

Faculty of Health
Department of Psychology
PSYC 2022 3.0 A: STATISTICAL METHODS II
Monday/ 2:30pm – 5:30pm/ VH B
Fall/2023

We will meet in person every Monday at 2:30pm. Each class will involve a lecture followed by demonstrations/activities to aid in your understanding of the concepts covered in the lecture. Lecture attendance is strongly encouraged as material will expand upon the slides provided and demonstrations will be valuable to understanding course material and statistical software.

Instructor and T.A. Information

Instructor: Rachel Rabi, PhD

Office Hours: By appointment only (Office: BSB 220)

Email: rrabi2@yorku.ca (when sending an email please include PSYC 2022A in the subject line and your full name and student number in the signature of the message).

	[Students with Last Name A-L]	[Students with Last Name M-Z]
T.A.	Ricky Chow	Gabriel Crone
Email	chowrk@yorku.ca	gc2001@yorku.ca
Office Hours	By appointment	By appointment

Please note that it may take the instructor and TAs up to 3 business days to respond to your emails. If you send us an email over the weekend please do not expect a response until the normal work week (Monday – Friday) unless otherwise stated by a member of the teaching team or it is an urgent matter.

Course Prerequisite(s): Course prerequisites are strictly enforced.

- HH/PSYC 2021 3.00 (Statistical Methods I)

Course Prerequisite or corequisite(s):

- HH/PSYC 1010 6.00 (Introduction to Psychology).

Course Credit Exclusions

Please refer to [York Courses Website](#) for a listing of any course credit exclusions.

Course website: [eClass](#)

All course materials will be available on the course eClass site, unless otherwise indicated by the instructor. The site will be your central access point for course materials. **Note: Please do not send the teaching team messages through the chat on eClass.**

Course Description

A continuation of the study of fundamental concepts and techniques of descriptive and inferential statistics. Topics include t-tests (for independent and related measures), analysis of variance (ANOVA), correlation, regression, and non-parametric statistics.

Program Learning Outcomes

Upon completion of this course, students should be able to:

1. Compute inferential statistics for univariate linear models (ANOVA, regression).
2. Interpret and report the results of inferential statistics for univariate linear models.
3. Recognize the limits of inferential statistics.

Topics Covered

- Review of basic statistical concepts
- Independent samples t-test
- Dependent samples t-test
- One-way Independent Groups ANOVA (with contrasts)
- Two-way Independent Groups ANOVA (with interaction and contrasts)
- One-way Repeated Measures ANOVA (with contrasts)
- Correlation (including partial correlation)
- Simple Regression
- Multiple Regression (optional)

**Effect size is included as part of all inferential statistics covered in this course.*

Specific Learning Objectives

- Demonstrate a deeper understanding of the statistical concepts reviewed and extended in this course
- Identify and apply appropriate statistical analysis(es) to address specific research question(s) and/or hypotheses
- Demonstrate the ability to compute univariate inferential statistics (where necessary for conceptual understanding)
- Interpret and report the results of statistical analyses from statistical software, in APA format for various research situations
- Identify limits of conclusions based on inferential statistics (e.g., statistical vs. practical significance)

Required Software

Students are **required** to download the “solid” version of jamovi (version 2.3.28) from www.jamovi.org. This software is required for students to complete activities and assignments in the course. Students are advised to download this software as soon as possible to be prepared for the start of the course.

Required Text

- Gravetter, F. J., & Wallnau, L. B. (2017). *Statistics for the Behavioral Sciences* (10th ed.). Boston, MA: Cengage Learning.
- MindTap is not required for this course (however students may find this resource helpful to review weekly statistical concepts)

Optional Text/Resources

If you use one of these books/resources, keep in mind that all Tests and Assignments will be evaluated based on the content delivered through lectures, not content of the texts (they are just there for additional optional support).

