

Non-Major Modification Program Changes

1. Program: Psychology
 2. Degree Designation: BA, BSc, BA Hons, BSc Hons, Specialized Honours BA, Specialized Honours BSc, Honours Minor BA and Honours Minor BSc.
 3. Type of Modification: Removal of minimum grade requirement of 'C' in 'Introduction to Psychology' PSYC 1010 6.0 (Example: changes to degree / admission requirements)
 4. Effective Date: Fall 2023
-
5. Change to the calendar description regarding removal of minimum grade requirement of "C" for PSYC 1010 6.0 and change to the brief description of PSYC 1010, to reflect the removal of the requirement a C in this course. (Example: increase/ decrease to the number of major credits)
 6. Provide the rationale for the proposed changes that is rooted in the program learning outcomes.

We are proposing to remove the minimum grade of 'C' such that students who obtain a D or D+ in Introduction to Psychology will not be prohibited from taking additional courses and progressing in their psychology degrees. We believe students who pass PSYC 1010 will still have met at least to a minimum degree, the PLOs of 'Define psychology and explain how it meets the criteria of science' and 'Recognize key concepts, methods, theories, and assumptions of psychology' as well as 'Describe the basic characteristics of the scientific method in psychology' and 'Discern the difference between personal views and scientific evidence'.

The primary rationale for this change is that we believe it unnecessarily disadvantages students who may already be disadvantaged. Not only are these students prevented from proceeding with obtaining their degree requirements, but they are left to retake the course often multiple times in order to progress. This adds undue financial burden to students in this position in our view. Moreover, during COVID, we waived the minimum C requirement and were able to conduct comparative analyses between student performance in PSYC 1010 and later performance on 2nd year required courses: Introduction to Research Methods, Introduction to Statistics, and Writing in Psychology. Results comparing performance between students who obtained a D/D+ in PSYC 1010 and students who obtained a C/C+ were not substantially different. Moreover, it was noted that many of the students who obtained a D/D+ in PSYC 1010 went on to perform *appreciably better* in their 2nd year courses. Lastly, we have a number of student support and success programs in place through Calumet College (e.g., PASS; Peer Tutoring) and Learning Commons that were not in place when the minimum C requirement was instituted several decades ago.

7. Provide an updated mapping of the program requirements to the program learning outcomes to illustrate how the proposed requirements will support the achievement of program learning objectives.

By not holding back students who pass PSYC 1010, they will be able to continue pursuing

the aforementioned PLOs as these become elaborated upon in 2nd year required courses and electives. Due to the temporary lifting of the C requirement, we have evidence to suggest that students with a grade of D/D+ overall do equivalent or better on their 2nd year foundational courses. The removal of the C requirement will not impact the way the course is mapped to other courses or to the program learning outcomes.

8. If relevant, summarize the consultation undertaken with relevant academic units, including commentary on the impact of the proposed changes on other programs. Provide individual statements from the relevant program(s) confirming consultation and their support.

This change was implemented in consultation with PSYC 1010 instructors and after inquiring of more senior faculty and past administrators of the 'C Rule's origins (including original rationale for its implementation) – which were hard to discern. The pros and cons of retaining and removing the 'C Rule' were examined in great depth by the Psychology Undergraduate Studies Committee who, after several discussions, approved the change to remove the restriction at the March 2022 USC meeting. This recommendation was then presented to the Psychology Department Executive Committee and approved, followed by a fulsome discussion at the March Department Meeting. Currently, the C requirement also applies to all students either inside or outside the academic units. The change will also apply to all students who wish to take PSYC 1010 6.0 either inside or outside the academic units.

9. Describe any resource implications and how they are being addressed (e.g., through a reallocation of existing resources). If new/additional resources are required, provide a statement from the relevant Dean(s)/Principal confirming resources will be in place to implement the changes.

As students obtaining D/D+ in PSYC 1010 are not significant in number (~100 per year), we do not anticipate this change having any significant impact on resources. On a positive note, it may open seats in Year I offerings of PSYC 1010 because fewer students will need to retake the course.

10. Provide a summary of how students currently enrolled in the program will be accommodated.

Given we have been lifting the restriction on D/D+ PSYC 1010 students from enrolling in 2nd and 3rd year courses since the start of the COVID Pandemic, we will simply carry forward as we have been doing with no impact on the most recent cohort of PSYC 1010 students, and thus no need for accommodation. Once the change is approved, the registration system should be updated to reflect the change for students who have the D and D+ to enrol in upper level courses.

11. Provide as an appendix a side-by-side comparison of the existing and proposed program requirements as they will appear in the Undergraduate or Graduate Calendar.

The proposed change will be implemented for each of our Degree Programs (BA, BSc, BA Hons, BSc Hons, Specialized Honours BA, Specialized Honours BSc) in the Undergraduate Calendar and all associated Syllabus Templates:
