

# York University Researchers & COVID-19

Compiled by **Megan Mueller, Senior Manager, Research Communications**, Office of the Vice-President Research & Innovation, this is a list of York University researchers involved in COVID-19 in terms of

- Prioritizing the health and safety of staff, students and communities while remaining committed to student academic success;
- Research (Supporting treatment/vaccine development, expert advice, or other); and
- Community impact during COVID-19: Individual and collective effort of students ground-breaking discoveries of researchers, supporting emergency planning with local public health and the province.

\* Indicates peer-reviewed journal publication.

|---|---|
| Toronto Star - Women are carrying the mental health burden of 'worry-work.' It's time to stop focusing on stigma and talk more about solutions. Nazilla Khanzou, School of Nursing and Women's Health Research Chair in Mental Health at York University's Faculty of Health. "What COVID-19 has done is to really push the mental health discourse into the mainstream because it's impacting folks in different ways than ever before." | <a href="https://www.thestar.com/life/health_wellness/opinion/2021/03/08/women-are-carrying-the-mental-health-burden-of-worry-work-its-time-to-stop-focusing-on-stigma-and-talk-more-about-solutions.html">https://www.thestar.com/life/health_wellness/opinion/2021/03/08/women-are-carrying-the-mental-health-burden-of-worry-work-its-time-to-stop-focusing-on-stigma-and-talk-more-about-solutions.html</a> |
| Prof Erez Freud - A very unique challenge that the coronavirus crisis has presented before us is the identification of people wearing masks in the first look. A recent study by researchers from Israel and Canada has studied the detailed impact of face masks and how they disrupt facial perception.   | <a href="https://www.dnaindia.com/science/photo-gallery-face-masks-disrupt-facial-perception-know-what-researchers-have-to-say-wearing-facemask-covid-19-2879860">https://www.dnaindia.com/science/photo-gallery-face-masks-disrupt-facial-perception-know-what-researchers-have-to-say-wearing-facemask-covid-19-2879860</a>   |

## As of December 4, 2020

|  |   |
|--|---|
| University Affairs: A group of York University students, led by LA&PS' Cary Wu, got together to discuss what aspects of in-person classes they miss most while studying remotely.  | <a href="https://bit.ly/3ok7cql">https://bit.ly/3ok7cql</a> |
| Washed Away: Winning the COVID-19 battle with soap and water. It's an old method that our overdependence on wonder drugs has tended to sideline. But its effectiveness cannot be denied. Biologist Dasantila Golemi-Kotra                | <a href="https://bit.ly/3fMIf3O">https://bit.ly/3fMIf3O</a> |
| What Canadians need to know about COVID-19 before gathering over the holidays."Silent transmission is one of the key drivers of outbreaks," said Seyed Moghadas, a professor of applied mathematics and computational epidemiology.      | <a href="https://bit.ly/33vNyzz">https://bit.ly/33vNyzz</a> |
| According to a new survey conducted by York U, online teaching tempers teachers' ability to connect with their students and properly assess their performance and learning skills. Sarah Barrett, Faculty of Education, shares her view. | <a href="https://bit.ly/3qfyb8k">https://bit.ly/3qfyb8k</a> |
| Our essential workers are burning out. Advocates say a lack of basic job protections is to blame. Leah Vosko (LA&PS)   | <a href="https://bit.ly/2VigjLD">https://bit.ly/2VigjLD</a> |