- Howell, D. C. (2016). *Fundamental Statistics for the Behavioral Sciences* (9th ed.). Wadsworth Publishing, Cengage Learning.
- <https://open.umn.edu/opentextbooks/textbooks/an-introduction-to-psychological-statistics> [FREE]
- Navarro, D. J., & Foxcroft, D. R. (2022). *Learning Statistics with jamovi: A Tutorial for Psychology Students and Other Beginners*. [FREE]
<https://www.learnstatswithjamovi.com/>

Course Requirements and Assessment:

Assessment	Date of Evaluation (if known)	Weighting
Test 1 (in-person)	October 30, 2023	26%
Test 2 (in-person)	TBA - Final Exam Period (Dec. 7-20)	26%
Assignment 1	October 16, 2023 (+ 3 day grace period)	12%
Assignment 2	November 13, 2023 (+ 3 day grace period)	12%
Assignment 3	November 20, 2023 (+ 3 day grace period)	12%
Assignment 4	December 4, 2023 (+ 3 day grace period)	12%
Total		100%

Description of Assessments (see also “*Missed Tests and Late Assignments*” below)

Tests

Students will complete **two tests** in this course. The tests will be **non-cumulative** and will cover material from lectures, readings, and class & assignment activities. The format of the tests may be a mix of multiple-choice and open-ended/short-answer questions. More information about the content, format, location, and length of the test will be provided prior to its administration.

Assignments

Students will complete four assignments in this course. The purpose of the assignments is to evaluate your conceptual understanding of the material covered in class, to demonstrate that you can perform the types of analyses covered in this course and that you can interpret/report

the results. **Assignments will be completed outside the normal class time and students are expected to complete their assignments individually.**

You will be given **two weeks to complete assignment 1** (allowing you extra time to familiarize yourself with jamovi for those new to the software), and **one week to complete assignments 2, 3, and 4.** More information will be provided in the “Assignments” folder in eClass.

Assignment Due Dates:

Assignment #1: October 16, 2023

Assignment #2: November 13, 2023

Assignment #3: November 20, 2023

Assignment #4: December 4, 2023

Class Format and Attendance Policy

Students are strongly encouraged to attend the class sessions as the material covered in the course in a given week build on the previous week’s material and enhances your overall learning experience. These sessions will also help you to stay on track with the course material.

Grading as per Senate Policy

The grading scheme for the course conforms to the 9-point grading system used in undergraduate programs at York (e.g., A+ = 9, A = 8, B+ = 7, C+ = 5, etc.). Assignments and tests* will bear either a letter grade designation or a corresponding number grade (e.g. A+ = 90 to 100, A = 80 to 89, B+ = 75 to 79, etc.)

For a full description of York grading system see the York University Undergraduate Calendar – [Grading Scheme for 2023-24](#)

Missed Tests/Late Assignment

Missed Test: For any missed test, students MUST complete the following online form which will be received and reviewed in the Psychology undergraduate office. Please include Dr. Rabi’s email (rrabi2@yorku.ca) when filling out this form. At this time, due to COVID-19, an Attending Physician’s Statement (APS) is not required, **however, a reason for missing an evaluated component in the course must be provided.**

[HH PSYC: Missed Tests/Exams Form](#). Failure to complete the form within 48 hours of the original deadline will result in a grade of zero for the missed test. Once you have notified us about your missed test, a member of the teaching team will be in contact with you to schedule a make-up. **There is only one opportunity to write a make-up test. Please note that assignments cannot be used as a substitute for a missed test.**

Late Assignments: All assignments have a 3-day grace period (self-granted extensions) where students can submit after the deadline at no penalty. Assignments submitted beyond this 3-day grace period will receive a 10% per day penalty up to a total of 2 days (48 hours), after which no assignment will be accepted. To be clear, no assignments will be accepted 5 days beyond their original due date; assignments more than 5 days late will receive a grade of 0.

For ease of reference, here are the Assignment due dates & grace-periods:

Assignment 1: The deadline for Assignment 1 is October 16th at 11:59pm. If additional time is needed (due to falling behind in the course, having a lot of deadlines around the assignment time, etc.), students can submit Assignment 1 with no late penalty until October 19th at 11:59pm. Assignments submitted October 20th or October 21st will receive a 10% per day late penalty (e.g., 10%, 20%, respectively). If a student has not submitted Assignment 1 by October 21st at 11:59pm they will receive a grade of 0.

Assignment 2: The deadline for Assignment 2 is November 13th at 11:59pm. If additional time is needed, students can utilize the 3-day grace period and submit Assignment 2 with no late penalty until November 16th at 11:59pm. Assignments submitted November 17th or November 18th will receive a 10% per day late penalty (e.g., 10%, 20%, respectively). If a student has not submitted Assignment 2 by November 18th at 11:59pm they will receive a grade of 0.

Assignment 3: The deadline for Assignment 3 is November 20th at 11:59pm. If additional time is needed, students can utilize the 3-day grace period and submit Assignment 3 with no late penalty until November 23rd at 11:59pm. Assignments submitted November 24th or November 25th will receive a 10% per day late penalty (e.g., 10%, 20%, respectively). If a student has not submitted Assignment 3 by November 25th at 11:59pm they will receive a grade of 0.

Assignment 4: The deadline for Assignment 4 is December 4th at 11:59pm. If additional time is needed, students can utilize the 3-day grace period and submit Assignment 4 with no late penalty until December 7th at 11:59pm. Assignments submitted December 8th or December 9th will receive a 10% per day late penalty (e.g., 10%, 20%, respectively). If a student has not submitted Assignment 4 by December 9th at 11:59pm they will receive a grade of 0.

Instructor-granted extensions are only given in exceptional circumstances – should you think you have such a circumstance please email the instructor as soon as possible (**and prior to the assignment deadline**) to discuss.

Please note that a test cannot be used as a substitute for an assignment.

Add/Drop Deadlines

For a list of all important dates please refer to [Undergraduate Fall/Winter 2023-2024 Important Dates](#)

	Fall (Term F)	Year (Term Y)	Winter (Term W)
Last date to add a course without permission of instructor (also see Financial Deadlines)	September 20	September 20	January 22
Last date to add a course with permission of instructor (also see Financial Deadlines)	September 28	September 28	January 31
Drop deadline: Last date to drop a course without receiving a grade (also see Financial Deadlines)	November 8	February 8	March 11
Course Withdrawal Period (withdraw from a course and receive a grade of "W" on transcript – see note below)	November 9 – December 5	February 9- April 8	March 12- April 8

Add and Drop Deadline Information

There are deadlines for adding and dropping courses, both academic and financial. Since, for the most part, the dates are **different**, be sure to read the information carefully so that you understand the differences between the sessional dates below and the [Refund Tables](#).

You are strongly advised to pay close attention to the "Last date to enrol without permission of course instructor" deadlines. These deadlines represent the last date students have unrestricted access to the registration and enrolment system.

After that date, you must contact the professor/department offering the course to arrange permission.

You can drop courses using the registration and enrolment system up until the last date to drop a course without receiving a grade (drop deadline).

You may [withdraw from a course](#) using the registration and enrolment system after the drop deadline until the last day of class for the term associated with the course. When you withdraw from a course, the course remains on your transcript without a grade and is notated as 'W'. The withdrawal will not affect your grade point average or count towards the credits required for your degree.

Electronic Device Policy

Electronic devices (e.g., tablets, laptops) are permitted during class time for course-related purposes. Electronic mobile devices of any kind are not allowed during a test. Students are required to turn off and secure any electronic mobile device in their bag which is to be placed under the chair while a test/exam is in progress. Any student observed with an electronic device during a test/exam may be reported to the Undergraduate Office for a potential breach of Academic Honesty. A **non-programmable calculator** is permitted during tests.

