

Faculty Course Evaluations for Ryerson University - Fall 2021 - 10 January 2022
Instructor's Results by Course and Section (Written Comments)

	Course Code-Section	Comment
1	MTH380-071	Professor MD Abdur Rahman is very knowledgeable and teaches the course content with enthusiasm and very clearly. He is supportive and accommodating to students' concerns. The quizzes, assignments, and midterm were fair and expected. I enjoyed this course and it was very valuable because I learned a lot about probability and statistics, which is relevant to my degree.
2	MTH380-071	Such a nice Professor. Very reasonable. Only thing is students were stressing because marks took along time to get back, but its okay. Overall had a great experience.
3	MTH380-071	best prof, learned so much, very fair marker 10/10
4	MTH380-081	Amazing professor!! Extremely nice and approachable, doesn't move on until everyone understands, and listens to all our concerns and issues. An amazing example of a good professor that actually cares about students I could go on and on about how great of a prof he is!!
5	MTH380-081	Dr. Rahman is an excellent professor who clearly cares about his student's success in this course, as well as their well-being. The evaluations in this course were also very reasonable and directly reflected the content and topics discussed during the lecture. That allowed me as a student to know that I would have a fair chance at succeeding in this course if I attended lectures and completed a few homework practice questions.
6	MTH380-081	Excellent class, the professor is good at explaining concepts and is considerate of the students. He takes time to cover everything and is great at answering questions. Thank you, professor!
7	MTH380-081	I think the instructor does a good job with teaching the course.
8	MTH380-081	The course is organized and runs smoothly. My one critique is that we seem to be behind in the content and I am worried the last coming weeks of the semester will be an overload of material or we will not learn all that we should be.
9	MTH380-081	The instructor is one of the kindest and helpful instructors. Content presented in class is very thoroughly explained and given time to understand. Evaluations were extremely fair and the pace and structure of the content and course were all extremely reasonable and good. It was evident that the instructor genuinely wanted the students to learn, which made it a very kind and motivating learning environment. Extra help was available from resources such as the textbook which was on par with the precise explanations from the instructor. Overall, an extremely well-structured, encouraging and well-paced course.
10	MTH380-081	The professor has been very helpful, understanding and caring towards the students. The professor always replies to emails. Moreover it can seem as a mails thing but sending important notifications about any changes directly to our emails has been very helpful. During the class professor tries to explain concepts as clearly as possible, proving extra examples and answering all questions, moreover taking the time to properly explain a concept without rushing and throwing loads of information at the students. This is much appreciated, thank you! For further classes, I would wish to have more practice examples shown during class however I understand that the time limit may not allow this.
11	MTH380-091	Not a lot to say about this course, I feel pretty satisfied with it, a great course that got me hooked up on statistics even though I did not think I would like it a lot. Dr Abdur Rahman also just elevates this course with his explanations about the material.
12	MTH380-091	This professor really cares about the wellbeing and learning experience of students. He provides enthusiastic and clearly explained lessons to make learning easier for students. Also I really appreciate the fair and considerate way that he organized tests and quizzes to ensure that students can perform accurately without being overwhelmed.
13	MTH380-101	I already did this exact course in high school, so I had already seen all of these concepts before. I could tell that this instructor was very knowledgeable and enthusiastic when it comes to the subject material. This was one of my favourite classes of the semester.
14	MTH380-101	Instructor actually listens to students and accommodates to their needs. The slides are straight from textbook, hard to engage with the notes and really absorb the information
15	MTH380-101	The instructor knows the material very well and teaches with enthusiasm, on top of taking feedback and suggestions from students to improve the course. However, I personally find that simply reading the slides myself and doing assigned textbook questions is the best method of learning the material, over learning from lectures, but that is just a personal preference. The lecture slides are all posted from day 1 and are very easy to learn off of, a very good thing to have for any student. Overall, an excellent combination of a well-organized course, with very to-the-point practical material, and a good instructor who genuinely cares about the quality of the course.
16	MTH380-111	AMAZING SLIDES MADE BY PROF!! :)
17	MTH380-111	Professor was very receptive to student feedback surrounding course organization, and taught the material well.
18	MTH380-121	He is a very nice prof. He always listen to his students and make adjustments in the course if he needs too. He's a very patient prof!
19	MTH380-121	Professor Rahman explained the content effectively and used examples so we could understand the concepts better. He showed great care for the students. When we raised any concerns about grades or the course management he promptly solved any issues we were having. Communication about the assignment and quiz availability was always given well before the start of the assessment. The lecture slides provided were great study tools. A well-organized and managed course.
