York University
RESEARCH AWARDS CELEBRATION
April 2022
York’s community of changemakers is improving our understanding of a complex world

Welcome to the 2022 York University Research Awards Celebration!

Every year, this celebration is an opportunity to bring together York University’s vibrant community of world-class researchers, scholars, creators and innovators in recognition of their collective achievements.

In the face of the complex global issues affecting our world today — from climate change to inequality to the pandemic — York University has pioneered new approaches to addressing society’s most urgent demands through the discovery, application and translation of new knowledge, and reaffirmed its commitment to enhancing the wellbeing of the communities we serve.

We are immensely proud of the calibre, breadth and depth of our researchers’ outputs, and the many ways their unrelenting pursuit of open-minded inquiry has played a critical role in driving positive change in our local and global communities.

It is through our researchers’ invaluable contributions that York University has been able to achieve and maintain its standing as the number one institution for global joint research publications in Ontario, and its recognition as a global leader in advancing the United Nations’ 17 Sustainable Development Goals (UNSDGs).

On behalf of the entire University, thank you for your visionary leadership, bold ideas and dedicated efforts. Together, we can continue to challenge perceptions, raise the standards of excellence, and collaborate across borders, disciplines, and sectors of society to right the future.

Rhonda L. Lenton
President & Vice-Chancellor
York University

Amir Asif
Vice-President Research & Innovation
York University
York University President’s Research Awards

These awards recognize outstanding achievement among York’s community of researchers. The awards are adjudicated by the University Awards Committee recognizing outstanding emerging scholars, senior scholars and highly impactful research.
President’s Emerging Research Leadership Award (PERLA) Cluster 1

John Moores

Tier 2 York Research Chair in Space Exploration
Associate Professor, Lassonde School of Engineering

Moores was recognized with the President’s Emerging Research Leadership Award (PERLA) Cluster 1. Moores’ impactful ideas about organic chemistry, volatile ices, geomorphology and atmospheric processes on other planets have changed the way the field thinks about these subjects. His work has been published across numerous impactful journals such as Science and Nature. He has received over $3 million in research funds to support this work.

In addition to participating in science and operations teams of five international space missions, he is working with two companies to develop instruments to fly in space. This includes a novel Extreme Ultraviolet Camera that can detect ice on the moon in shadow by looking for reflected starlight and a sensitive Methane Spectrometer that has the potential to revolutionize our understanding of trace gasses in Mars’ Atmosphere and the planet’s potential for life. These instruments could fly before the decade is out, carrying the banner of York far beyond the campus boundaries.

Moores has built a diverse and inclusive research group, always seeking out opportunities to uplift his trainees. Over his time at York, members of his group have been awarded the NASA Group Achievement Award 16 times.

Moores’ accomplishments have been recognized in his election to the Royal Society of Canada (College of New Scholars, Artists and Scientists) in 2018, the awarding of a York Research Chair in Space Exploration in 2019, and his appointment as Associate Dean of Research and Graduate Studies in the Lassonde School of Engineering in 2020.
Amy Muise

*Tier 2 York Research Chair in Relationships and Sexuality Associate Professor, Faculty of Health*

Muise is recognized with the President’s Emerging Research Leadership Award (PERLA) Cluster 2 for demonstrating research excellence and innovation. Muise’s research focuses on the successful maintenance of romantic relationships, which is a key contributor to overall health and well-being. Her work uses diverse methods to best approximate couples’ daily experiences and relationship trajectories over time, including dyadic, daily experience, and longitudinal methods, and focuses on diverse populations, including long-term couples, new parents, clinical populations, and people in intercultural relationships. She is a Tier 2 Early Career York Research Chair in Relationships and Sexuality.

Muise has a thriving lab (the SHaRe lab) in which she investigates three interrelated lines of research on the motivations, perceptions, and behaviours that inform how couples can maintain desire and relationship satisfaction and successfully navigate conflicts of interest. This research has resulted in 100 empirical papers and book chapters to date (65 since beginning at York), many in top journals in her field, such as the *Journal of Personality and Social Psychology* and *Psychological Bulletin*. Since starting at York, she has been awarded more than $2 million in grant funding, including nine tri-council grants (three as principal investigator or co-principal investigator).

