Brentwood Branch
Professor Gregory Thiemann

Bringing Back the Birds
Tuesday October 23 at 6-7 pm,
Lillian H. Smith Branch
Professor Bridget Stutchbury

Bad Reputations: Cormorants and Conservation
Saturday October 27 at 2-3 pm,
Deer Park Branch
Professor Gail Fraser

Biodiversity

Conservation in the Twenty-First Century

The resilience of our planet and the future of humanity rely on biodiversity. After all, biodiversity is the reason why we have air, food, water and medicines. But biodiversity is vulnerable, and in many cases in crisis around the world.

In this series of talks, we consider biodiversity in Canada and abroad and explore what is being done to understand and conserve the fascinating animals that have the current attention of researchers.