|   |   |
|---|---|
| interviewed.  |   |
| Same as above, coverage in <i>Globe &amp; Mail</i> .  | <a href="https://bit.ly/3qoa86Z">https://bit.ly/3qoa86Z</a>     |
| Research exposes unequal impacts of COVID-19 on racialized communities. Glendon researchers, Gertrude Mianda and Shirin Shahrokni, conduct research in separate disciplines to explore the effects of systemic racism and discrimination on specific racial groups in Canada.   | <a href="https://bit.ly/36kcdcc">https://bit.ly/36kcdcc</a>     |
| Markus Giesler, a consumer researcher and associate professor of marketing at York University's Schulich School of Business in Toronto, said the pandemic has fundamentally changed shopping.   | <a href="https://bit.ly/3mmT8Mb">https://bit.ly/3mmT8Mb</a>     |
| Prof Roger Keil: Cities are best positioned to respond to pandemics, COVID-19. Upcoming webinar, "Why Pandemics, Such as COVID-19, Require a Metropolitan Response," hosted by Faculty of Environmental and Urban Change (EUC) and NYU's Marron Institute of Urban Management, will look at emerging evidence from New York, Wuhan, Paris & Johannesburg. | <a href="https://bit.ly/36C4s1s">https://bit.ly/36C4s1s</a>     |
| Globe & Mail: Steven Hoffman, director of the Global Strategy Lab and a professor of global health, law, and political science, said the regulatory approval process is unlikely to present much of a hold-up in Canada. Instead, he said, the main issue will be how quickly companies can produce vaccines.   | <a href="https://cisen.co/3lBvZnV">https://cisen.co/3lBvZnV</a> |
| Bitter harvest - CBC: "The pandemic has made more obvious things that we've already known for years and years. It's shone   | <a href="https://bit.ly/2VyfFda">https://bit.ly/2VyfFda</a>     |

|  |  |
|--|--|
| <p>a spotlight on the vulnerabilities of the system," said Rod MacRae, Environmental Studies. The pandemic has created serious risks for the migrant workers who grow and pick our fruit and vegetables. In Ontario, farm workers were at least 10 times more likely to contract COVID-19 than the overall population, The Fifth Estate has found.</p> |  |
| <p>Article in Ottawa Citizen: 'It's easy to dismiss them, unfortunately:' What's behind non-adherence to the public health pandemic guidelines? Interview with Eric Kennedy, an assistant professor of disaster and emergency management.</p>  | <p><a href="https://bit.ly/2JwY2bd">https://bit.ly/2JwY2bd</a></p>   |
| <p>Article in The Conversation Canada: California's gig worker battle reveals the abuses of precarious work in Canada too, by Adam D.K. King Post-Doctoral Visitor, Department of Politics.</p>  | <p><a href="https://bit.ly/2Vyg3Za">https://bit.ly/2Vyg3Za</a></p>   |
| <p>Steven Hoffman (Health &amp; Osgoode) interviewed by Globe &amp; Mail about vaccine delivery: Canada will be among first countries set to receive Moderna COVID-19 vaccine shipments</p>  | <p><a href="https://tgam.ca/2KZM0HH">https://tgam.ca/2KZM0HH</a></p> |
| <p>Most countries are not fulfilling their international legal obligations during COVID-19 and other public health emergencies, reveals new research by a consortium of 13 leading global health law scholars, hosted by the Global Strategy Lab (GSL) at York University.</p>   | <p><a href="https://bit.ly/39DmJxt">https://bit.ly/39DmJxt</a></p>   |
| <p>* This is major study - attracted great deal of media attention - Ontario lockdown successful in disrupting transmission of virus by shifting contact patterns. Faculty of Science Professor Jianhong Wu, corresponding author of the study.</p>  | <p><a href="https://bit.ly/2JMbqYY">https://bit.ly/2JMbqYY</a></p>   |

|  |  |
|--|--|
| <p>* Same as above: The paper, “Quantifying the shift in social contact patterns in response to non-pharmaceutical interventions,” is published in the <i>Journal of Mathematics in Industry</i>.</p>  | <p><a href="https://bit.ly/2JMbqYY">https://bit.ly/2JMbqYY</a></p>   |
| <p>Same as above - Ontario lockdown successful in disrupting transmission of virus by shifting contact patterns. Faculty of Science Professor Jianhong Wu, corresponding author of the study, and his team found interventions to prevent the spread of COVID-19 reduced people’s social contact rate and altered who they were in contact with, which changed the contact mixing patterns. For example, more people were at home and that disrupted the contacts they otherwise would have had in their workplace and in the community.</p> | <p><a href="https://bit.ly/3mwKdI2">https://bit.ly/3mwKdI2</a></p>   |
| <p>Globe &amp; Mail - Canada faces narrowing window to deploy COVID-19 vaccines against infection spread. Faculty of Science Jane Heffernan said that the impact of a vaccine arriving in Canada is highly time sensitive because of infection numbers approaching another peak some time in late February or early March, according to her own modelling.</p>   | <p><a href="https://app2.cision.com/redir?s=8500000108023804">https://app2.cision.com/redir?s=8500000108023804</a></p> |