Muise’s lab has also already produced several excellent trainees: her graduate students and postdoctoral fellows have been awarded top scholarships and recognitions and have been successful in securing fellowships and academic positions.
Seyed Moghadas
Professor, Faculty of Science

Moghadas is recognized with the President’s Research Impact Award (PRIA). Moghadas is a global leader in the use of mathematical and computational models of disease epidemics and vaccination. His research is advancing public health capacity to detect and to manage emerging Canadian and global health crises. He has achieved a stellar reputation in his field and is making exceptional contributions to York’s research culture and beyond.

During the ongoing COVID-19 pandemic, his expertise has been in high demand and has been instrumental to setting and improving health policies both in Canada and the U.S. Moghadas served in an advisory role to the Public Health Agency of Canada as an expert on modelling approaches and to the Science Advisor of Canada as part of the COVID-19 Modelling Expert Group. He is also a member of the research team established by the Commonwealth Fund, which provides regular updates on the impact of COVID-19 interventions to the U.S. Administration and the Centre for Disease Control and Prevention. Over the past several years, Moghadas has held contracts with, or consulted for, additional national and international agencies, the National Collaborating Centre for Infectious Diseases, the Manitoba Health Pandemic Influenza Advisory Committee, Sanofi Pasteur Canada, and Pfizer Global. His findings have influenced both provincial and federal government health policies and have been applied globally by international corporations. Moghadas is the founding director of the Agent-Based Modelling Laboratory at York under the auspices of the Canadian Foundation for Innovation.

Through his extensive knowledge in mathematics and biology and his capacity for innovative thinking, Moghadas has pioneered exciting research paths in disease modelling and has applied his research findings directly to public health issues and policies, which has undoubtedly enhanced York’s research reputation. His evidence-based research has been published in tier-one journals of National Academy of Sciences, Nature Communications, and The Lancet series, among many other high impact publications.
Zheng Hong (George) Zhu
Tier 1 York Research Chair in Space Technology
Professor, Lassonde School of Engineering

Zheng Hong (George) Zhu is recognized with the President’s Research Excellence Award (PREA). Zhu has demonstrated outstanding research achievements and leadership as a visionary researcher in the field of space technology. Zhu’s research pushes the boundaries of space technology across multiple frontiers: propellant-less propulsion technologies using electrodynamic tethers and electric solar wind sail, multiphysics modeling and dynamic control of space tether systems, space debris removal for sustainable use of outer space, space robotics, and made-in-space 3D printing technology. In November 2020, he launched an electrodynamic tether satellite to test his model in space, the first electrodynamic tether mission in Canada. His leadership has shaped and continues to shape the international research agenda in space technology in Canada and internationally and is advancing the United Nations’ Sustainable Development Goals. He is a Tier 1 York Research Chair in Space Technology.

Currently, Zhu is leading a second York satellite mission as Principal Investigator. This mission is to train a team of interinstitutional undergraduate students to design, build and operate a cube satellite to monitor permafrost thawing in northern Canada from space using a low-cost CubeSat, which will be launched in late 2022. If successful, the technology will lower the access barrier for communities in remote areas to monitor the effects of global climate change on the thaw of permafrost and the associated impact on infrastructure such as roads, bridges, powerlines, and buildings in Indigenous communities. Zhu’s research on space technology has been highly regarded by funding agencies nationally and internationally with over $15.2 million in research grants. The most significant one is the $3.6M grant from Canada Foundation for Innovation for the research of made-in-space by 3D printing technology, the first of its kind in Canada. Zhu is also the recipient of 2021 W. Angus Medal of Canadian Society for Mechanical Engineering and the 2019 Engineering Medal - Research and Development of Ontario Professional Engineers & Ontario Society of Professional Engineers.
Extraordinary Research Honours

Awards in this category are among the most prestigious international and national awards researchers can receive.
Allan Carswell, FRSC  
*Physics Professor Emeritus, Faculty of Science*

Carswell received the Order of Ontario by the Province of Ontario for his leadership and philanthropy – as a physicist, space science innovator, and as a benefactor of the Allan I Carswell Observatory.

