

CPR Self-Study Workshop 2: Curriculum and Learning Outcomes

SAMANTHA CUTRARA, PHD
PROGRAM DEVELOPMENT AND
CURRICULUM INNOVATION SPECIALIST

Goals

- To introduce you to the concepts referenced in the self-study about curriculum and assessments
 - Program Objectives
 - Learning Outcomes
- To prepare you for the work involved with program objective and learning outcome definition, mapping, and assessment
- To show you what resources are available

Commitment

By the end of this workshop, you will have information to be able to:

- Know what is expected from you in questions 3.5-3.11 UG / 3.9-3.15 G
- Define program objectives and program learning outcomes, identify differences between them, reflect on what these may be in your program
- Determine how best to engage in the process of (re)defining, mapping, and assessing your program's objectives and outcomes
- Identify steps and supports to complete these areas of the self study

What is Curriculum?

- Etymology: A course to run
- Calvinist tradition: An ordering of education
- All educational experiences have a curriculum, even when it is not defined
- The plan (explicit or implicit) of what someone should know/do/value at the end of an educational experience
- Eight different kinds of curriculum

<https://www.metmuseum.org/perspectives/articles/2021/7/ancient-greek-olympic-games>

Eight types of curriculum

1. Written Curriculum
2. Hidden Curriculum
3. Taught Curriculum
4. Assessed Curriculum
5. Supported Curriculum
6. Recommended Curriculum
7. Excluded/Null Curriculum
8. Learned Curriculum

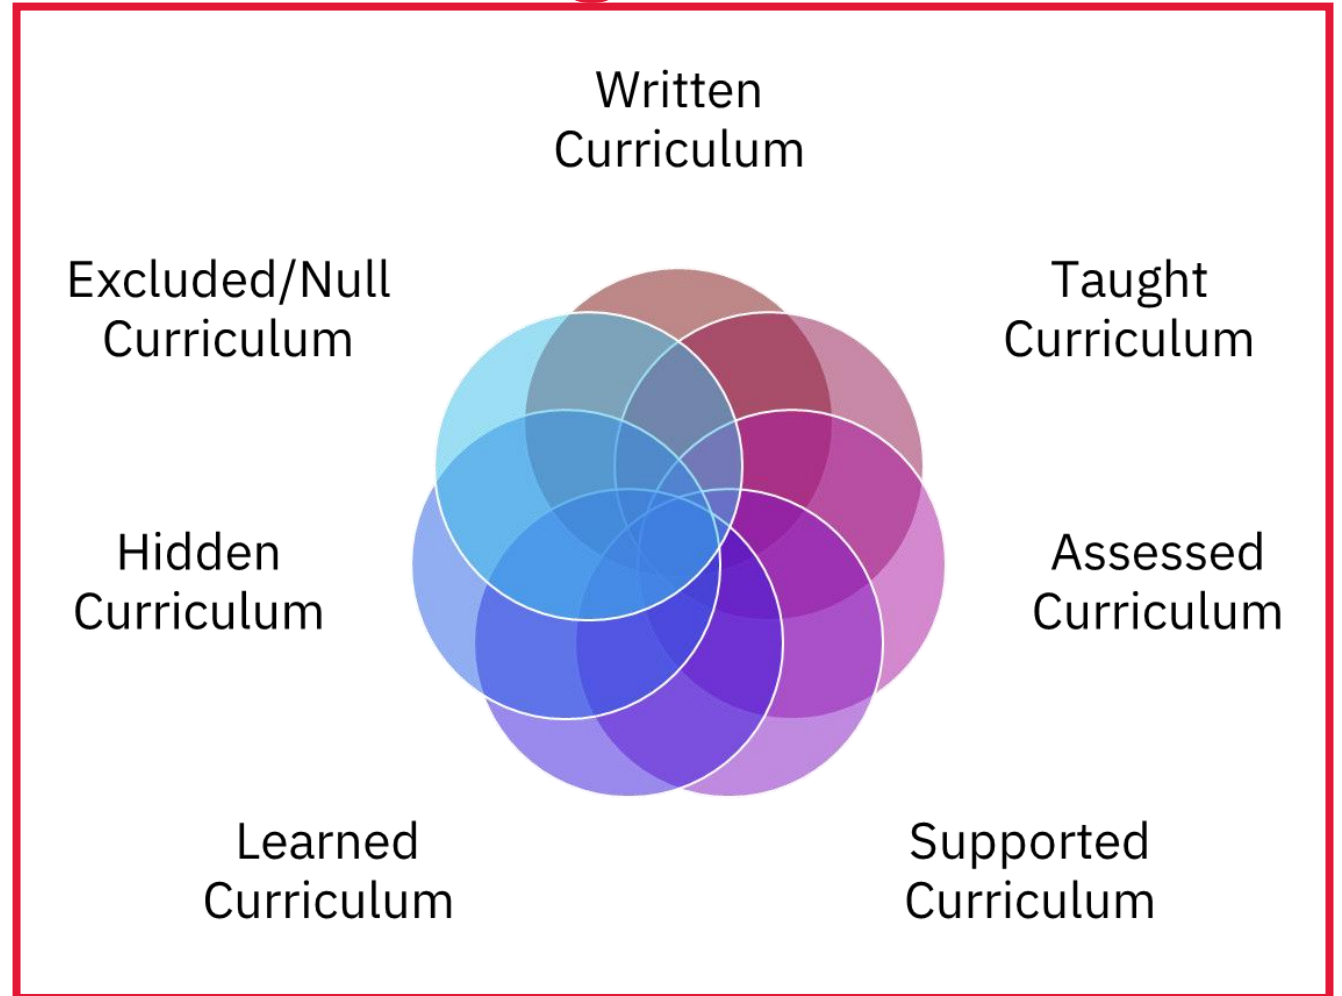

There is “hidden” elements in all these.

Assumptions, values, standards, expectations, etc

And this can remain hidden from us too

Eight types of curriculum should work together

1. Written Curriculum
2. Hidden Curriculum
3. Taught Curriculum
4. Assessed Curriculum
5. Supported Curriculum
6. Recommended Curriculum
7. Excluded/Null Curriculum
8. Learned Curriculum

If curriculum is...

- A plan of what students are supposed to learn

Then higher education curriculum would be...

