
YORK UNIVERSITY SCIENCE SCHOLARS AWARD

APPLICATION GUIDELINES

Seeking Applicants of Exceptional Promise

Who can apply?

All students, Canadian and International, who have applied for entrance to the York University Faculty of Science are eligible to apply for this program. Newly enrolled first year Faculty of Science students are eligible to receive this award.

Application components

- **Application Form** - please complete the general scholarship application form.
- **Resume** - please include a resume with information such as your academic, extracurricular, and volunteer activities and achievements/awards.
- **Reference Letters:** please include at least two but no more than three reference letters, only **one** of which is from a teacher. **Each reference letter must be submitted with the reference letter form found here. References must be received by the application deadline date of April 1, 2021.** Your references may be submitted in two ways:
Digital: please have your referee submit the reference form directly to us at science@yorku.ca.
Hard copy: please have your referee insert the reference form in an envelope and seal it prior to giving it to you. Please have them sign the flap once it is sealed. Include the reference letters in your application package.
- **Personal Statements** on selected topics. The guidelines and topics may be found here.
- **Transcripts:** A candidate's academic performance is a very important factor in the award assessment. However, applicants do **NOT** need to send extra transcripts. We will review your academic performance based on transcripts that have already been sent as part of your application to York University's Faculty of Science. All academic assessments will be based on grades that we have already received. All final awarding of the YSSA is contingent upon maintaining the same academic average (within one to two percentage points) for which the recipient was awarded the York Science Scholars Award.

What makes a competitive application?

Applications are assessed holistically with a number of factors considered. The quality of applicants is high and competitive applicants tend to have:

- high academic achievement (minimum 80% admission average or equivalent)
- passion for science
- community service experiences and a desire to make a difference for their communities
- demonstrated leadership skills,
- demonstrated involvement in activities beyond academics.
- For international students requiring the English language test for admission, competitive scores are:

YELT: band 1
TOEFL: iBT 100
IELTS: 7.5

YORK UNIVERSITY SCIENCE SCHOLARS AWARD APPLICATION GUIDELINES (continued)

Submitting your application

Please submit YSSA applications directly to the Faculty of Science either digitally or in hard copy by no later than April 1, 2021 at 11:59PM.

Digital submission: Submissions may be made digitally by [clicking here](#) or on the York Science Scholars Award website.

Hard copy submission:
York Science Scholars Award
Faculty of Science, York University
4700 Keele St.
352 Lumbers Building
Toronto, ON M3J 1P3

Documents must be received and date stamped by the Faculty of Science by April 1, 2021 at 11:59PM.

Application deadline:

Applications for the York Science Scholars Award close as of April 1, 2021, 11:59PM.

Successful applicants will be informed of their status by the end of May 2021.

How does the YSSA program work?

York Science Scholars Awards are assessed separately and independently from any other York University Entrance Awards. As a result, recipients are eligible for the YSSA regardless of any other awards that they may receive.

York Science Scholars will receive a \$10,000 entrance scholarship which will be awarded in two parts.

The first as an entrance scholarship and the second part once the experiential component is successfully completed. The first \$5,000 will be awarded upon full-time enrolment to York University's Faculty of Science. The second part is linked to the 12-week experiential component of the YSSA program (research placement or mentorship experience), overseen by a Faculty of Science professor during the summer following the recipient's first year of study.

Recipients must achieve a B+ average during the first year of study in order to be eligible for the experiential component. The receipt of the second \$5,000 part of the scholarship is contingent upon successful completion of the experiential component and upon enrolment in the following term of study.