Sarah Flicker  
*Tier 2 York Research Chair in Community-Based Participatory Research  
Professor, Faculty of Environmental & Urban Change*

Flicker received the 2021 Canadian Association for HIV Research (CAHR) & Canadian Foundation for AIDS Research (CANFAR) Excellence in Research Award in Social Science. The awards are bestowed annually to mid-career researchers who have achieved a track record of excellence and demonstrated a commitment to improving the lives of those living with HIV or at risk.

Stephen Gill, FRSC  
*Distinguished Research Professor, Faculty of Liberal Arts & Professional Studies*

Gill received the prestigious 2021 Killam Prize for Social Sciences awarded by the Canada Council for the Arts. The award honours eminent Canadian researchers who have contributed to an outstanding impact on the lives of Canadians and people around the world. Gill was recognized for his scholarly excellence and impactful research on global affairs and international relations.
Joan Judge, FRSC  
*Professor, Faculty of Liberal Arts & Professional Studies*

Judge was awarded a Guggenheim Fellowship by the John Simon Guggenheim Memorial Foundation, which recognizes exceptional individuals in pursuit of scholarship in any field of knowledge from the U.S. and Canada. Judge received the prestigious award for her project “China’s Mundane Revolution: Cheap Print, Vernacular Knowledge, and Common Reading in the Long Republic, 1894-1955.”

Sandra Rehan  
*Associate Professor, Faculty of Science*

Rehan received the NSERC E.W.R Steacie Memorial Fellowship for her research in bee genomics, molecular ecology and behavioural genetics. The award recognizes early-stage academic researchers in natural sciences and engineering. Only six researchers are awarded per year.

Janet Walker  
*Professor, Osgoode Hall School of Law*

Walker was vested with the Order of Canada for her expert legal authority in commercial arbitration and conflict laws, and for advancing legal procedural standards in Canada.
This prestigious national program aims to attract and retain some of the world’s most promising minds from all disciplines to institutions across Canada. This year, York has welcomed two new and two renewed Canada Research Chairs for a total number of 33 chairholders.
Alan Corbiere
*Assistant Professor, Faculty of Liberal Arts & Professional Studies*

Corbiere was named a Tier 2 Canada Research Chair in Indigenous History of North America. His research aims to ‘re-right’ and “re-write” Indigenous history by privileging oral traditions, Anishinaabemowin and material culture, while reinterpreting colonial records for the purpose of revitalizing language, culture and knowledge.

Christopher Kyriakides
*Associate Professor, Faculty of Liberal Arts & Professional Studies*

Kyriakides was renewed as a Tier 2 Canada Research Chair in Citizenship, Social Justice and Ethno-Racialization. His research program focuses on configurations of racialization in relation to the meaning of East/West, South/North, and articulations of racism and nationalism in the reception of refugees.

Christina Sharpe
*Professor, Faculty of Liberal Arts & Professional Studies*

Sharpe was named a Tier 1 Canada Research Chair in Black Studies in the Humanities. Her program convenes the Black Still Life Research group as a new model of studying, bringing together established and emerging Black studies scholars, graduate students and visual and performing artists whose work investigates the myriad ways Black life is made and lived.

Sean Tulin
*Assistant Professor, Faculty of Science*

Tulin was renewed as a Tier 2 Canada Research Chair in Particle Physics and Cosmology. Tulin’s research provides new directions toward discovering dark matter’s elusive particle nature. By combining astrophysics, particle theory and cosmology, he is developing new ideas to illuminate dark matter’s particle dynamics through its effect on cosmic structure.
The YRC program recognizes the University’s outstanding researchers and is the internal counterpart to the Canada Research Chairs program. These five-year awards provide resources to accelerate and facilitate the Chairholder’s international research profile. They are awarded for established research leaders (Tier 1) and emerging research leaders (Tier 2). This award recognizes the 14 new YRCs appointed in 2021.
Nantel Bergeron
Professor, Faculty of Science

Bergeron was named a Tier 1 York Research Chair in Applied Algebra for his work in pioneering the development of the theory of combinatorial Hopf Algebras.