- The plan of what students are supposed to learn in their degree program
- Historically, this plan has been *implicit* with program requirements written down, but content defined by The Field

Movement to More Explicit Curriculum

- Make degrees more responsive to needs beyond academia
- Accountability; Assure the quality of programs
 - For Canadian universities to be seen as a “quality” institution – (a [Universities Canada](#) member) – they need to meet certain [criteria](#), one of which is a quality assurance policy and procedure process

Other Effects of Explicit Curriculum

- More student-centric education
- More opportunities to work through “hidden” aspects based in oppressive traditions

Clear/Explicit Curriculum

Clarifies the teaching and learning relationship

Clear/Explicit Curriculum

Identifies:

- Goals
- Commitments
- Requirements

What the PLAN is

In the self study, you will be asked about:

The **explicit** curriculum of the program:

Goals/Objectives

Commitments/
Outcomes

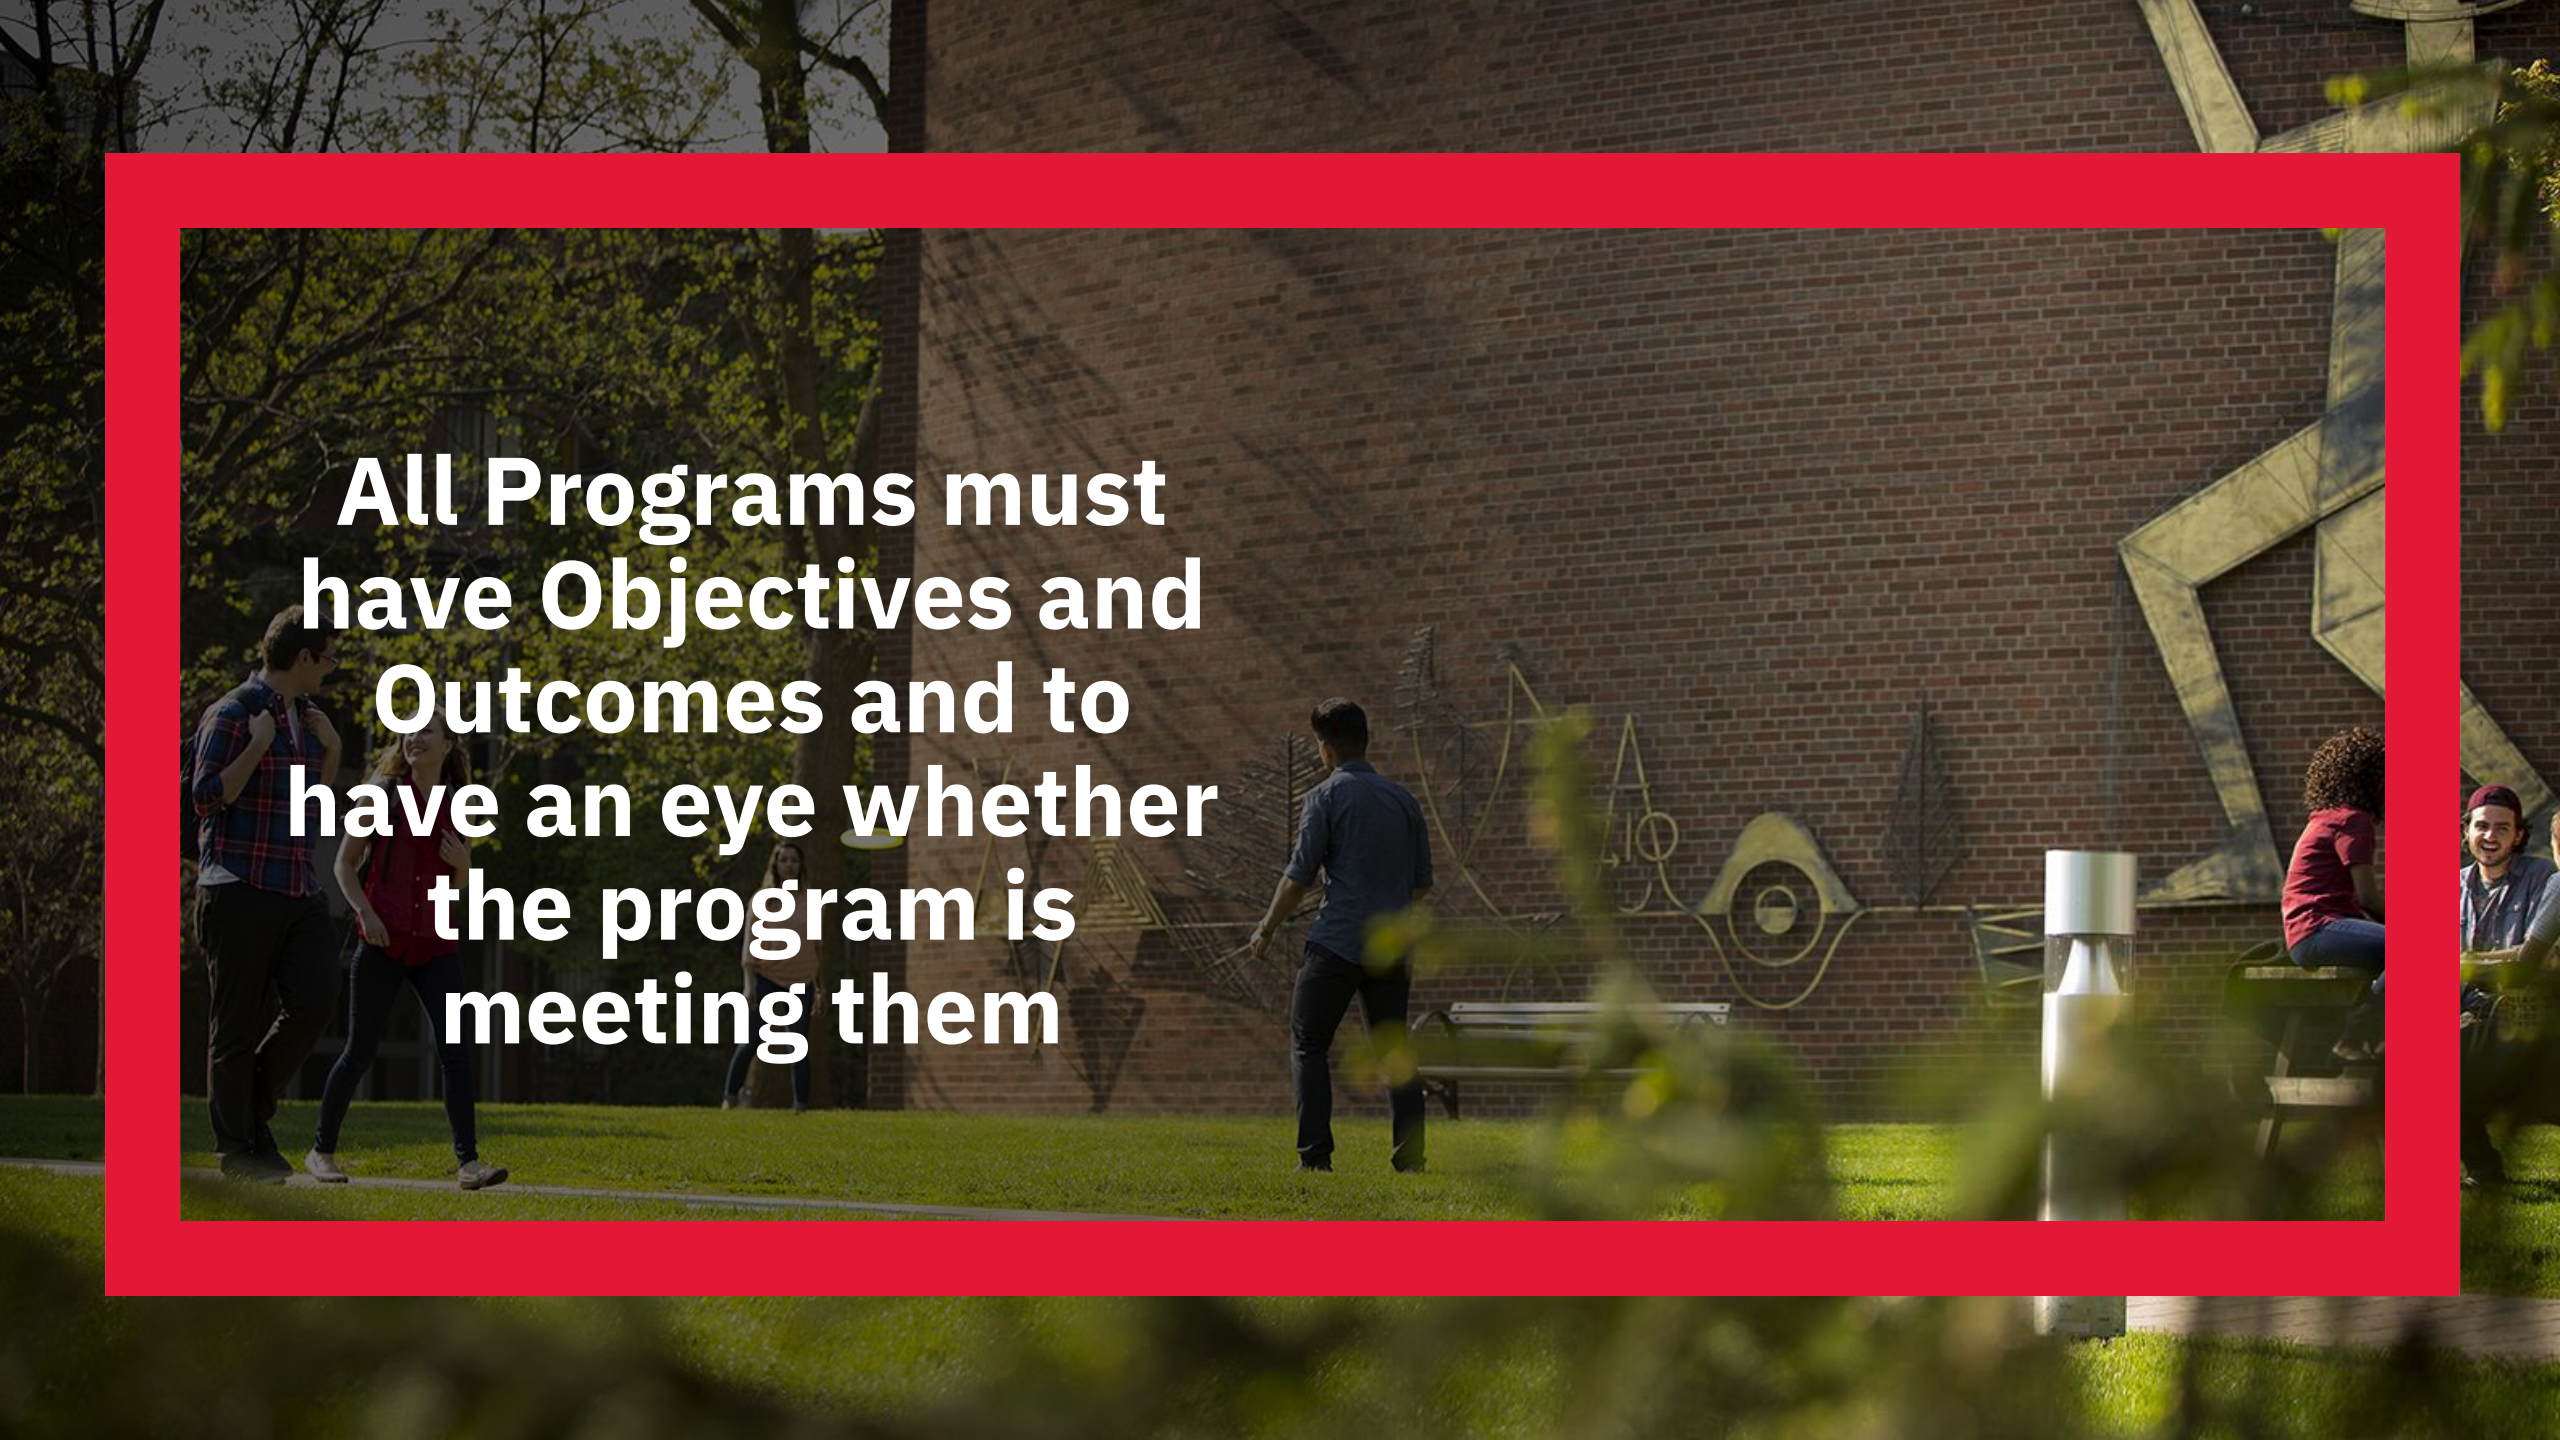

Requirements

How you are assessing whether your program curriculum, and all its pieces, are doing what you planned for it to be doing

In other words:

- ▶ What is the overall plan of your program?
- ▶ How do the pieces work together?
- ▶ How are you keeping an eye on this?
- ▶ How might you course correct if you're off track?

**All Programs must
have Objectives and
Outcomes and to
have an eye whether
the program is
meeting them**

The Self Study will involve conversations/agreements in the program about:

- ▶ The program's goals/objectives and commitments/outcomes

- ▶ How individual courses (and other program activities) work together to activate these goals and outcomes

- ▶ How you currently keep track of this (i.e. course assessments?)

