8-Week Mindfulness-Based Cognitive Behavioural Therapy

Group Program

Mindfulness-Based Cognitive Behavior Therapy (MB-CBT) derives a powerful synergy from behaviour change methods that combine meditation with the latest evidence from neuroscience and other health disciplines.

According to existing research, learning to meditate is a way of strengthening current skills and developing new skills of practical benefit. The ultimate aim of MB-CBT is to help people lead happier, more meaningful lives. These 8 sessions provide a stimulating and supportive environment in which to practice and personally explore benefits.

Thursday Lunch Time Program
Facilitator: Dr. Paul Ritvo, C.Psych., Clinical Psychologist, Professor
Dates: Thursdays starting March 7, 2024 (Mar. 7, 14, 21, 28, & Apr. 4, 11, 18, 25) Time: 1:00 - 2:00 pm
Location: Virtual
Fee: $200.00 for the group program; $125 for students with valid ID

These sessions are led by Dr Paul Ritvo, clinical psychologist, and should be reimbursable through extended health plans that provide coverage for psychological services.