Doug Crawford
Distinguished Research Professor in Neuroscience, Faculty of Health
Scientific Director, Vision: Science to Applications (VISTA)

Crawford was named a Tier 1 York Research Chair in Visuomotor Neuroscience for his ground-breaking work at the York Centre for Vision Research, which focuses on the control of visual gaze in 3D space, eye-hand coordination and spatial memory during eye movements.

Lorne Foster
Professor, Faculty of Liberal Arts & Professional Studies

Foster was named a Tier 1 York Research Chair in Black Canadian Studies and Human Rights for his trailblazing work in public policy formation and scholarship on the human rights approach to inclusive organizational change.

Lyndsay Hayhurst
Assistant Professor, Faculty of Health

Hayhurst was named a Tier 2 York Research Chair in Sport, Gender and Development and Digital Participatory Research for her research on sport to support gender-related development goals, policies and practices.
Sean Hillier  
Assistant Professor, Faculty of Health

Hillier was named a Tier 2 York Research Chair in Indigenous Health Policy & One Health for his research on aging, living with HIV and other infectious disease and antimicrobial resistance, all with a concerted focus on policy affecting health care access for Indigenous Peoples in Canada.

Kerry Kawakami  
Professor, Faculty of Health

Kawakami was named a Tier 1 York Research Chair in Equity and Diversity for her research on implicit bias and how we perceive people from different socials groups, as well as strategies to reduce prejudice, stereotyping and discrimination.

Ozzy Mermut  
Associate Professor, Faculty of Science

Mermut was named a Tier 2 York Research Chair in Vision Biophotonics. Mermut is a biophysicist harnessing the power of light to study human aging and to develop diagnostics and therapeutic biophotonics to address age-related degenerative diseases.

Carmela Murdocca  
Professor, Faculty of Liberal Arts & Professional Studies

Murdocca was named a Tier 2 York Research Chair in Reparative and Racial Justice. Murdocca’s research examines racialization, criminalization and social histories of racial and colonial violence.
Lisa Myers
*Associate Professor, Faculty of Environmental & Urban Change*

Myers was named a Tier 2 York Research Chair in Indigenous Art and Curatorial Practice for her work as a curator and artist focused on contemporary Indigenous art.

Chun Peng
*Professor, Faculty of Science*

Peng was named a Tier 1 York Research Chair in Women’s Reproductive Health. Peng’s research program aims to understand the regulation of female production and the mechanisms underlying the development of ovarian cancer and preeclampsia.

Shayna Rosenbaum
*Professor, Faculty of Health*

Rosenbaum was named a Tier 2 Research Chair in Cognitive Neuroscience of Memory for her research on the different forms of memory presented in the brain.
Jennifer Steeves
Associate Vice President Research
Professor, Faculty of Health

Steeves was named a Tier 1 York Research Chair in Non-Invasive Visual Brain Stimulation. Her research examines how the brain adapts to changes in sensory input with the loss of one eye or to direct brain damage.

Ping Wang
Associate Professor, Lassonde School of Engineering

Wang was named a Tier 2 York Research Chair in AI-Empowered Next Generation Communication Networks for her research on wireless communications and networks.

Amro Zayed
Associate Professor, Faculty of Science

Zayed was named a Tier 2 York Research Chair in Genomics. Zayed’s research group sequences the genomes of thousands of bees to identify mutations that influence their economically and ecologically relevant traits to improve the health of Canadian honey bees.
Royal Society of Canada

The Royal Society of Canada (RSC) recognizes leading intellectuals, scholars, researchers and artists to help them build a better future in Canada and around the world. Fellows have made remarkable contributions in the arts, the humanities and the sciences, as well as in Canadian public life. The College of the New Scholars, Scientists and Artists recognizes emerging research excellence. The RSC also recognizes outstanding achievement through awards and medals. This year, York added four new Fellows, one new College Member and a Prize winner.
Philip Girard  
*Professor, Osgoode Hall School of Law*

Girard was elected as a Fellow of the Royal Society of Canada for his prize-winning work on the legal history of Canada.

Jane Heffernan  
*Associate Professor, Faculty of Science*

Heffernan was elected as a Member of the Royal Society of Canada’s College of New Scholars, Artists and Scientists in recognition of her leadership in infectious disease modelling.

