

# Sensation & Perception II 3270M - Online

## INSTRUCTOR

Prof. Laurie Wilcox  
Rm. Lassonde Building, B0003H  
email: [lwilcox@yorku.ca](mailto:lwilcox@yorku.ca)  
tel: 66494

Office Hours: By appointment

Course Webpage: The course is hosted on the Web CT site <https://moodle.yorku.ca>

All course information will be posted on the above website. In the event of ANY disruption in the teaching schedule you are to go to this site for instruction and information.

Course Prerequisites: PSYC 1010 6.0 with a minimum grade of C.  
PSYC 2220 3.0 with a minimum of a passing grade

## TEACHING ASSISTANT

Debra Soh                      Email: [debra.soh1@gmail.com](mailto:debra.soh1@gmail.com)  
Office Hours: By appointment

## TEXTBOOK

B. Goldstein Sensation and Perception 8<sup>th</sup> edition, ISBN: 0495601494

## COURSE DESCRIPTION

The study of perception involves a complex combination of physiology, psychophysics, and cognition. In this course we will explore the major sensory systems focussing primarily on hearing, and the cutaneous and chemical senses, using these topics as a framework. It is expected that you have taken (or are currently taking) Sensation and Perception I, which covers the visual system in detail.

Throughout the course, issues will be explored from an experimental perspective. Therefore, in some lectures we will cover the fundamental experimental paradigms used to study perception (psychophysics). Over the course of the term we will discuss different sensory systems in turn; in each instance time will be spent describing the stimulus (light, sound), the physiology of the receptors and subsequent cortical areas that are activated.

*One of the primary goals of this course is to introduce you to many of the fascinating aspects of how we perceive the world around us. At the conclusion of this course you should appreciate how your sensory perceptions are 'all in your head'.*

*A related, and important, aim is to provide a deeper understanding of how scientific methods are used to study perceptual processes. You will eventually be able to think through a perceptual experiment, understand the methodology used, and why.*

## COURSE EVALUATION

2 In-class tests:	55%	(multiple choice & short answer - 27.5% each)
Final exam:	40%	(multiple choice & short answer)
Participation	5%	(Discussion Posting)

The tests will be based on the text and all lectures. Web-based materials will be included if mentioned in the lectures.

Information regarding the participation component will be posted on the course website.

Make-up exams will be scheduled for pre-assigned days and not on an individual basis.

If you miss a test, or have a question about the marking of the midterm you should contact your TA immediately. S/he will require proof of illness or mishap in the case of a missed test or exam (see below for full details regarding the make-up policy). If you arrive late you will not be given extra time to complete the test.

Given that this is an online course, the midterm(s) will be scheduled in the evening if possible. We will deal with any scheduling conflicts on an individual basis, however, personal commitments will not be accommodated except in extreme circumstances.

## TEST DATES

<b>Midterm 1</b>	<b>Lectures 1-4</b>	<b>TBD</b>
<b>Midterm 2</b>	<b>Lectures 5-8</b>	<b>TBD</b>

**Final Exam** During the regular exam schedule (no exceptions for vacation plans) and will be comprehensive (all lectures).

The tests will be based on the text, and all lectures, films or demos.

Please refer to the York University Religious Observance website for information regarding observed holidays and procedures:

<https://w2prod.sis.yorku.ca/Apps/WebObjects/cdm.woa/wa/regobs> and the Important Dates site: <http://www.registrar.yorku.ca/enrol/dates/fw12.htm>

## TENTATIVE LECTURE SCHEDULE

Date (Mondays)	Lecture	Chapter	Content
*Jan 7 <sup>th</sup>	1	1 & Appendix	Obtain Accounts Review Course- **Psychophysics & Signal Detection theory
Jan 14 <sup>th</sup>	1	1 & Appendix	**Psychophysics & Signal Detection theory
Jan 21 <sup>st</sup>	2	11	**Auditory System
Jan 28 <sup>th</sup>	3	12	Hearing
Feb 4 <sup>th</sup>	4	13	Speech Perception
Week of Feb 11 <sup>th</sup> - Date to be determined	----	Midterm 1	
Feb 18 <sup>th</sup>	5	14	Touch
Feb 25 <sup>th</sup>	6	15	Smell & Taste
March 4 <sup>th</sup>	7	Lecture only	Time perception
March 11 <sup>th</sup>	8	16	Perceptual Development
Week of Mar 18 <sup>th</sup> - Date to be determined	----	Midterm 2	
March 25 <sup>th</sup>	9	Lecture only	Disorders of Perception & Comparisons among Senses
	----	Review Sessions for final exam	

\* The first lecture is available for 1.5 weeks to accommodate start-up problems.

\*\* These lectures contain material from 2220 (S&P I) to be sure that everyone has the same background.

\*\*\* This lecture will be on the final exam, and will be given the same weighting as the other chapters.

## MISSED EXAMS

According to University Policy, the only legitimate excuse for missing an exam is because of medical problems or exceptional circumstances. **If you miss an exam, you must contact your teaching assistant, within 48 hours of the missed exam.** If you do not speak to a person directly you must leave a message. Clearly state your name, student number, course, and a number/time at which you can be reached. If you are unable to contact someone during this 48 hour period, documentation accounting for the delay must be provided. Documentation verifying the reason for the missed exam (see below) must be provided either prior to or at the time of the make-up. Failure to provide appropriate documentation will result in a grade of 0 on the exam.

A. Tests or examinations missed on the grounds of medical circumstances must be supported by an Attending Physician's Statement or a Statement by a Psychologist or Counsellor. The Attending Physician's Statement must include (i) the full name, mailing address and telephone number of the Physicians, (ii) state the nature of the illness and its duration (i.e., specific dates covered), and (iii) an indication of whether the illness and/or medication prescribed would have seriously affected your ability to study and perform over the period in question.

B. Exams missed on the ground of exception non-medical circumstances must be supported by appropriate documentation, i.e., death certificates, obituary notice, automobile accident reports, airline/train/bus tickets/receipt for emergency travel (with date of booking on ticket), etc. Receipts from emergency travel must indicate destination, departure and return dates.

It is your responsibility to check with myself or your TA to make sure we know you have a legitimate reason to have missed a midterm. A conflict in another course during the time of the make-up is not an acceptable reason for missing the make-up (unless there is an exam in that course at that time).
