;
3) mental health assessment practices;
4) risk factors for psychological distress and prevention;
5) research methods in clinical psychology;
6) the broader legal, ethical and regulatory context of mental health professions and professional practice.

Broader systemic, cultural and structural considerations with respect to assessment and treatment of psychological distress and illness will be integrated throughout. Critical consideration will be given to clinical psychology’s relationship to marginalized populations.

The course will also introduce students to a range of mental health professions and encourage them to consider concrete steps toward gaining experiences relevant to a mental health profession of interest, including course selection, extra-curricular, and volunteer activities.

**Program Learning Outcomes**

Upon completion of this course, students should be able to:

1. Describe common clinical psychology interventions for different populations (e.g., children, adults, couples, and families).
2. Identify how clinical psychology can intervene at different levels (e.g., individual, community, institutions/policy).
3. Appreciate the intersection between broader systemic, cultural and structural considerations and clinical psychological services.
4. Express psychological knowledge of clinical psychology in oral and written form.
5. Understand different pathways to mental health work.

**Specific Learning Objectives**

1. Articulate the individual, interpersonal, and societal predictors of mental health in the Canadian context.
2. Describe common practices in psychological assessment.
3. Explain the role of the clinical psychologist in providing mental health treatment for individuals and groups; and in designing large scale programs to foster mental health.
4. Identify pathways to mental health work, and articulate the differences between professions in this field (e.g., registered psychotherapist, social worker, clinical psychologist, behaviour analyst, addictions counsellor).
5. Recognize and critically analyze the impact of identity and social location upon both mental health workers and clients.
6. Develop an individualized, realistic plan to access relevant experiences (volunteer, paid, personal, educational) leading to a career in a mental health field of interest.
7. Describe how clinical psychology research is conducted and elaborate on the discipline’s evidentiary basis.

Required Readings

All readings will be made available on eClass through links and/or downloadable files. There is no textbook for this course. You are responsible for checking the Course Schedule and/or eClass and staying up to date with the readings each week.

Description of Assignments

Syllabus Quiz (1% of course grade)
This is a short assessment designed to ensure we are all on the same page about course policies. It will also give you a chance to familiarize yourself with completing quizzes in eClass and to sort out any technical issues that may arise. The quiz will be available beginning on the first day of class and is due by the end of day on the second class (January 18 11:59 PM; no further extensions beyond this date). You must answer all questions correctly to receive credit, and you can attempt the quiz as many times as needed.

Weekly Quizzes (10% of course grade)
There will be a short quiz most weeks to be completed online through eClass. Your best 8 quizzes will be used to calculate your final grade. The weekly quiz will be available at the end of class (Thursday) and is to be completed the same day; however, it will remain open for submissions each week until end-of-day on Sunday (11:59 PM). There will be no further extensions for quiz submissions.

Midterm Assignment (29% of course grade)
In this 500-word paper, please identify your preferred mental health career and articulate necessary educational and extracurricular requirements and experiences you will need to accrue to work towards joining this profession. If your chosen career is not in the mental health field, please also articulate how coursework related to mental health will help prepare you for your chosen career. Detailed instructions and a grading rubric will be posted on eClass.
**Final Assignment (30% of course grade)**
Describe a clinical psychology intervention at the individual or community level in Ontario and discuss how this intervention addresses or does not address the needs of a particular marginalized population. Detailed instructions and a grading rubric will be posted on eClass.

Your assignment can be in one of the following formats:

1. A 500-word paper
2. A 3-minute recorded video
3. A series of infographics

**Final Exam (30% of course grade)**
The final exam will consist of multiple choice and short answer questions and will be held during the final exam period. Questions will be distributed approximately equally over the course topics.

**Assignment Submission**
All assignments will be submitted through eClass. The submission deadline is 11:59PM on the due date specified in the Course Schedule. Please see the section on Late Assignments for more details.

**Class Format and Attendance Policy**
This class is offered in person. Attendance is not taken; however, material will be discussed in class that may not be in the readings or slides and that will appear on the final exam. In addition, classes will include activities and discussion, as well as opportunities for support from the course instructor; therefore, regular attendance is strongly encouraged to facilitate your learning. Of course, unexpected illness or other situations may come up from time to time; should that be the case, please connect with a classmate to find out about content you may have missed.

**Grading as per Senate Policy**
The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests* will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 89, B+ = 75 to 79, etc.).

For a full description of York grading system see the York University Undergraduate Calendar – *Grading Scheme for 2023-24*

**Late Weekly Quizzes**
The submission process for weekly quizzes is based on universal design principles. Students who need flexibility with deadlines can self-accommodate without making any special arrangements. Weekly quizzes are due the same day by 11:59 PM; however, they can be
submitted up until Sunday at 11:59 PM. Students can also completely miss up to 2 weekly quizzes (but not the Syllabus Quiz) without penalty because only your best 8 weekly quiz marks count toward your final grade. As a result, there will be no additional extensions granted for quiz submissions.

**Late Assignments**

The submission process for assignments is also based on universal design principles. Students who need flexibility with deadlines can self-accommodate without making any special arrangements. Students are granted an automatic 1-week extension on all assignments. You do not need to request this extension, and you can use the 1-week extension on either/both assignments, as you choose. Submissions after the due date are late; however, they will be accepted at no penalty up until the extension end date (i.e., 1 week after the original due date). No submission of any kind, for any reason, will be accepted any amount of time after the extension end date. Any assignment submitted after the 1 week extension will receive a zero.