Jennifer Hyndman  
*Associate Vice-President Research, Professor, Faculty of Environmental & Urban Change*

Hyndman was elected as a Fellow of the Royal Society of Canada for her research on geographies of forced migration, ethnography of the international refugee regime, feminist geopolitics, critical refugee studies and extended exile.
Michele Johnson
Professor, Faculty of Liberal Arts & Professional Studies
Johnson was elected as a Fellow of the Royal Society of Canada, recognized for her international leadership in Black History.

Christina Petrowska Quilico
Professor, Faculty of Arts, Media, Performance & Design
Petrowska Quilico was elected as a Fellow for her celebrated career as a classical and contemporary pianist and for championing Canadian music.

Poonam Puri
Professor, Osgoode Hall School of Law
Puri received the Yvan Allaire Medal from the Royal Society of Canada for her work as one of the world’s leading scholars of corporate governance, corporate law, securities regulation and investor protection.
Artistic & Creative Accomplishments

Awards in this category recognize artistic and creative accomplishments that enrich creative and cultural expression and understanding. It includes accomplishments in film, dance, art and more.
Patrick Alcedo
Associate Professor, Faculty of Arts, Media, Performance & Design
Alcedo received the Cannes Indies Cinema Awards’ Best Short Documentary for the film They Call Me Dax and the All-Asian International Independent Film Festival for the film A Will to Dream.

Michael Greyeyes
Professor, Faculty of Arts, Media, Performance & Design
Greyeyes won the Performance by an Actor in a Leading Role for his work in the film Blood Quantum from the 2021 Canadian Screen Awards.

John Greyson, FRSC
Associate Professor, Faculty of Arts, Media, Performance & Design
Greyson won the Teddy for the Best Short Film for his work “International Dawn Chorus Day” at the 71st Berlin International Film Festival’s Berlinale Shorts.
Katherine Knight  
*Professor, Faculty of Arts, Media, Performance & Design*

Knight received the Rogers Audience Award at the 2021 Hot Docs Festival for her film *Still Max*.

Mark Terry, FRSC  
*Adjunct Professor, Faculty of Environment & Urban Change  
Research Fellow, Dahdaleh Institutie for Global Health Research*

Terry received an Honourable mention from the UN SDG Action Awards for his work on *The Youth Climate Report*, a documentary film project.
Book Prizes

This category recognizes York’s scholars who have produced outstanding publications lauded by their peers.
Alison Crosby
Associate Professor, Faculty of Liberal Arts & Professional Studies

Crosby received the 2021 Lemkin Book Award from the Institute for the Study of Genocide. She co-authored *Beyond Repair? Mayan Women’s Protagonism in the Aftermath of Genocidal Harm*, which examines Mayan women and their search for redress for harm suffered during genocide.

B.W. Powe
Associate Professor, Faculty of Liberal Arts & Professional Studies

Powe received the Media Ecology Association’s 2021 Marshal McLuhan Book Award for his book *The Charge in the Global Membrane*.

Gregory D. Saxton
Associate Professor, Schulich School of Business

Saxton won the Academy of Management’s 2021 Public and Nonprofit Division’s Best Book Award for his book *The Quest for Attention: Nonprofit Advocacy in a Social Media Age*, co-authored with Chao Guo (University of Pennsylvania).
Discipline-Specific Society Fellowships and Awards

This category reflects York scholars whose leadership in the field is reflected by election to academic societies in their field and awards from these bodies.
Gene Cheung
Associate Professor, Lassonde School of Engineering
Cheung was named a Fellow of the Institute of Electrical and Electronics Engineering for contributions to graph spectral image processing and interactive video streaming.

Alex Czekanski
Associate Professor, Lassonde School of Engineering
Czekanski was elected to Fellowship by the Canadian Engineering Education Association for his contributions to engineering in Canada, including the creation and launch of the Mechanical Engineering program at Lassonde.

Steven Hoffman
Dahdaleh Distinguished Chair in Global Governance & Legal Epidemiology
Professor, Faculty of Health & Osgoode Hall School of Law
Hoffman was elected to Fellowship in the Canadian Academy of Health Sciences, one of the highest honours in the Canadian health sciences community, for his leadership in global health law and global health governance.

