Biomedical Science
BSc, iBSc | www.yorku.ca/science/biomedical-science

Program Overview

Offered as an Honours-level stream in the Biology program, Biomedical Science students will enroll in biology, chemistry and other science courses while maintaining enough flexibility in their course timetable to explore individual interests in complementary disciplines. Working with an academic advisor, students will plan their courses to meet their own personal, academic and future career goals.

Starting in first year, students are introduced to both classroom and laboratory work and begin developing their understanding of the fundamental processes of life at the molecular, cellular and population levels. As students move through the program they choose from an extensive variety of science and non-science courses to tailor their degree to their individual interests. Additional options in the final years of the program allow for specialized study in areas such as:

- Cancer
- Neurobiology
- Pharmaceutical chemistry
- Immunobiology
- Human molecular genetics

These courses are taught by professors involved in cutting edge research, thereby providing a real world context for the material students cover in class.

Admission Requirements

- ENG4U, MHF4U, SBI4U, SCH4U
- Recommended: SPH4U
- Minimum admission average: low 80s – mid 80s

First Year Courses:
- Biology
- Chemistry
- Calculus
- Computer Use
- General Education Courses

Second Year Courses:
- Cell Biology and Biochemistry
- Genetics and Organic Chemistry
- Statistics for Biologists
- Physics or Psychology
- General Education Courses

Upper Year Options:
- Cell and Molecular Basis of Muscle Physiology
- Vertebrate Endocrinology
- Comparative Chordate Anatomy
- Human Molecular Genetics
- Regulation of Gene Expression
- Pharmaceutical Chemistry
- Animal Physiology
- Cellular Regulation
- Neurobiology
- Genomics
- Proteomics
- Biology of Cancer
- Virology
- Immunobiology
- Microbiology
Experiential Education

The Faculty of Science provides a rich diversity of opportunities for undergraduate students to engage in Experiential Education. The Internship Program provides students in this program with the opportunity to integrate their classroom learning with hands-on, paid, work experiences related to their field of study. Internship students will begin their work term(s) after their third year of classroom study and can take part in 4, 8, 12, or 16 months of work before returning to school to complete their studies.

Here are just a few of the companies you could have the opportunity to work for:

- Sanofi Pasteur
- Health Gene Corporation
- Parks Canada
- City of Toronto
- Apotex

Possible Career Pathways

Your studies in Biomedical Science at York will prepare you for a very diverse range of career options.

- Biology Research – academic, government, industry
- Biological Engineer
- Cardiovascular Technician
- Epidemiologist
- Technical Writer
- Community Health Educator
- Optician
- Industry – technical information, product information, sales
- Education – elementary, high school, college, university
- Professional Schools – Medicine, Dentistry, Pharmacy, Veterinary, etc.

“I chose York Science because of the ability the program gave me to really customize my degree to fit and cater to my wants and needs. There are different courses you can take to focus on molecular genetics or animal physiology, or anatomy. The wide range of courses offered by York Science allowed me to design my degree to get the best out of the four years I spent at York.”

- Matt, Biomedical Science Alumni