**Missed Exams**

Missed exams are different than late or missed assignments and quizzes. For any missed exam, students MUST complete the following online form, which will be received and reviewed in the Psychology undergraduate office. At this time, an Attending Physician’s Statement (APS) is not required; however, a reason for missing an evaluated component in the course must be provided. HH PSYC: Missed Midterm/Exam/Assignment Request. Failure to complete the form within 48 hours of the original deadline will result in a grade of zero for the missed exam (i.e., you have up to 48 hours after the exam begins to submit this form). Any accommodations made will be at the discretion of the instructor.

**Add/Drop Deadlines**

Add and Drop Deadline Information
There are deadlines for adding and dropping courses, both academic and financial. Since, for the most part, the dates are different, be sure to read the information carefully so that you understand the differences between the sesional dates below and the Refund Tables.

You are strongly advised to pay close attention to the "Last date to enrol without permission of course instructor" deadlines. These deadlines represent the last date students have unrestricted access to the registration and enrolment system. After that date, you must contact the professor/department offering the course to arrange permission.

You can drop courses using the registration and enrolment system up until the last date to drop a course without receiving a grade (drop deadline).

You may withdraw from a course using the registration and enrolment system after the drop deadline until the last day of class for the term associated with the course. When you withdraw from a course, the course remains on your transcript without a grade and is notated as 'W'. The withdrawal will not affect your grade point average or count towards the credits required for your degree.

Information on Plagiarism Detection
Turnitin software will be used to detect plagiarism on all written assignments.

Electronic Device Policy
Electronic devices are permitted in class for use that supports your learning.

Academic Integrity for Students
York University takes academic integrity very seriously; please familiarize yourself with Information about the Senate Policy on Academic Honesty.

It is recommended that you review Academic Integrity by completing the Academic Integrity Tutorial and Academic Honesty Quiz.

Artificial Intelligence (AI)
According to York’s Senate Policy on Academic Honesty, using AI apps such as such as ChatGPT, GPT-3, DALL-E, among others to complete academic work without your instructor’s knowledge or permission, is considered to be a breach of academic honesty. More specifically, using text-generating tools (such as ChatGPT) would be considered to be cheating (Senate Policy, section 2.1.1) and using image generating tools (such as DALL-E) would be considered to be plagiarism (Senate Policy, section 2.1.3).

Submitting AI-generated text as part or all of an assignment is not permitted in this course and will be considered a breach of academic honesty.

Additionally, you are encouraged to keep all of your research notes and draft versions of your work. You may be asked to present these if it is suspected that an AI application was used to
help complete your work. These drafts can be used to show how this work developed, and to provide evidence that the work is your own.

Test Banks
The offering for sale of, buying of, and attempting to sell or buy test banks (banks of test questions and/or answers), or any course specific test questions/answers is not permitted in the Faculty of Health. Any student found to be doing this may be considered to have breached the Senate Policy on Academic Honesty. In particular, buying and attempting to sell banks of test questions and/or answers may be considered as “Cheating in an attempt to gain an improper advantage in an academic evaluation” (article 2.1.1 from the Senate Policy) and/or “encouraging, enabling or causing others” (article 2.1.10 from the Senate Policy) to cheat.

Academic Accommodation for Students with Disabilities
While all individuals are expected to satisfy the requirements of their program of study and to aspire to do so at a level of excellence, the university recognizes that persons with disabilities may require reasonable accommodation to enable them to do so. The university encourages students with disabilities to register with Student Accessibility Services (SAS) to discuss their accommodation needs as early as possible in the term to establish the recommended academic accommodations that will be communicated to Course Directors as necessary. Please let me know as early as possible in the term if you anticipate requiring academic accommodation so that we can discuss how to consider your accommodation needs within the context of this course. [https://accessibility.students.yorku.ca](https://accessibility.students.yorku.ca)

Excerpt from Senate Policy on Academic Accommodation for Students with Disabilities

1. Pursuant to its commitment to sustaining an inclusive, equitable community in which all members are treated with respect and dignity, and consistent with applicable accessibility legislation, York University shall make reasonable and appropriate accommodations in order to promote the ability of students with disabilities to fulfill the academic requirements of their programs. This policy aims to eliminate systemic barriers to participation in academic activities by students with disabilities.

All students are expected to satisfy the essential learning outcomes of courses. Accommodations shall be consistent with, support and preserve the academic integrity of the curriculum and the academic standards of courses and programs. For further information please refer to: York University Academic Accommodation for Students with Disabilities Policy.

Course Materials Intellectual Property and Copyright Information
The course materials are designed for use as part of the PSYC 2140 course at York University and are the property of the instructor unless otherwise stated. Third party copyrighted materials (such as book chapters, journal articles, music, videos, etc.) have either been licensed for use in this course or fall under an exception or limitation in Canadian Copyright law.

Copying this material for distribution (e.g. uploading material to a commercial third-party website) or otherwise publishing, selling, or distributing it may lead to a charge of misconduct under York’s Code of Student Rights and Responsibilities and the Senate Policy on Academic
**Honesty** and/or legal consequences for violation of copyright law if copyright law has been violated.