| <p>York researchers create AI simulation app to help with logistics of mass vaccinations for COVID-19. Researchers at York have developed a solution, an AI drive-through mass vaccination simulation application that can help clinics and public health agencies plan for mass vaccinations ahead of time. Team led by LA&amp;PS' Ali Asgary, associate director of ADERSIM.</p> | <p><a href="https://bit.ly/2J63jGp">https://bit.ly/2J63jGp</a></p>   |
| <p>Same as above - York U team develops mass vaccination simulation app. App will determine how to best immunize large numbers of people "rapidly and safely." LA&amp;PS Ali Asgary, who is associate director of the Advanced Disaster, Emergency and Rapid Response Simulation (ADERSIM)</p>   | <p><a href="https://www.toronto.com/news-story/10271569-york-university-team-develops-mass-vaccination-simulation-app/">https://www.toronto.com/news-story/10271569-york-university-team-develops-mass-vaccination-simulation-app/</a></p>   |
| <p>Trump's election tantrum could still fuel widespread violence, Jack L. Rozdilsky (LA&amp;PS). Donald Trump continues to stoke his base with false allegations of a 'rigged' election, meaning widespread violence is still possible post-election as the U.S. devolves into a fragile state.</p>  | <p><a href="https://bit.ly/3kZoBSY">https://bit.ly/3kZoBSY</a></p>   |

|   |   |
|---|---|
| Why Doug Ford is stumbling during COVID-19's second wave Mark Winfield Professor of Environmental Studies   | <a href="https://bit.ly/33bu6Ij">https://bit.ly/33bu6Ij</a>   |
| COVID-19: Think-tank calls for national oversight of long-term care. co-authors Pat Armstrong (LA&PS) and Marcy Cohen are making recommendations to Ottawa in a discussion paper today by Vancouver-based Canadian Centre for Policy Alternatives.  | <a href="https://theprovince.com/business/covid-19-think-tank-calls-for-national-oversight-of-long-term-care">https://theprovince.com/business/covid-19-think-tank-calls-for-national-oversight-of-long-term-care</a>   |
| * Same as above. Pat Armstrong (LA&PS) has co-authored a very important piece: "A Higher Standard: Setting federal standards in long-term care and continuing care." This report proposes foundational principles for pan-Canadian continuing care services. These principles recognize the need for a shared, equitable approach that allows for diversity in practices across jurisdictions, communities, groups and individuals to address local contexts and needs in evidence-informed ways. | <a href="https://www.policyalternatives.ca/publications/reports/higher-standard-0">https://www.policyalternatives.ca/publications/reports/higher-standard-0</a>   |
| * Incidence, clinical features, and outcomes of COVID-19 in Canada: impact of sex and age. The paper by YorkU's Chun Peng (Biologist) was published in the <i>Journal of Ovarian Research</i> . "We show that although the absolute number of COVID-19 cases was higher for females, females have a lower COVID-19 incidence rate when high-risk populations, namely health care workers and long-term care residences, were disaggregated."  | <a href="https://ovarianresearch.biomedcentral.com/articles/10.1186/s13048-020-00734-4">https://ovarianresearch.biomedcentral.com/articles/10.1186/s13048-020-00734-4</a>   |
| Does sex and age affect who gets COVID-19 in Canada? York researchers found females, particularly in their reproductive years, were less likely to contract the virus. "These findings suggest that if men and women were similarly exposed to SARS-CoV-2, women younger than 80 years old would be less likely to be infected, especially for those in the reproductive age group," says corresponding author Professor Chun Peng of the Faculty of Science.                                     | <a href="https://yfile.news.yorku.ca/2020/11/24/sex-age-and-estrogens-may-play-a-role-in-who-contracts-covid-19/?utm_source=YFile_Email&amp;utm_medium=Email&amp;utm_content=Top-Stories&amp;utm_campaign=yfile">https://yfile.news.yorku.ca/2020/11/24/sex-age-and-estrogens-may-play-a-role-in-who-contracts-covid-19/?utm_source=YFile_Email&amp;utm_medium=Email&amp;utm_content=Top-Stories&amp;utm_campaign=yfile</a> |
| York U start-up rebounds to find success in face of COVID-19 pandemic.SV Robotics Academy's CEO Mayu Ganesathas, York   | <a href="https://yfile.news.yorku.ca/2020/11/24/york-u-start-up-rebounds-to-find-success-in-face-of-covid-19-">https://yfile.news.yorku.ca/2020/11/24/york-u-start-up-rebounds-to-find-success-in-face-of-covid-19-</a>   |