- ▶ What the plan is to keep track of this in the future

Objectives and Outcomes in the Self Study

Objectives

- 2.1 Describe the program(s) and its objectives.
- 3.11/3.14 Describe the program's methods for monitoring and assessing how the program is achieving its objectives.

Outcomes

- 3.5/3.9 List your Program Learning Outcomes.
- Describe and/or map how your Program Learning Outcomes map onto Ontario's [Degree Level Expectations](#). **(Template provided)**
- Describe and map how your Program Learning Outcomes are achieved through the curriculum and structure of your program. **(Curriculum map)**
- Describe and map how student achievement is assessed and documented in relation to the Program Learning Outcomes.
- Describe how the methods and criteria for assessing student achievement are appropriate and effective relative to the Program Learning Outcomes.
- How does the program monitor and assess the ways student cohorts are achieving the Program Learning Outcomes?
- Describe how the Program Learning Outcomes communicated to students.

Program Objectives

- These are the GOALS of your program
- Quality Council writes that Program Objectives:
 - Explain the potential applications of the knowledge and skills acquired in the program;
 - Situate the program in the context of the discipline as a whole
 - Are broader in scope than Program Learning Outcomes

<https://oucqa.ca/guide/program-objectives-and-program-level-learning-outcomes/>

What are your Program's Goals?

YORK 

- To develop critical thinkers
- To connect research and industry together to develop professionals who can respond to the needs of the 21st century
- To develop lifelong learners who value art and culture
- To ensure students understand the ways Indigenous knowledges can be integrated in STEM careers

How do you ensure you're meeting these goals?

YORK 

- To develop critical thinkers
- To connect research and industry together to develop professionals who can respond to the needs of the 21st century
- To develop lifelong learners who value art and culture
- To ensure students understand the ways Indigenous knowledges can be integrated in STEM careers

How do you ensure you're meeting these goals?

This needs a plan, with a schedule, to look into these and course correct if necessary

- **To ensure students understand the ways Indigenous knowledges can be integrated in STEM careers**

- Require all core courses to have Indigenous content
- To have courses related to career development
- Host bi-yearly special seminars with career leaders
- To work closely with Indigenous Council (IC) on assessing and discussing the ways this goal is being achieved

Program Learning Outcomes

Outcomes

- 3.5/3.9 List your Program Learning Outcomes.
- Describe and/or map how your Program Learning Outcomes map onto Ontario's [Degree Level Expectations](#).
- Describe and map how your Program Learning Outcomes are achieved through the curriculum and structure of your program.
- Describe and map how student achievement is assessed and documented in relation to the Program Learning Outcomes.
- Describe how the methods and criteria for assessing student achievement are appropriate and effective relative to the Program Learning Outcomes.
- How does the program monitor and assess the ways student cohorts are achieving the Program Learning Outcomes?
- Describe how the Program Learning Outcomes communicated to students.

Program Learning Outcomes

- “By the end of the program students will....”
- Not a quantitative accounting, but an articulation of a relationship
- What are the COMMITMENTS you’re making to your students?
- Quality Council writes that Program Outcomes:
 - Articulate what successful students should have achieved by the end of the program
 - What the knowledge, skills, and abilities that successful students should have acquired by the end of the program

<https://oucqa.ca/guide/program-objectives-and-program-level-learning-outcomes/>

What are the Outcomes of your Program?

What are you committing to students they will know, be able to do, and/or value by the time they graduate?

YORK 

By the end of the program, students will be able to:

- Define and articulate major theoretical concepts in the field
- Develop and implement a research project, and compare it to established research findings
- Describe the urgency to respond to rapidly changing environmental conditions and propose a response that reflects both global and local concerns

How do you ensure you're meeting these commitments?

YORK 

By the end of the program, students will be able to:

- Define and articulate major theoretical concepts in the field
- Develop and implement a research project, and compare it to established research findings
- Describe the urgency to respond to rapidly changing environmental conditions and propose a response that reflects both global and local concerns

How do you ensure you're meeting these commitments?

YORK 

- **Develop and implement a research project, and compare it to established research findings**
- In course ABCD 2002, students will define a research question and conduct a literature review
- In course ABCD 3005, students will conduct and present on a research problem
- In course ABCD 4002, students will define an independent research question and propose research protocol
- In course ABCD 4003, students will conduct research and write a comparative analysis

How do you ensure you're meeting these commitments?

But you need a plan, with a schedule that you follow, to check into these and course correct if necessary

- **Develop and implement a research project, and compare it to established research findings**
- Yearly meetings amongst faculty about students' abilities to engage in these activities
- Collaborate with Library about a "spiral" curriculum that is responsive to changes in digital research
- Host an upper-year research fair in which the student cohort can be assessed to previous years' work

ASSESSMENT PLAN for:

“Develop and implement a research project, and compare it to established research findings”

➤ Course Mapping

| | PLO: Develop and implement a research project, and compare it to established research findings |
|-----------|---|
| ABCD 2001 | |
| ABCD 2002 | X |
| ABCD 3005 | X |
| ABCD 3015 | |
| ABCD 4002 | X |
| ABCD 4003 | X |

- Yearly meeting check in with faculty and Library colleagues
- Yearly undergraduate research fair with results captured to compare each year
- Every three years, determine if course content or course progression needs to be adjusted based on findings

ASSESSMENT PLAN for:

“Develop and implement a research project, and compare it to established research findings”

› Course Mapping

| | PLO: Develop and implement a research project, and compare it to established research findings | |
|-----------|---|-------------------|
| | Taught | Assessed |
| ABCD 2001 | | |
| ABCD 2002 | Introduced | Literature Review |
| ABCD 3005 | Developed | Presentation |
| ABCD 3015 | | |
| ABCD 4002 | Mastered | Research Proposal |
| ABCD 4003 | Mastered | Research Report |

- › Yearly meeting check in with faculty and Library colleagues
- › Yearly undergraduate research fair with results captured to compare each year
- › Every three years, determine if course content or course progression needs to be adjusted based on findings

Objectives

Goals

Assessment
Plan

Outcomes

Commitments

Assessment
Plan

Where to Begin

YORK 

Step 0: What do you have?

- Find your current Objectives and Outcomes
 - Are they useable?
- Find your current curriculum map
 - Does it represent what and how you teach?

Step 1: Develop a strategy for completion

- Identify what you have to do and how you're going to do it:
 - Do you need to define objectives?
 - Do you need to define outcomes?
 - Do you need to create assessment plans for these?
 - What does your current curriculum map look like?
- Identify how you're going to go about this work:
 - Are you going to create and provide for revision?
 - Are you going to work on collaboratively?
 - Are you going to work with supports?