Joel Katz
Tier 1 Canada Research Chair in Health Psychology
Professor, Faculty of Health
Katz received the Senior Investigator Award for Health Psychology/Behavioural Medicine from the Canadian Psychological Association for his contributions to psychological science.
Richard Leblanc  
*Professor, Faculty of Liberal Arts & Professional Studies*

Leblanc was named an Academic Fellow of the International Council of Management Consulting Institutes (ICMCI) for his outstanding contribution to the management consulting profession.

Marin Litoiu  
*Professor, Lassonde School of Engineering & Faculty of Liberal Arts & Professional Studies*

Litoiu was inducted as a Fellow of the Canadian Academy of Engineering. He leads the Centre for Research in Adaptive Software, which focuses on the development of adaptive and self-managing systems and is considered one of the pioneers of the field of self-adaptive software (SAS).

Rebecca Pillai Riddell  
*Professor, Faculty of Health*

Pillai Riddell was elected to Fellowship to the Canadian Academy of Health Sciences for her research on pediatric and behavioural sciences, as well as for establishing the first and largest cohort in the world studying young children through painful vaccinations over the first years of life.

Poonam Puri  
*Professor, Osgoode Hall School of Law*

Puri won the 2021 David W. Mundell Medal from the Ontario Attorney General’s Office, an award considered the “Pulitzer Prize” of legal writing. She also received the Law Society Medal from the Law Society of Ontario.
Shahirose Premji  
*Director and Professor, Faculty of Health*

Premji was named a Fellow of the Canadian Academy of Nursing by the Canadian Nurses Association, which honours individuals who have demonstrated sustained impact across nursing health systems in any given domains of practice. Premji’s research examines the role of psychosocial factors on preterm birth.

Sandra Rehan  
*Associate Professor, Faculty of Science*

Rehan was inducted as a Fellow in the Linnean Society of London in recognition of her work leading contributions to natural history research, including taxonomy, biology and ecology.

Jinjun Shan  
*Professor, Lassonde School of Engineering*

Shan was named a Fellow of the Engineering Institute of Canada for his expertise in the field of dynamics control and navigation, which is advancing fundamental knowledge and engineering applications of autonomous systems, multi-agent systems and space instrumentation.

George Zhu  
*Tier 1 York Research Chair in Space Technology \nProfessor, Lassonde School of Engineering*

Zhu was awarded the Robert W. Angus Medal from the Canadian Society for Mechanical Engineering for his outstanding contributions to mechanical engineering practice in Canada.
Major Grants

This category recognizes researchers who are leading major research initiatives that can advance our understanding of the world and address societal challenges. These researchers have brought in large-scale funding and secured awards in highly competitive programs.
Satinder Brar
James and Joanne Love Chair in Environmental Engineering
Professor, Lassonde School of Engineering

Brar was recognized for winning an NSERC CREATE Grant for the project “Training in Applied Biotechnology for Environmental Sustainability” (TABES). TABES will provide students with a mix of theoretical, practical and real-world knowledge to incorporate skills and experience to support sustainable waste management.

Elizabeth Clare
Assistant Professor, Faculty of Science

Clare is a co-lead for BIOSCAN, a research program that is harnessing new technologies to make DNA barcoding faster and less expensive. The project is supported by Genome Canada.

Amrita Daftary
Assistant Professor, Faculty of Health

Daftary received funding from the U.S. National Institutes of Health for her research in collaboration with the Desmond Tutu HIV Foundation to examine stigma and social determinant effects on tuberculosis case detection, care and outcomes.

Luann Good Gingrich
Director, Global Labour Research Centre
Professor, Faculty of Liberal Arts & Professional Studies

Good Gingrich co-led a successful application to the Feminist Response and Recovery Fund for her project “Creating Space: Precarious Status Women Leading Local Pandemic Responses”, provided by Women and Gender Equality Canada. The research examines issues of equity, diversity and inclusion to advance a feminist response to the impacts of COVID-19 through systematic change.
Shooka Karimpour  
*Assistant Professor, Lassonde School of Engineering*

Karimpour is leading a large-scale NSERC Alliance Grant in collaboration with Environment and Climate Canada, and the Ontario Ministry of Environment, Conservation, and Parks. The research is tackling the spread of plastics in aquatic systems.