Should parents teach their kids at home during COVID-19 school closures? Vidya Shah, an assistant professor in York University's Faculty of Education, says many parents and educators are struggling with the shift to teacher-led online learning, and while we can't expect parents to take on the role of teachers, we also have to change our expectations of teachers.

| <p>*Research article by Professor Seyed Moghadas- Projecting hospital utilization during the COVID-19 outbreaks in the United States. Our results highlight that the growing coronavirus disease 2019 (COVID-19) outbreak in the United States could gravely challenge the critical care capacity, thereby exacerbating case fatality rates. In the absence of a preventive vaccine, efforts to contain the outbreak, such as improving self-isolation rates and encouraging better hygiene practices, can alleviate some of the pressures faced by the healthcare system during an outbreak. Both emergency expansion of hospital facilities to treat COVID-19 and government appropriations to facilitate voluntary case isolation are urgently needed.</p> | <p><a href="https://www.pnas.org/content/early/2020/04/02/2004064117">https://www.pnas.org/content/early/2020/04/02/2004064117</a></p>   |
| <p>*Prof Jianhong Wu - Lessons drawn from China and South Korea for managing COVID-19 epidemic: insights from a comparative modeling study. We conducted a comparative study of the COVID-19 epidemic in three different settings: mainland China, the Guangdong province of China and South Korea, by formulating two disease transmission dynamics models which incorporate epidemic characteristics and setting-specific interventions, and fitting the models to multi-source data to identify initial and effective reproduction numbers and evaluate effectiveness of interventions.</p>  | <p><a href="https://www.who.int/bulletin/online_first/20-257238.pdf">https://www.who.int/bulletin/online_first/20-257238.pdf</a></p>   |

| <p>James Orbinski - The novelty, speed, scale, and the differing, evolving patterns of the COVID-19 pandemic make it difficult to stay informed. The purpose of the new Dahdaleh COVID-19 Global Health Portal is to provide some clarity in this time of uncertainty, and to allow users to find the information they need. Regular updates on the state of the pandemic prepared by Dr. James Orbinski, a medical doctor, professor and the inaugural director of the Dahdaleh Institute of Global Health Research at York University, and Dahdaleh Fellow Aria Ilyad Ahmad.</p> | <p><a href="https://research.info.yorku.ca/2020/04/the-new-dahdaleh-covid-19-global-health-portal-offers-clarity-in-a-time-of-uncertainty/">https://research.info.yorku.ca/2020/04/the-new-dahdaleh-covid-19-global-health-portal-offers-clarity-in-a-time-of-uncertainty/</a></p> |
| <p>Brandon Vickerd, a professor in the visual arts and art history departments in York University's School of the Arts, Media, Performance &amp; Design (AMPD) and the director of the</p>   | <p><a href="https://research.info.yorku.ca/2020/04/ampd-donates-masks-for-frontline-workers-fighting-covid-19/">https://research.info.yorku.ca/2020/04/ampd-donates-masks-for-frontline-workers-fighting-covid-19/</a></p>   |