Step 2: Define Objectives and Outcomes

- Define Objectives and Outcomes
 - (Both are important, but Outcomes have a greater reach)
- How to do this?

Step 2: Define Objectives

[Home](#) » Program Vision

Program Vision

What are the dreams and aspirations for your program?

What are the possibilities of your program for the future? How does your program speak to the challenges we face in the 21st century? What could your alumni be and do with what they've gained in your program?

What do you want your students to know, do, and value in the future because of your program?

Dream a big vision for your program. Imagine how [innovative](#) elements can become core to the experiences of your teaching and students' learning.

<https://www.yorku.ca/unit/vpacad/curriculum-development/vision/>

Step 2: Define Outcomes

[Home](#) » Writing Learning Outcomes

Writing Learning Outcomes

Learning Outcomes are statements about students are expected to learn during an educational experience (be that a lesson, course, or a whole program).

There are excellent resources available for you to write Learning Outcomes, including from York's very own [Teaching Commons](#). We recognize that while the principles of writing and working with Learning Outcomes are fairly straightforward, putting them to practice can be daunting.

Here, we provide you with an explanation of key elements in writing learning outcomes and how these elements can be applied to writing Program Learning Outcomes.

We have created a page for you to model how to [map learning outcomes](#).

<https://www.yorku.ca/unit/vpacad/curriculum-development/writing-learning-outcomes/>

Step 2: Define Outcomes

What is the difference between defining/refining your PLOs versus modifying them?

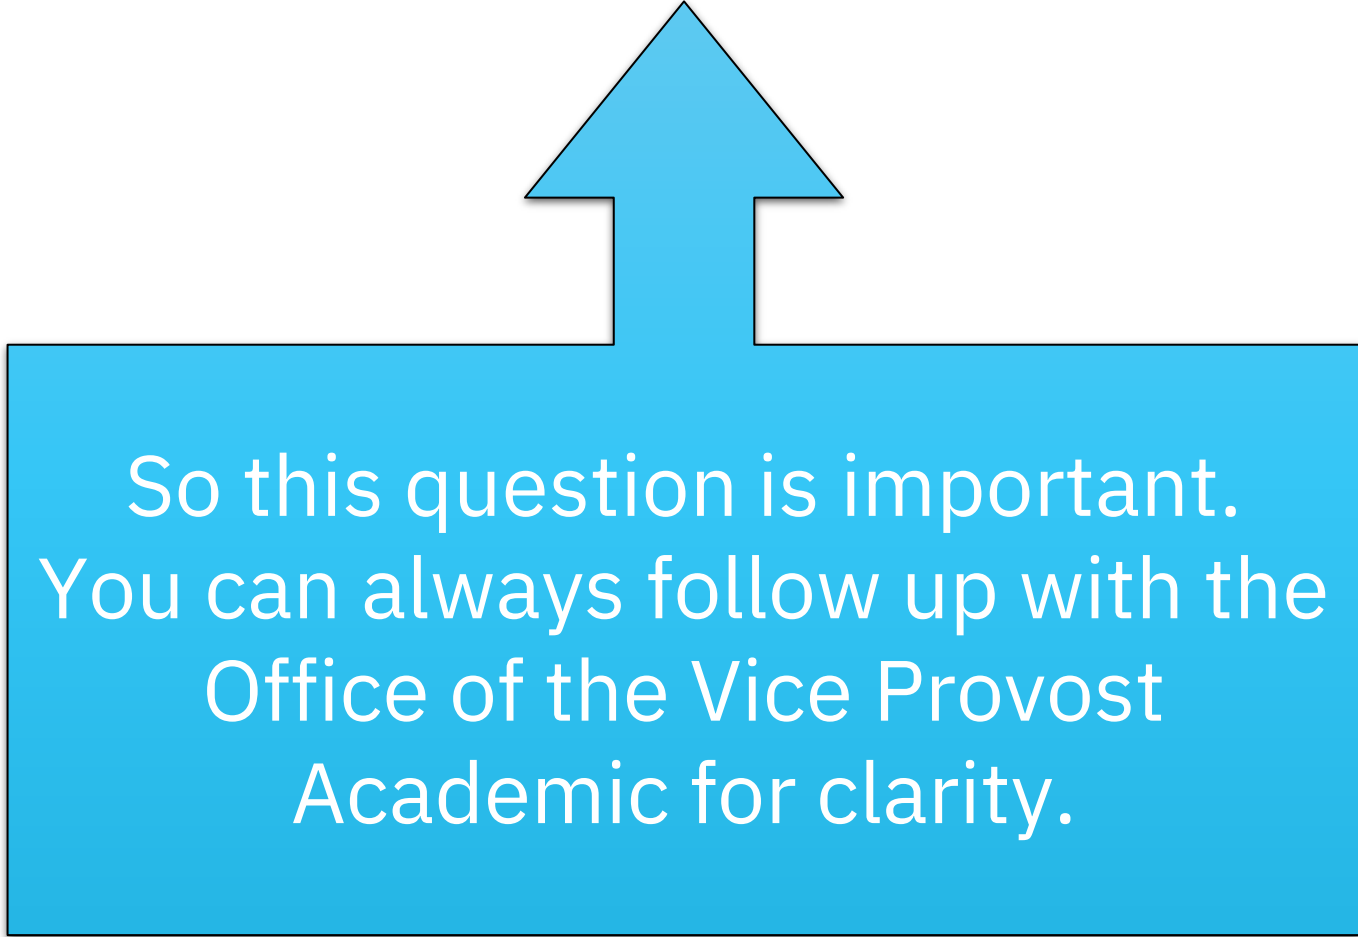

This question came up
after we finished recording

What is the difference between defining/refining your PLOs versus modifying them?

According to [section 5 of the YUQAP](#), a “Major Modification” is when (amongst other things), there is:

- a) Substantive changes to learning outcomes and/or approved requirements that comprise up to approximately one-third of the program.
- b) Major changes to courses comprising a significant proportion of the program and making an important contribution to meeting program learning outcomes (approximately one-third of courses).

What is the difference between defining/refining your PLOs versus modifying them?

So this question is important.
You can always follow up with the
Office of the Vice Provost
Academic for clarity.

What is the difference between defining/refining your PLOs versus modifying them?

However...

