

## Non-Major Modification Program Changes

1. Program: Global Health
  2. Degree Designation: All
  3. Type of Modification: Changes to Degree
  4. Effective Date: Fall 2022
- 

5. State what the changes are:

**Removed** the following courses from **Spec. Honours (BA)** – science courses outside the major:

HH/KINE 3250, HH/KINE 3420, HH/KINE 3530, HH/KINE 4350, HH/KINE 4360, HH/KINE 4530, HH/PSYC 3620, and HH/KINE 4630

**Removed** the following courses from **Spec. Honours (BA) - Global Health Policy, Management and Systems** stream elective:

HH/HLST 3210, HH/HLST 4220 and HH/HLST 3011

**Removed** the following courses from **Spec. Honours (BSc) - Global Health Policy, Management and Systems** stream elective:

HH/HLST 3210, HH/HLST 4220 and HH/HLST 3011

**Removed** the following courses from **Spec. Honours (BA) - Global Health Promotion and Disease Prevention** stream electives:

HH/NURS 3240 3.00, HH/NURS 4210 3.00

**Removed** the following courses from **Spec. Honours (BSc) - Global Health Promotion and Disease Prevention** stream electives:

HH/NURS 3240 3.00, HH/NURS 4210 3.00

**Removed** the following courses from **Spec. Honours (BA) - Global Health and the Environment** stream electives:

EU/ENVS 1500 6.00, EU/ENVS 2400, EU/ENVS 3125, EU/ENVS 3440, EU/ENVS 4800A 6.00 and EU/ENVS 4810

**Added** the following courses to **Spec. Honours (BA) - Global Health and the Environment** stream electives:

EU/ENVS 1210 3.00, EU/ENVS 1100 3.00, EU/ENVS 1300 3.00, EU/ENVS 1400 3.00, EU/ENVS 2125 3.00, EU/ENVS 2403 3.00, EU/ENVS 2410 3.00, EU/ENVS 2510 3.00, EU/ENVS 3160 3.00, EU/ENVS 3405 3.00, EU/ENVS 4122 3.00, EU/ENVS 4221 3.00,

6. Provide the rationale for the proposed changes that is rooted in the program learning outcomes.

Courses are either retired, inactive, expired, had substantive overlapping content (SHPM), or our students' access was revoked by another department (Nursing).

7. Provide an updated mapping of the program requirements to the program learning outcomes to illustrate how the proposed requirements will support the achievement of

program learning objectives.

No need for an updating mapping; program requirements remain aligned with the overall program learning outcomes, which are as follows:

Utilize the requisite interdisciplinary approaches, theoretical lenses, and critical thinking skills to understand global health issues and actions necessary to improve health and equity globally.

Apply the appropriate qualitative, quantitative, and normative research methodologies in the definition and assessment of the health status of populations, determinants of health and illness, and factors contributing to health promotion, disease prevention, and health equity at the individual, community, and population level.

Exemplify the virtues of being an agent of change through envisioning opportunities for reform and being an advocate for promoting global health and equity, especially for disadvantaged or marginalized populations.

Articulate the benefits of a transdisciplinary approach to global health as a discipline and area of practice, and the manner in which knowledge, understanding, and skills from the humanities, social sciences, and the sciences can be applied to promote global health and equity.

Analyze the impact of public and private institutions, legal and financial systems, political processes, and social movements that comprise the multi-level, multi-sectorial nature of global health governance as they impact on health and equity.

Recognize the importance of and engage in problem-solving real-world issues collaboratively to promote health and equity at the local and global level, and the various mechanisms within global health governance that facilitate cooperative action for promoting health and equity.

Critically analyze the impacts of colonization, racism, misogyny, globalization, and neo-liberalism on the structure, function, and activities of global health policy, practice, and research, and the importance of respecting the insights and autonomy of diverse voices in the global health context.

8. If relevant, summarize the consultation undertaken with relevant academic units, including commentary on the impact of the proposed changes on other programs. Provide individual statements from the relevant program(s) confirming consultation and their support.

We consulted with the UPD of the School of Kinesiology & Health Science and more seats will be allotted to our students in the remaining Global Health Promotion and Disease Prevention (HPDP) stream courses. As the number of students in this stream is growing, we requested access to more courses in addition to seats. Kinesiology will need additional supports in order to accommodate our current and future needs for our HPDP stream. We also consulted with the Department of Psychology around creating an additional stream in global mental health, which will likely reduce the number of students in the HPDP stream. Both Kinesiology and Psychology are supportive of the requests made by the School of Global Health.

With respect to the Global Health and the Environment stream, the UPD in the Faculty of Environmental and Urban Change (Gail Fraser) stated: "I've heard from all three

coordinators and can confirm the courses that could be added to the GH Environmental Health Stream if you are interested. I realize time is limited, so if you just want to proceed with an update on the existing list that is understandable. We can try and sort out sharing course proposals/syllabi on Teams if you want to review the new courses that could be part of your stream." List of courses was attached to the email.

9. Describe any resource implications and how they are being addressed (e.g., through a reallocation of existing resources). If new/additional resources are required, provide a statement from the relevant Dean(s)/Principal confirming resources will be in place to implement the changes.

The School of Global Health is growing, and we are unable to meet the demand for courses for the HPDP stream. In consultations with current students and alumni, this was raised as a significant issue, as the lack of availability to stream electives in Kinesiology resulted in delays to starting the practicum and even delayed graduation. In order for Kinesiology to accommodate the needs of our students in the HPDP stream, they will need additional supports for additional sections or larger courses. The School of Global Health could create our own stream electives; however, we would also need additional supports in order to achieve this. This issue is significantly impacting the student experience in our most popular stream – this issue has been raised with the Dean and Director of the School of Kinesiology and Health Science.

10. Provide a summary of how students currently enrolled in the program will be accommodated.

The School of Global Health continues to try to work with Kinesiology in order to find ways to accommodate students. Other short-term accommodations include approving stream elective alternatives, within and outside of the Faculty of Health, in order to ensure global health students are not significantly disadvantaged.

11. Provide as an appendix a side-by-side comparison of the existing and proposed program requirements as they will appear in the Undergraduate or Graduate Calendar.