|  |  |
|--|--|
| <p>University's digital sculpture lab, spearheaded an effort to donate more than 600 masks, as well as gloves and face shields, to Hamilton Health Services for distribution across the Greater Toronto and Hamilton Area.</p>   |  |
| <p>Dayna Lens (2020 LaunchYU Accelerator participant) Daya Lens is helping to build psychological resiliency through virtual reality. Therapists such as psychologists and psychotherapists are often restricted to office-based counselling, limiting their ability to facilitate and observe experiential treatments. For diagnoses such as PTSD, exposure therapy can increase the recover rate from approximately 40% to between 60-90%. With the spread of COVID-19, Daya Lens is currently working on developing a mobile mindfulness VR app to help individuals who are struggling with being indoors all day due to COVID-29. VR can allow individuals to have an immersive and calming experience in different settings without the need for someone to leave their home.</p> | <p><a href="https://www.dayalens.com/">https://www.dayalens.com/</a></p> |
| <p>Blade Filters Inc. (2018 LaunchYU Accelerator graduate and YSpace Member) Blade Filters Inc. creates activated carbon air filters that encompass a replaceable carbon cartridge. When the carbon in a filter becomes exhausted, instead of replacing the entire ensemble, users are only required to replace the cartridge. This leads to lower overall consumer costs, as well as less wasted resources. With the spread of COVID-19, Blade Filters has pivoted to develop two new products.</p>   | <p><a href="https://bladefilters.com/">https://bladefilters.com/</a></p> |

|  |  |
|--|--|
| <p>Lactiga, (2020 LaunchYU Accelerator participant) Lactiga has developed and patented an anti-infective product, LCTG-001. They originally developed this novel biologic to prevent mucosal infection in immunodeficient patients. But during the spread of COVID-19 they realized the same product, administered to the airways, could also fight infection since the virus responsible for the disease, SARS-CoV-2, infects both the sinuses and the lungs. Lactiga immediately pivoted their preclinical study design and engaged collaborators at University of Toronto, SickKids, and Sunnybrook to design a preclinical study to test the potency of LCTG-001 against SARS-CoV-2 in a BSL-3 facility. The collaborative group is actively seeking funding for this preclinical study, and Lactiga is developing clinical development strategies to present to government health agencies in both Canada and the US.</p> | <p><a href="https://www.lactiga.com/">https://www.lactiga.com/</a></p>   |
| <p>Online video game brings to life the impact of staying home during COVID-19 pandemic: A new online game set in an immersive science fiction storyworld but informed by real-world public health challenges was launched today by York University researchers. Shadowpox: #StayHome Edition helps players visualize – in a fun and engaging way – the impact of deciding to stay home during the COVID-19 pandemic, and the effect on their community if they do not.</p>  | <p><a href="https://news.yorku.ca/2020/04/08/online-video-game-brings-to-life-the-impact-of-staying-home-during-covid-19-pandemic/">https://news.yorku.ca/2020/04/08/online-video-game-brings-to-life-the-impact-of-staying-home-during-covid-19-pandemic/</a></p> |

## As of April 3, 2020

|   |   |
|---|---|
| James Orbinski is a professor and the inaugural Director of York University's Dahdaleh Institute for Global Health Research. He is a medical doctor, a humanitarian practitioner and advocate, a best-selling author, and a leading scholar in global health. | <a href="https://dighr.yorku.ca/people/james-orbinski/">https://dighr.yorku.ca/people/james-orbinski/</a>   |
| York University Faculty of Science Professor Jane Heffernan explains social/physical distancing, says keeping a specific physical   | <a href="https://yfile.news.yorku.ca/2020/03/29/social-distancing-and-why-it-works-explained-by-math-professor-jane-heffernan/">https://yfile.news.yorku.ca/2020/03/29/social-distancing-and-why-it-works-explained-by-math-professor-jane-heffernan/</a> |