Many “older generation” of PLOs are essentially lists describing how programs meet the Degree Level Expectations

| Depth and breadth of knowledge | Knowledge of methodologies | Application of knowledge | Communication skills | Awareness of limits of knowledge | Autonomy and professional capacity |
|--------------------------------|----------------------------|--------------------------|----------------------|----------------------------------|------------------------------------|
| LO 1 | LO 11 | LO 21 | LO 31 | LO 38 | LO 55 |
| LO 2 | LO 12 | LO 22 | LO 32 | LO 39 | LO 56 |
| LO 3 | LO 13 | LO 23 | LO 33 | LO 40 | LO 57 |
| LO 4 | LO 14 | LO 24 | LO 34 | LO 41 | LO 58 |
| LO 5 | LO 15 | LO 25 | LO 35 | LO 42 | LO 59 |
| LO 6 | LO 16 | LO 26 | LO 36 | LO 43 | LO 60 |
| LO 7 | LO 17 | LO 27 | LO 37 | | |
| LO 8 | LO 18 | LO 28 | | | |
| LO 9 | LO 19 | LO 29 | | | |
| LO 10 | LO 20 | LO 30 | | | |

What is the difference between defining/refining your PLOs versus modifying them?

Many “older generation” of PLOs are essentially lists describing how programs meet the Degree Level Expectations

In the workshop, on the website, and in the aligned YouTube video, I spoke about how this is not an efficient way to organize your PLOs

| Depth and breadth of knowledge | | | | | Economy and professional capacity |
|--------------------------------|-------|-------|-------|--|-----------------------------------|
| LO 1 | | | | | 55 |
| LO 2 | | | | | 56 |
| LO 3 | | | | | 57 |
| LO 4 | | | | | 58 |
| LO 5 | | | | | 59 |
| LO 6 | | | | | 60 |
| LO 7 | LO 17 | LO 27 | LO 37 | | |
| LO 8 | LO 18 | LO 28 | | | |
| LO 9 | LO 19 | LO 29 | | | |
| LO 10 | LO 20 | LO 30 | | | |

What is the difference between defining/refining your PLOs versus modifying them?

Many “older generation” of PLOs are essentially lists describing how programs meet the Degree Level Expectations

**You can
(and we recommend that you do)
define/refine them without
“modifying” your program**

| Depth and breadth of knowledge | | | | | Autonomy and professional capacity |
|--------------------------------|-------|-------|-------|--|------------------------------------|
| LO 1 | | | | | 55 |
| LO 2 | | | | | 56 |
| LO 3 | | | | | 57 |
| LO 4 | | | | | 58 |
| LO 5 | | | | | 59 |
| LO 6 | | | | | 60 |
| LO 7 | LO 17 | LO 27 | LO 37 | | |
| LO 8 | LO 18 | LO 28 | | | |
| LO 9 | LO 19 | LO 29 | | | |
| LO 10 | LO 20 | LO 30 | | | |

What is the difference between defining/refining your PLOs versus modifying them?

For example...

Many “older generation” of PLOs were both very specific and very general

| Depth and breadth of knowledge | Knowledge of methodologies | Application of knowledge | Communication skills | Awareness of limits of knowledge | Autonomy and professional capacity |
|---|--|--|--|--|--|
| LO 1 Students will identify birds LO 2 Students will identify bees LO 3 Students will identify flowers LO 4 Students will identify trees | LO 11 LO 12 LO 13 Students will define the steps of the Scientific Method LO 14 LO 15 LO 16 LO 17 LO 18 | LO 21 Students will use the Scientific Method to distinguish differences between animals and plants LO 22 - 30 LO 23 | LO 31 LO 32 LO 33 LO Students will present on their findings LO Students will write about their findings LO 36 LO 37 | LO 38 LO 39 LO 40 LO 41 LO 42 LO 43 | LO 55 LO 56 LO 57 LO 58 LO 59 LO 60 |

What is the difference between defining/refining your PLOs versus modifying them?

DEFINING/REFINING your PLOs is about ensuring you have a concise, unique set of PLOs that reflect your current program and that can be communicated to students. See more [here](#).

A “REFINED” PLO BASED ON THE EXAMPLE SHOWN

- By the end of the program students will identify a variety of plant and animal species, apply the scientific method to determine how changes in their environment will affect them, and communicate these findings to different audiences

What is the difference between defining/refining your PLOs versus modifying them?

MODIFYING PLOs is about changing the essence of your program

A “MODIFIED” PLO BASED ON THE EXAMPLE SHOWN

- Robots. We do robots now. All robots all the time.
- By the end of the program, students will have read 100 novels about robots.

What is the difference between defining/refining your PLOs versus modifying them?

REFINING

- By the end of the program, students will identify a variety of plant and animal species, apply the scientific method to determine how changes in their environment will affect them, and communicate these findings to different audiences

MODIFYING

- Robots. We do robots now. All robots all the time.
- By the end of the program, students will have read 100 novels about robots.

The work we usually see in the CPR process is about defining/refining PLOs

What is the difference between defining/refining your PLOs versus modifying them?

You can always follow up with the
Office of the Vice Provost
Academic for clarity

Step 2: Define Outcomes

- There is help!
 - I can help you: Cutrara@yorku.ca
 - Teaching Commons
 - Faculty-based Curriculum / Teaching and Learning staff

