### SPEAKER

Dr. Shayna Rosenbaum is a Professor and York Research Chair in the Department of Psychology and Vision: Science to Applications (VISTA) Program at York University and is an Associate Scientist at the Rotman Research Institute at Baycrest. She is registered as a Clinical Neuropsychologist with the College of Psychologists of Ontario. She received her Ph.D. in Psychology from the University of Toronto in 2004 and completed a postdoctoral fellowship at the Rotman. She has published extensively on the topics of memory and decision-making, and has received awards for her neuroimaging and patient research, including a Sloan Research Fellowship and early career awards from the Canadian Association for Neuroscience, Canadian Society for Brain Behaviour and Cognitive Science (CSBBCS), and International Neuropsychological Society.