Academic Integrity for Students

York University takes academic integrity very seriously; please familiarize yourself with [Information about the Senate Policy on Academic Honesty](#).

It is recommended that you review Academic Integrity by completing the [Academic Integrity Tutorial](#) and [Academic Honesty Quiz](#)

Test Banks

The offering for sale of, buying of, and attempting to sell or buy test banks (banks of test questions and/or answers), or any course specific test questions/answers is not permitted in the Faculty of Health. Any student found to be doing this may be considered to have breached the Senate Policy on Academic Honesty. In particular, buying and attempting to sell banks of test questions and/or answers may be considered as “Cheating in an attempt to gain an improper advantage in an academic evaluation” (article 2.1.1 from the Senate Policy) and/or “encouraging, enabling or causing others” (article 2.1.10 from the Senate Policy) to cheat.

Academic Accommodation for Students with Disabilities

While all individuals are expected to satisfy the requirements of their program of study and to aspire to do so at a level of excellence, the university recognizes that persons with disabilities may require reasonable accommodation to enable them to do so. The university encourages students with disabilities to register with Student Accessibility Services (SAS) to discuss their accommodation needs as early as possible in the term to establish the recommended academic accommodations that will be communicated to Course Directors as necessary. Please let me know as early as possible in the term if you anticipate requiring academic accommodation so that we can discuss how to consider your accommodation needs within the context of this course.

<https://accessibility.students.yorku.ca/>

Excerpt from Senate Policy on Academic Accommodation for Students with Disabilities

1. Pursuant to its commitment to sustaining an inclusive, equitable community in which all members are treated with respect and dignity, and consistent with applicable accessibility legislation, York University shall make reasonable and appropriate accommodations in order to promote the ability of students with disabilities to fulfill the academic requirements of their programs. This policy aims to eliminate systemic barriers to participation in academic activities by students with disabilities.

All students are expected to satisfy the essential learning outcomes of courses. Accommodations shall be consistent with, support and preserve the academic integrity of the curriculum and the academic standards of courses and programs. For further information please refer to: [York University Academic Accommodation for Students with Disabilities Policy](#).

Calumet and Stong Colleges' Student Success Programming

[Calumet](#) and [Stong](#) Colleges aim to support the success of Faculty of Health students through a variety of **free programs** throughout their university career:

- [Orientation](#) helps new students transition into university, discover campus resources, and establish social and academic networks.
- [Peer Mentoring](#) connects well-trained upper-year students with first year and transfer students to help them transition into university.
- [Course Representative Program](#) supports the academic success and resourcefulness of students in core program courses through in-class announcements.
- [Peer-Assisted Study Sessions \(PASS\)](#) involve upper-level academically successful and well-trained students who facilitate study sessions in courses that are historically challenging.
- [Peer Tutoring](#) offers one-on-one academic support by well-trained Peer Tutors.
- Please connect with your Course Director about any specific academic resources for this class.
- Calumet and Stong Colleges also support students' [Health & Wellness](#), [leadership and professional skills development](#), [student/community engagement and wellbeing](#), [Career Exploration](#), [Indigenous Circle](#), [awards and recognition](#), and [provide opportunities to students to work or volunteer](#).
- For additional resources/information about Calumet and Stong Colleges' Student Success Programs, please consult our websites ([Calumet College](#); [Stong College](#)), email scchelp@yorku.ca, and/or follow us on Instagram ([Calumet College](#); [Stong College](#)), Facebook ([Calumet College](#); [Stong College](#)) and [LinkedIn](#).

Are you receiving our weekly email (Subject: "Calumet and Stong Colleges - Upcoming events")? If not, please check your Inbox and Junk folders, and if it's not there then please contact ccscadm@yorku.ca, and request to be added to the listserv. Also, make sure to add your 'preferred email' to your [Passport York personal profile](#) to make sure you receive important news and information.