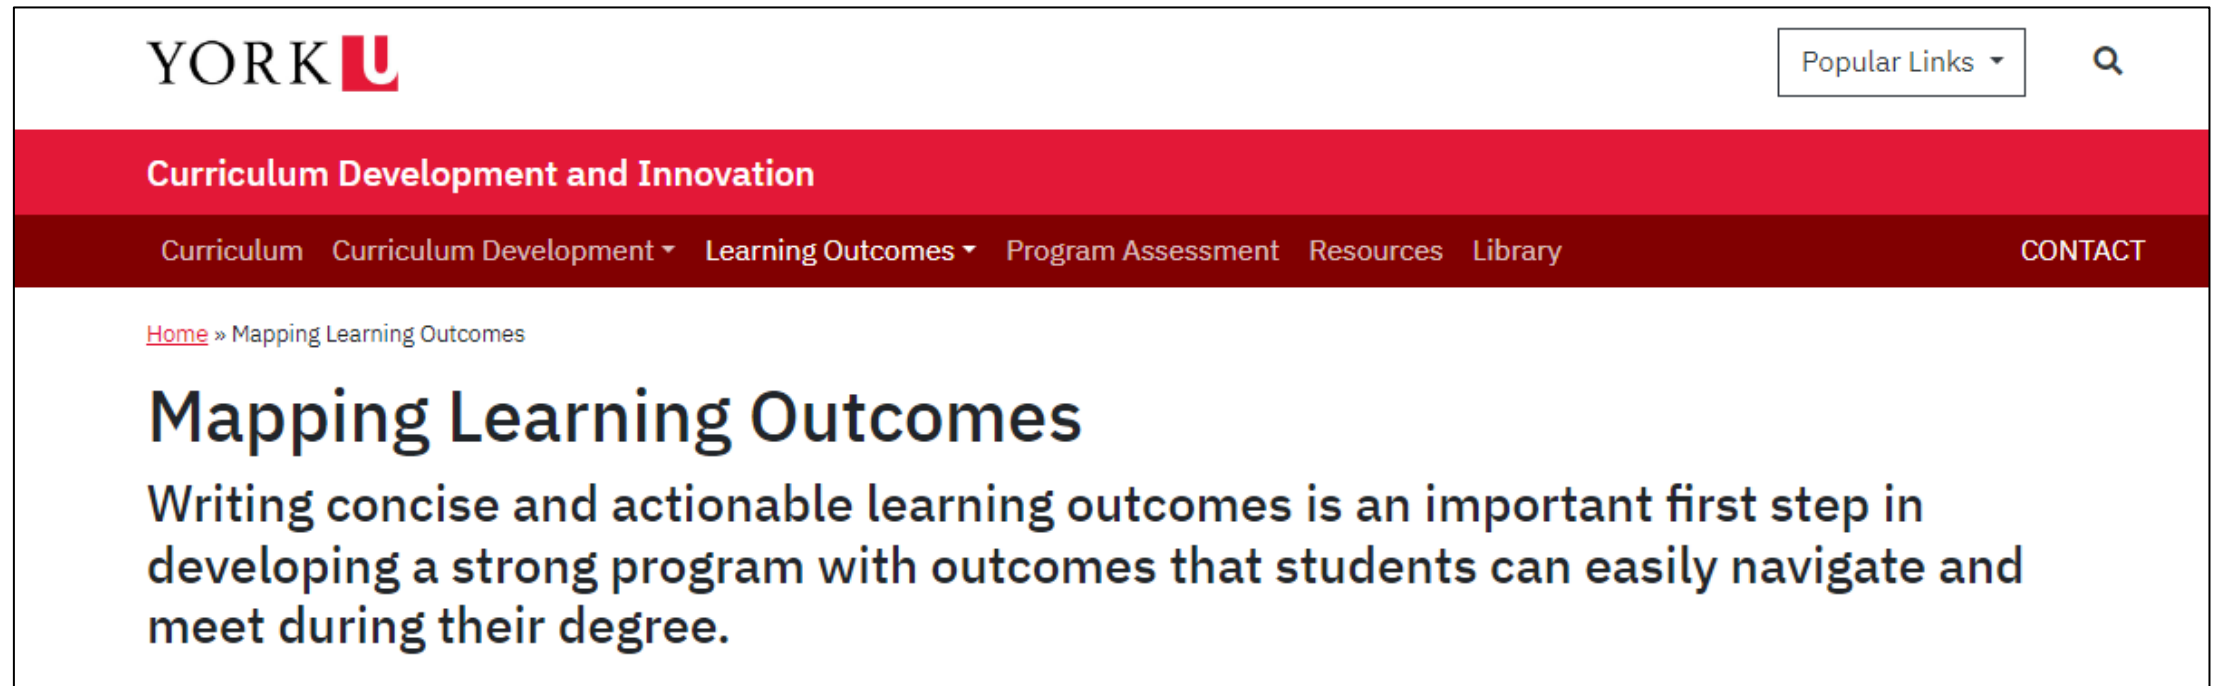

➤ DIY Checklist

Program Learning Outcomes (PLOs) Checklist

| | |
|---|--|
| Do you have a concise set of 8-12 PLOs? | |
| Are the PLOs SMART ? | |
| Do they meet the DLEs ? | |
| Have you mapped the PLOs to DLEs? | |
| Do your PLOs demonstrate different levels of thinking , from basic understanding to more complex application, synthesis, and creation? | |
| Do they reflect what students should know, do, and value in their program? | |
| Do they reflect actionable items? In other words, do they avoid the word "understand" to something more direct? | |
| Do your PLOs represent your unique program? | |
| Do they represent York and York's values ? | |
| Are they written in plain language to communicate to your students? | |
| Do all faculty members in the program understand them in relation to the course they teach ? | |
| Have you mapped courses and curriculum to the PLOs? | |
| Can you assess your PLOs? | |
| Do you have a plan for assessing them? | |
| Have you mapped their assessment? | |

Step 3: Curriculum Mapping

- Map courses to PLOs
 - (Maybe also course-based assessments?*)

The screenshot shows the York University website. At the top left is the 'YORK U' logo. To the right is a search bar with a magnifying glass icon and a 'Popular Links' dropdown menu. Below the logo is a red navigation bar with the text 'Curriculum Development and Innovation'. Underneath is a dark red navigation bar with links for 'Curriculum', 'Curriculum Development', 'Learning Outcomes', 'Program Assessment', 'Resources', 'Library', and 'CONTACT'. The main content area has a breadcrumb trail: 'Home » Mapping Learning Outcomes'. The title 'Mapping Learning Outcomes' is in a large, bold, dark blue font. Below the title is a paragraph: 'Writing concise and actionable learning outcomes is an important first step in developing a strong program with outcomes that students can easily navigate and meet during their degree.'

<https://www.yorku.ca/unit/vpacad/curriculum-development/mapping-program-learning-outcomes/>

Step 3: Curriculum Mapping

Mapping Program Courses and Assessments to PLOs (Curriculum Maps)

Program Courses to PLOs

| Map of Program Courses to PLOs | | | | | | | | | | |
|---|------|------|------|------|------|------|------|------|------|-------|
| | PL01 | PL02 | PL03 | PL04 | PL05 | PL06 | PL07 | PL08 | PL09 | PL010 |
| Core/Required Courses | | | | | | | | | | |
| Course Code | X | X | | | X | | | X | X | |
| Course Code | X | X | X | | | X | X | | | X |
| Course Code | | X | | X | X | | X | X | | |
| Course Code | | | X | | | | | | X | X |
| Course Code | X | | | X | | X | | | | |
| Course Code | | | X | | | | | X | | |
| Additional Required Program Elements | | | | | | | | | | |
| <i>E.g. Co-op</i> | X | X | X | | X | | | X | X | X |
| Electives/Optional Courses | | | | | | | | | | |
| Course Code | | | | X | | | X | | | |
| Course Code | X | | | X | X | | | | | X |
| Course Code | | X | | | X | | | X | | X |
| Course Code | | X | | | X | X | | | X | |

Step 3: Curriculum Mapping (with course assessments)

Mapping Program Courses and Assessments to PLOs (Curriculum Maps)