Heidi Matthews  
*Assistant Professor, Osgoode Hall School of Law*

Matthews co-led a successful application to the Feminist Response and Recovery Fund for her project “Creating Space: Precarious Status Women Leading Local Pandemic Responses” for Women and Gender Equality Canada.

Muriel Peguret  
*Associate Professor, Glendon College and Faculty of Education*

Peguret’s leadership of the Camerise Project, a transformational tool developed to ensure access, inclusion and engagement for language learners, resulted in significant funding from the Canadian Heritage Foundation and the Ministry of Education to improve resources for teaching French as a second language.

Dominique Scheffel-Dunand  
*Associate Professor, Faculty of Liberal Arts & Professional Studies*

Scheffel-Dunand’s leadership of the Camerise project resulted in significant funding from the Canadian Heritage Foundation and the Ministry of Education. She has been recognized for her contribution in improving resources for teaching French as a second language.
Mary Wiktorowicz  
*Professor, Faculty of Health*

Wiktorowicz is leading an international consortium for the Joint Programming Initiative on Antimicrobial Resistance Transnational Call for Research Projects: Designing One Health Governance for Antimicrobial Stewardship. The research seeks to addresses global challenges posed by Antimicrobial Resistance.

Jianhong Wu  
*Tier 1 Canada Research Chair in Industrial and Applied Mathematics*  
*NSERC/Sanofi Industrial Research Chair in Vaccine Mathematics, Modelling and Manufacturing*  
*Distinguished Research Professor, Faculty of Science*

Wu co-led a successful NSERC Emerging Infectious Disease Modelling Initiative application for the Mathematics for Public Health. The project will establish a pan-Canadian emerging infectious disease modelling network that aims to apply advanced mathematical techniques to help achieve public health objectives.

George Zhu  
*Tier 1 York Research Chair in Space Technology*  
*Professor, Lassonde School of Engineering*

Zhu was awarded an NSERC CREATE Grant for his project “Smart Autonomous Robotic Technology for Space Exploration (SMART-ART)”, which will offer experiential industry-oriented training to undergraduates, graduate and postdoctoral fellows to address skills shortage in the Canadian space sector.

Huaiping Zhu  
*Tier 1 York Research Chair in Applied Mathematics*  
*Professor, Faculty of Science*

Zhu was successful in leading the NSERC Emerging Infectious Disease Modeling Initiative Application for the One Health Modeling Network. The project uses multidisciplinary knowledge about connections between environmental, animal and human health to refine the disease modelling that is used to identify pathogens early.
Outstanding Knowledge Mobilization & Impact

This category recognizes York researchers who have demonstrated outstanding knowledge mobilization and impact through important connections outside of academia to disseminate and translate research results to the benefit of society.
Dawn Bazely  
Professor, Faculty of Liberal Arts and Professional Studies  
Bazely was awarded a Minister of Colleges and Universities Award of Excellence for future proofing learning, which recognizes faculty and staff who are leading the way in adapting programming that supports new ways of learning for Ontario students.

Don Dippo  
University Professor, Faculty of Education  
Dippo was awarded a Minister of Colleges and Universities Award of Excellence for his contributions to opening post-secondary education to marginalized groups through the programs like the Advanced Credit Experience and Success Beyond Limits for the Jane and Finch Community (Toronto) and the Borderless Higher Education for Refugees program serving the Dadaab Refugee Camp in Kenya.

Sakis Gekas  
Associate Professor, Faculty of Liberal Arts & Professional Studies  
Gekas is recognized for leadership in Greek-Canadian history. His project resulted in a substantial donation from the Hellenic Heritage Foundation to establish the Hellenic Heritage Foundation Greek Canadian Archives to help York preserve, catalogue, digitize and teach Greek-Canadian history.

Ruth Green  
Associate Professor, Faculty of Liberal Arts & Professional Studies  
Green was awarded the Mino Bimaadiziwin Award from the City of Toronto. Green was recognized for her leadership as an anti-violence advocate, researcher, community-based educator and for her contributions to Indigenous communities.
Jane Heffernan  
*Associate Professor, Faculty of Science*

Heffernan was appointed as the Scientific Advisor for Canada’s COVID-19 Immunity Task Force Modeling Initiative.

