Course Level Questions Evaluation

1) **What did you value most about this course?**

- The knowledge i gained

- Not sure. Maybe strengthing my calculus skills

- Professor's teaching style. Prof provide real life examples which helps understand better. Also, it makes the class interesting.

- Everything was clear and the test questions were directly related to what was given to us and he gave us very god preparation guides.

- .

- I got to learn all the concepts needed for calculus.

- Professor was very thorough with his explanations. He was willing to go over details that students were supposed to know from high school but might have forgotten. Lastly, Professor always tried to find real life examples which help simplify the concepts.

- The assignment were really helpful in this course.

- Instructor of the course itself

- Applications of calculus

- I value the calculus skills I developed.

- Learning new topics.
- everything
- How the instructor explained topics in simpler terms
- Having a formula sheet during exams
- sample paper
- Content made approachable and solvable; safe, non discriminatory, enthusiastic learning environment, the content & quality/number of assignment questions. (of course)

2) **What did you dislike about this course? What would you want to see changed in this course?**

- The class was very depressing it was way to dark
- The course was fair.
- No!!
- I didn't really dislike anything so i cant say.
- .
- I don't like the assignment structure for this course. the questions seem to be really difficult sometimes and repetitive.
- The professor was really slow.
- n/a
- Very slow feedback for midterms. Professor took forever
- The sequences and series chapters at the end seem out of context.
- Nothing.
- nothing

- Course topics don't fit into summer semesters

- Not being able to write any words on it so I couldn't write what chapters a section of formulas was for

- early morning class

- n/a

3) **Do you have any other observations or comments about the course, instructor, tutorial leader, teaching assistant or marker/grader that you wish to add?**

- N/A

- Na

- Instructor is excellent and so are TAs. Marking style is lenient.

- No

- .

- No

- n/a

- Slow feedback from professor.

- Instructor is very clear and capable of teaching the concepts.

- No

- no

- Having a little more real life examples for a better understanding of students.

- N/A

- no

- He is reasonable concerning accommodations for SAS students. Slides were clear enough to understand if lecture was missed. Clear communication regarding changes in course, returned tests, overall course activity. Good facilitator.

He captures the same passion & excitement for teaching & facilitating learning that one of my adult learning centre math instructor's from India had. Like many of the instructors there, I could see his passion for facilitated learning. This man grasped math concepts well enough to communicate it in a simplified way. Then began teaching and made his own textbooks because there were very few where he lived.