Program Courses to PLOs

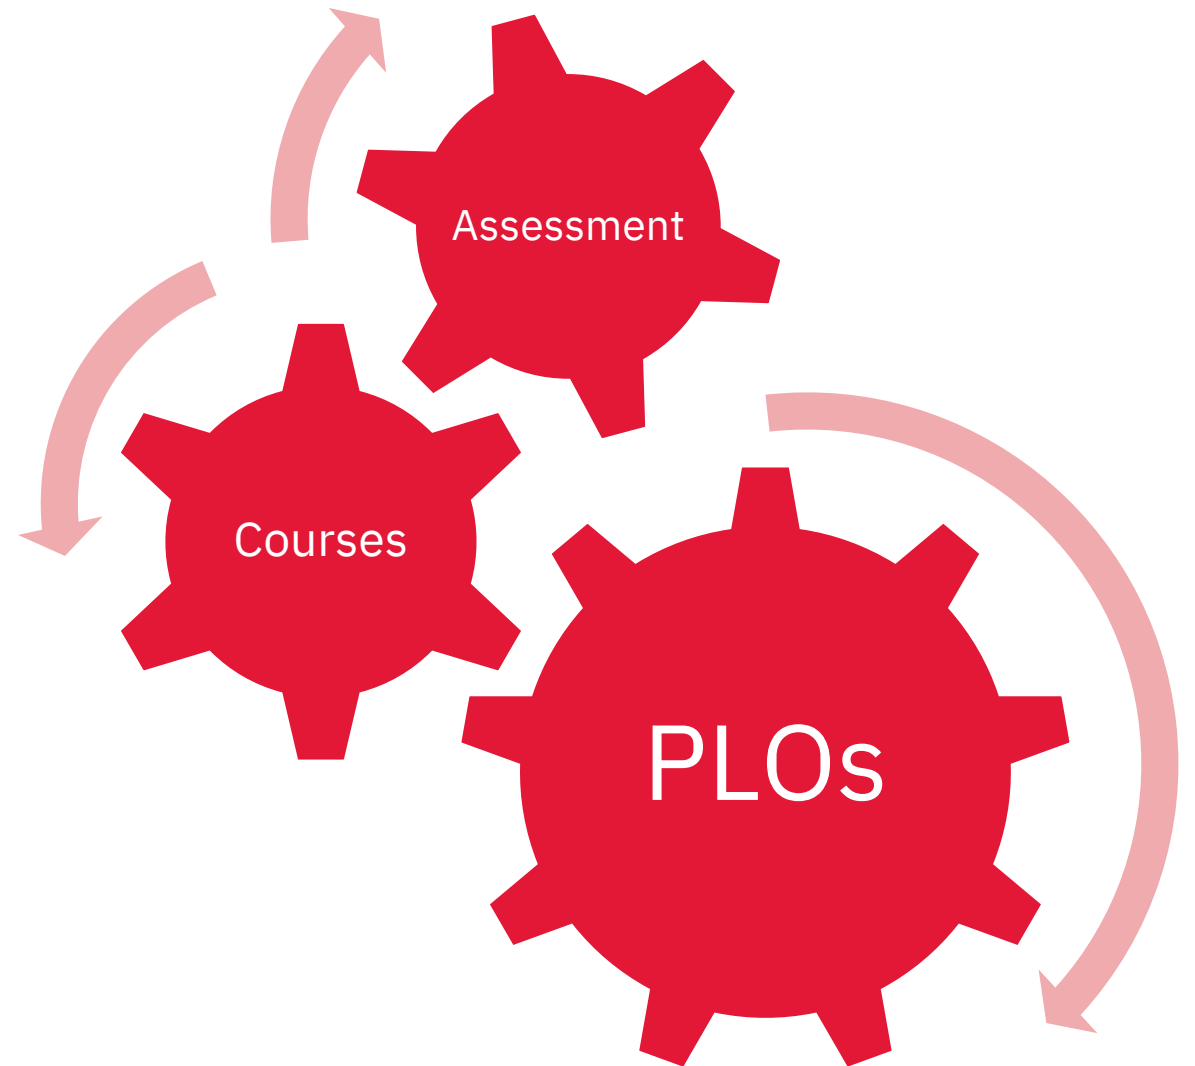

Program Course Assessment to PLOs

| Map of Course Assessment to PLOs | | | | | | | | | | | | | | | | | | | | |
|--------------------------------------|--------|--------------|--------|--------------|--------|----------|--------|----------|--------|------------|--------|------------|--------|------------|--------|--------------|--------|-------------|--------|------------|
| Core/Required Courses | PLO1 | | PLO2 | | PLO3 | | PLO4 | | PLO5 | | PLO6 | | PLO7 | | PLO8 | | PLO9 | | PLO10 | |
| | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed | Taught | Assessed |
| Course Code | X | Quiz, Exam | X | Exam | | | | | X | | | | | | X | | X | Essay, Quiz | | |
| Course Code | X | Essay | X | | X | | | | | | X | | X | Reflection | | | | | X | Reflection |
| Course Code | | | X | | | | X | Quiz | X | Anno, Bib. | | | X | | X | Presentation | | | | |
| Course Code | | | | | X | Essay | | | | | | | | | | | X | Journal | X | Journal |

| Course Code | | | | | X | Exam | | | | | | | | | X | Exam | | | | |
| Additional Required Program Elements | | | | | | | | | | | | | | | | | | | | |
| E.g. Co-op | X | Report | X | Reflection | X | | | | X | | | | | | X | Report | X | Portfolio | X | Portfolio |
| Electives/Optional Courses | | | | | | | | | | | | | | | | | | | | |
| Course Code | | | | | | | X | Midterm | | | | | X | Essay | | | | | | |
| Course Code | X | Lab | | | | | X | Quiz | X | Quiz | | | | | | | | | X | |
| Course Code | | | X | Presentation | | | | | X | | | | | | X | Presentation | | | X | Exam |
| Course Code | | | X | Case Study | | | | | X | Case Study | X | Anno Bib. | | | | | X | Anno Bib. | | |
| Course Code | X | Presentation | | | X | | | | | | | | | X | | | | | | |
| Course Code | | | X | Essay | | | | | | | X | Reflection | | | | | | | | X |

| | |
|--|------------|
| | Introduced |
| | Developed |
| | Mastered |

Ongoing Work to Refine and Define

Step 4: Develop an Assessment Plan

- Define an assessment and monitoring plan for both objectives and outcomes

**Will be discussed more in next workshop November 27th, 2023*

Step 5: Reflect this Work in the Self Study Review

[Name of program]