Steven Hoffman  
*Dahdaleh Distinguished Chair in Global Governance & Legal Epidemiology*  
*Professor, Faculty of Health & Osgoode Hall School of Law*

Hoffman was invited as a member of the Inter-American Dialogue Health Task Force to support the development of a post-COVID-19 plan for the Americas.

Seyed Moghadas  
*Professor, Faculty of Science*

Moghadas was recognized for his research leadership on the rollout of COVID-19 vaccines. Notably, he was one of three lead authors on a widely circulated study commissioned by the White House and published in the Issue Briefs of the Commonwealth Fund.
Outstanding Early Career Researchers

This award recognizes the outstanding research contributions of faculty members who are at the early stages of their academic careers.
Katrina Cohen-Palacios  
*York University Libraries*

Cohen-Palacios was awarded the 2021 Emerging Leader Award by the Archives Association of Ontario for her contributions as an archivist, including in the discourse and workflow related to Canadian archives and linked data, an emerging area of archival outreach and collaboration.

Sheila Colla  
*Tier 2 York Research Chair in Interdisciplinary Conservation Science*  
*Assistant Professor, Faculty of Environmental & Urban Change*

Colla received the 2021 C. Gordon Hewitt Award from the Entomological Society of Canada for her international leadership in the conservation of pollinators, particularly bumblebees, which has translated her research into political action and policy changes.

Zhen Ming (Jack) Jiang  
*Professor, Lassonde School of Engineering*

Jiang received the CS-Can | Info-Can Outstanding Early Career Computer Science Researcher Prize. Jiang is a pioneer in the field of load testing analytics, which are essential for large- and ultra-large scale software systems.
Molade Osibodu
Assistant Professor, Faculty of Education

Osibodu received the 2021 Pat Clifford Award for emerging researchers presented by the EdCan Network for her research in mathematics and social justice, and her equitable approaches to ensure Black students feel seen and valued in their learning.

Pouya Rezai
Associate Professor, Lassonde School of Engineering

Rezai was awarded the IW Smith Award from the Canadian Society of Mechanical Engineering for creative outstanding contributions to Mechanical Engineering achieved less than 10 years after receiving a PhD. His work in multi-phase fluid dynamics within microfluidic and Lab-on-Chip (LoC) devices has helped understand interactions between biological nano- and micro-particles.

Ali Sadeghi-Naini
Tier 2 York Research Chair in Quantitative Engineering and Smart Biomarkers Associate Professor, Lassonde School of Engineering

Sadeghi-Naini received an Early Researcher Award from the Government of Ontario for his project: “Smart quantitative imaging biomarkers for personalized breast cancer care.” The research is developing multi-modal quantitative imaging technologies that can predict and evaluate the response of individual breast cancer patients to chemotherapy before or early after treatment initiation.
Postdoctoral Awards

York is proud to recognize the research accomplishments of our postdoctoral fellows.

Mohammad Naderi  
Faculty of Science  
Banting Postdoctoral Fellowship

Vasily Panferov  
Faculty of Science  
Banting Postdoctoral Fellowship

Cynthia Morinville  
Faculty of Environmental & Urban Change  
SSHRC Postdoctoral Fellowship

Kristina Schrage  
Faculty of Health  
SSHRC Postdoctoral Fellowship

Jenna Congdon  
Faculty of Health  
NSERC Postdoctoral Fellowship

Godwin Dazh  
Osgoode Hall School of Law  
Provostial Postdoctoral Fellowship for Black and Indigenous Scholars

Don Davies  
Faculty of Science  
Provostial Postdoctoral Fellowship for Black and Indigenous Scholars

De-Lawrence Lamptey  
Faculty of Health  
Provostial Postdoctoral Fellowship for Black and Indigenous Scholars

Ruth Murambadoro  
Faculty of Liberal Arts & Professional Studies  
Provostial Postdoctoral Fellowship for Black and Indigenous Scholars

Kirsten Melissa Lee  
Faculty of Health  
CIHR Health System Impact Fellowship
CONGRATULATIONS

to York University’s Research Awards Recipients!