|  |  |
|--|--|
| <p>distance away from others does prevent the spread of the virus – that can be expelled by cough, sneeze and breathing – by creating a spatial barrier from an infected person.</p>   |  |
| <p>Further to above, Heffernan's research program centres on understanding the spread and persistence of infectious diseases. Her, Modelling Infection and Immunity Lab (MI2), which is affiliated with the Centre for Disease Modelling (CDM) focuses on the development of new biologically motivated models of infectious diseases (deterministic and stochastic) that describe pathogen dynamics in-host (mathematical immunology) and in a population of hosts (mathematical epidemiology). Models in immuno-epidemiology, which integrate the in-host dynamics with population level models, are also developed.</p> | <p><a href="http://immune.math.yorku.ca/jmheffer/">http://immune.math.yorku.ca/jmheffer/</a></p>   |
| <p>Computational epidemiology Professor Seyed Moghadas of the Department of Mathematics and Statistics in the Faculty of Science will receive \$264,434 from CIHR to develop new and adapt existing mathematical models to predict the scope of disease transmission, potential outbreaks, and clinical attack rates. He will also project what services hospitals will require and assess the effects of interventions, such as quarantine, self-reporting, isolation and school closures. In addition, he will evaluate</p>  | <p><a href="https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/">https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/</a></p> |

|   |  |
|---|--|
| <p>the effectiveness of a vaccine and best distribution scenarios based on population age and risk.</p>   |  |
| <p>Associate Professor Fuminori Toyasaki of the School of Administrative Studies in LA&amp;PS and ADERSIM will receive \$130,600 from CIHR to study countermeasures to the supply chain disruptions in medical and pharmaceutical industries. His project will focus on the supply chain disruptions that medical and pharmaceutical industries are currently facing as a result of strategic hoarding by suppliers and consumer panic buying. In addition, he will explore the feasibility of two countermeasures – a collaborative stock sharing/transshipment system and an incentive contract with a potential second source that can produce highly customized medical and pharmaceutical items.</p> | <p><a href="https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/">https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/</a></p>   |
| <p>York University researchers, led by Jianhong Wu, project that Canada will have 15,000 cases of COVID-19 by March 31 unless there are further public health interventions. A rapid increase in public health interventions implemented now could reduce that number</p>   | <p><a href="https://news.yorku.ca/2020/03/26/canadian-cases-of-covid-19-could-climb-to-15k-by-end-of-march-say-york-researchers/">https://news.yorku.ca/2020/03/26/canadian-cases-of-covid-19-could-climb-to-15k-by-end-of-march-say-york-researchers/</a></p> |

|  |  |
|--|--|
| <p>to 4,000, according to the research, which will be published in the journal <i>Infectious Disease Modelling</i>.</p>  |  |
| <p>Adriano Solis is co-applicant to this grant: Professor Jianhong Wu of the Faculty of Science and director of ADERSIM is leading a national COVID-19 math modelling team.</p>  | <p><a href="https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/">https://news.yorku.ca/2020/03/23/new-covid-19-rapid-research-funding-for-york-professors/</a></p>   |
| <p>Postdoctoral Fellow Nicola Bragazzi, Faculty of Science, co-authored a paper for the <i>Journal of Clinical Medicine</i>: A comprehensive review of studies on COVID-19, including clinical, epidemiological, laboratory and chest imaging data, shows that the most common symptom was fever (82%), followed by a cough (61%), then muscle aches and/or fatigue (36%).</p> | <p><a href="https://news.yorku.ca/2020/03/31/fever-cough-most-common-symptoms-of-covid-19-but-dont-overlook-a-headache-or-sore-throat/">https://news.yorku.ca/2020/03/31/fever-cough-most-common-symptoms-of-covid-19-but-dont-overlook-a-headache-or-sore-throat/</a></p> |
| <p>Terry Sachlos is at the Lassonde School of Engineering. His lab, although not doing any viral work, can work on developing in vitro 3D lung tissue for high throughput screening assays which could be used by other specialized labs to infect cells and test for therapeutic agents.</p>  | <p><a href="https://lassonde.yorku.ca/users/terrysachlos">https://lassonde.yorku.ca/users/terrysachlos</a></p>   |

|  |   |
|--|---|
| <p>Schulich Data Scientists Formulate Predictive COVID-19 Dashboard. Schulich's data scientists, Murat Kristal, PhD, Ikjyot Singh Kohli, PhD and David Elsner have created the COVID-19 Dynamics dashboard to provide insights into the spread of the global virus pandemic. Using publicly available data from Johns Hopkins Center for Systems Science and Engineering GIS and GitHub, the dashboard is able to predict the number of new COVID-19 cases over the next five days in each country, region, province or state.</p> | <p><a href="https://schulich.yorku.ca/news/schulich-data-scientists-formulate-predictive-covid-19-dashboard/">https://schulich.yorku.ca/news/schulich-data-scientists-formulate-predictive-covid-19-dashboard/</a></p> <p><a href="https://yfile.news.yorku.ca/2020/04/01/schulich-develops-analytics-dashboard-to-predict-spread-of-covid-19/">https://yfile.news.yorku.ca/2020/04/01/schulich-develops-analytics-dashboard-to-predict-spread-of-covid-19/</a></p> |
| <p>John Gales is an Assistant Professor at York University in the Department of Civil ENgineering. Gales' primary research interests include resilient structural fire design, and human behaviour in emergency situations. Professor John Gales has done work on evacuation of stadiums and other high-occupancy buildings, looking at human behaviour as well as building design.</p>  | <p><a href="http://civil.lassonde.yorku.ca/john-gales/">http://civil.lassonde.yorku.ca/john-gales/</a></p>  |
| <p>Meditation expert applying mindfulness for COVID-19 coping, "A little-known fact," explains Paul Ritvo, professor in the School of Kinesiology and Health Science and Department of Psychology at York University, "is that by simply breathing outwards, we experience a reliable relaxation effect."</p>  | <p><a href="https://yfile.news.yorku.ca/2020/03/25/meditation-expert-applying-mindfulness-for-covid-19-coping/">https://yfile.news.yorku.ca/2020/03/25/meditation-expert-applying-mindfulness-for-covid-19-coping/</a></p>  |

|   |   |
|---|---|
| <p>Assistant Professor Michael Boni, in the School of Kinesiology and Health Science program, has this advice for anyone working from home. Millions of people around the world are staying home to follow rules around social distancing as a result of the COVID-19 pandemic. As many adjust moving from their office space to their work-from-home space, how can they prevent muscles and joints from stiffening and deteriorating?</p> | <p><a href="https://news.yorku.ca/2020/03/30/york-u-expert-taking-care-of-muscles-and-joints-during-a-pandemic/">https://news.yorku.ca/2020/03/30/york-u-expert-taking-care-of-muscles-and-joints-during-a-pandemic/</a></p>  |
| <p>Young people in isolation at home during the COVID-19 pandemic are becoming so immersed in social media that it could be damaging their emotional, physical and spiritual well-being, says Faculty of Education Professor Kate Tilliczek.</p>  | <p><a href="https://news.yorku.ca/2020/04/02/why-are-youth-flocking-to-tiktok-to-cope-with-the-covid-19-pandemic/">https://news.yorku.ca/2020/04/02/why-are-youth-flocking-to-tiktok-to-cope-with-the-covid-19-pandemic/</a></p>  |
| <p>Professor Eileen Fischer - Expert in entrepreneurial studies and marketing. She was quoted in a media article, week of March 16, addressing the financial impact on small business as a result of the pandemic.</p>  | <p><a href="https://schulich.yorku.ca/faculty/eileen-fischer/">https://schulich.yorku.ca/faculty/eileen-fischer/</a></p> <p><a href="https://globalnews.ca/news/6688839/how-to-support-local-businesses-during-coronavirus/">https://globalnews.ca/news/6688839/how-to-support-local-businesses-during-coronavirus/</a></p> |
| <p>Nazilla Khanlou's (Nursing, Women's Health Research Chair in Mental Health) new paper "Call for a Canadian Public Mental Health System: Transformative Change amid a Global Pandemic"</p>  | <p><a href="https://concurrentdisorders.ca/2020/03/31/call-for-a-canadian-public-mental-health-system/">https://concurrentdisorders.ca/2020/03/31/call-for-a-canadian-public-mental-health-system/</a></p>  |
| <p>Faculty of Education's Professor Tina Rapke offers advice on how to keep your kids busy (and learning) while schools are closed. Science shows the interactive approach to learning, which involves engaging in</p>  | <p><a href="https://edu.yorku.ca/2020/03/in-the-media-how-to-keep-your-kids-busy-and-learning-while-schools-are-closed/">https://edu.yorku.ca/2020/03/in-the-media-how-to-keep-your-kids-busy-and-learning-while-schools-are-closed/</a></p>  |

|  |  |
|--|--|
| <p>discussion with children and working together to solve problems, is proven to be most effective, said York University professor Tina Rapke.</p>   |  |
| <p>Gunho Sohn, Lassonde School of Engineering, is an expert in Digital Twin which can be used as virtual models for emergency situation. Research interests:</p> <ul style="list-style-type: none"> <li>• 3D Urban Space Modeling and Augmentation</li> <li>• Photogrammetric Computer Vision</li> <li>• Geometric Remote Sensing</li> <li>• Web and Wireless GIS</li> <li>• Building Information Modeling</li> </ul>  | <p><a href="https://lassonde.yorku.ca/users/gunhosohn">https://lassonde.yorku.ca/users/gunhosohn</a></p>                                       |
| <p>Expert in natural hazards and disaster management. Professor David Etkin has participated in three international hazard projects and was one of only 2 non-Americans to assist with their 2nd national assessment of natural hazards. He has been principal investigator for a NATO short term project on natural hazards and disasters and the Canadian Assessment of Natural Hazards Project that resulted in the book 'An Assessment of Natural Hazards and Disasters in Canada,' which he edited.</p> | <p><a href="https://news.yorku.ca/experts/index.php?dept=&amp;mid=498805">https://news.yorku.ca/experts/index.php?dept=&amp;mid=498805</a></p> |

| <p>Prof Cary Wu: In the United States, those states that are responding more quickly and effectively to the COVID-19 crisis also seem to have higher levels of social capital built up and citizens who trust more in their governments and health agencies, according to new research by York University Assistant Professor of sociology Cary Wu and team.</p> | <p><a href="https://bit.ly/2Lsxt4t">https://bit.ly/2Lsxt4t</a></p>   |
| <p>Stephen Gaetz: Provided guidance to UNECE on Responding to Homelessness in the Context of the Coronavirus Pandemic</p>  | <p><a href="https://www.homelesshub.ca/resource/responding-homelessness-context-coronavirus-pandemic">https://www.homelesshub.ca/resource/responding-homelessness-context-coronavirus-pandemic</a></p>   |

|  |  |
|--|--|
| <p>Stephen Gaetz: Being homeless means you are more vulnerable to the spread of infectious disease than are people with housing. The rigours of life on the streets mean that people experiencing homelessness have compromised health and are vulnerable to the spread of infectious disease. Our institutional response to homelessness that largely relies on emergency services such as shelters and day programs compounds the problem by forcing people into congregate settings that are often overcrowded, lack private spaces and do not have adequate resources to enhance and protect personal hygiene.</p> | <p><a href="https://www.homelesshub.ca/resource/covid-19-response-framework-people-experiencing-homelessness">https://www.homelesshub.ca/resource/covid-19-response-framework-people-experiencing-homelessness</a></p>         |

Droplet Lab, the York University spin-out company, has developed ways to rapidly fabricate much-needed components for PPE for frontline healthcare workers. The company, founded by Prof. Alidad Amirfazli from the Lassonde School of Engineering at York University, produces novel surface tensiometry instruments in normal days. However, with Coronavirus pandemic, it now wants to contribute to the global fight against COVID-19 by sharing its design and manufacturing capability. The face shield designed by Droplet Lab can be made under 5 minutes without the need for any specialized tool and at a significantly low cost (<\$2). Unlike other 3D printed versions, this design uses a wire frame, cutting the production time by at least 10 times. Also, no specialized tools are needed, which can free up, for example 3D printer currently used to make face shields, to be deployed for other purposes, e.g. ventilators. Droplet Lab is now seeking and talking to partners in healthcare industry to take this product to the hand of healthcare workers as soon as possible.
